While the treasury department, in iministering the tariff laws relative to are-bred animals, does not accept the pure-bred animals, does not accept the verbal statements of owners or agents, but requires certified evidence in writ-ing of the pedigree claimed, the census enumerator will be compelled to rely pretty generally, if not wholly, upon verbal replies as to whether stock is

Sheep may be recorded by flocks; but other animals are recorded by indi-viduals. The herd books show that about 750,000 cattle have been regis-tered in the United States and it is estimated that about 350,000 are living. If breeders will make accurate returns of their pure-bred animals to the census enumerators next June, a correct basis will be secured for showing future expansion in high grade live stock. Otherwise the efforts of the census officers will be of small value.
