

# THE CONDON GLOBE.

TUESDAY, APRIL 4, 1901.

**NOTICE.**  
The Globe invites correspondence from all sections of Gilliam County. We wish to make this paper the leading news medium of the county and will do our best to meet us by sending in the news of their respective neighborhoods. Correspondence must be signed by the writer, but names of individuals will not be published without the written consent of good faith, and the editor assumes no responsibility for opinions expressed by correspondents.

## PROGRESSIVE IDEAS.

A remarkable bill providing for national ownership of railroads has been introduced in the United States congress. Some of its provisions are as follows:

First—The Government is to purchase, own and operate the steam railways of the country, taking possession of them January 1st, 1902, under the power of eminent domain based upon its constitutional authority to regulate interstate commerce and to establish post roads, but giving the present stockholders of the railroads fair commercial value therefor, in railroad debenture bonds at 2 1/2 per cent. interest, and payable in 80 years.

Second—Passenger rates are to be reduced at once to 1 cent a mile, and under certain conditions to 1 cent per mile. Freight rates are to be uniform and as low as will meet all charges of the service, and the interest on the bonds and the interest of the sinking fund.

Third—Eight hours of labor for all railway employees are to constitute a day, and forty-eight hours a week; the wages of track laborers are to be raised from \$1.16 a day to \$1.35.

Fourth—It provides for accident insurance for shippers, employees, and passengers.

Fifth—It provides for postal express.

Sixth—It provides for railway civil service and promotion by merit, thus insuring only one way to obtain a position, and that is to work up from the ranks. No appointments or removals can be made for political reasons and employes are to have the right of trial before a tribunal, and the governing board, to consist of eleven commissioners, is to be appointed by the President of the United States, subject to the ratification of the senate. Each commissioner must be a practical railroad man, of at least 10 years' previous experience, thus barring out politicians.

Seventh—It provides for the expenditure of \$50,000,000 annually to build new roads, after the payment of all current charges, etc., have been met. This money is to be expended, not as now so often in useless competing lines, but according to the needs of communities, and where the right of way shall have been donated by the local government, whether county, district or state.

The advocates of this bill declare that the plan will cause no addition to the burdens of the taxpayers, as the purchase money will all come from the earnings of the railroads, and not from the government—Co-operator.

## THE POWER OF LABOR.

The Morgan-Rockefeller combine is considered to be about the biggest financial enterprise in existence, and probably was never excelled, if equaled, in the world's history. In fact, it is a modern growth. It seems to be almost all-powerful, but it must meet and deal with another organization or aggregation that eventually, may display even more power than Mr. Morgan with the billions under his control. It is stated in an Eastern paper that Mr. Morgan and his associates realize that the greatest menace to the steel trust is possible labor troubles. The concern will employ 400,000 men, and a well-organized strike would nearly annihilate it, besides paralyzing industry generally and precipitating political troubles. Accordingly it is proposed to have a permanent arbitration board to adjust all troubles between the men and the company, avoiding strikes and disorganizing troubles. This is perhaps practically true. Mr. Morgan is a giant. But labor is a greater and may be even a more

### Millions Given Away.

It is certainly gratifying to the public to know of one concern which is not afraid to be generous. The proprietors of Dr. King's New Discovery for Consumption, Coughs and Colds, have given away over ten million trial bottles and have the satisfaction of knowing it has cured thousands of hopeless cases. Asthma, Bronchitis, La Grippe and all Throat, Chest and Lung diseases are surely cured by it. Call on the Condon Drug Co. and get a free trial bottle. Regular size 50c and \$1.00. Every bottle guaranteed.

potent giant, if properly organized, and acting lawfully, intelligently and rationally.

Who, what, gives Rockefeller and Morgan their millions and hundreds of millions? Chiefly Labor, that of workingmen and workingwomen. Morgan and Rockefeller have shown partly what organization and combination of capital can do. They can buy up railroads by the score, control most of the mines, dictate in some important respect, perhaps, to the government. Mighty! Wonderful! Admirable! It took the beginning of the twentieth century, and the free, resourceful United States, to produce such men. Even England, and its greatest financiers and speculators, stand agape and astagh at the tremendous, unprecedented "deals" of this clique of New York capitalists and speculators. Englishmen say: "It's simply astonishing, don't you know?" And so, really, it is. We Americans are a little astonished at it ourselves. But we don't get scared easily. And the best advice to Labor is, not to get scared. Don't "denounce." Don't "resolute."

But organize. Stand for your rights on lawful, reasonable ground. It may not be quite true literally, as has been asserted, that organized labor could "break" Mr. Morgan in a few days, but he certainly cannot afford to have labor organized against him. While Mr. Morgan, and his associates, are reaping millions from the marvelous resources of the country, and their business ability, labor has an opportunity to show its power, and within lawful, reasonable lines it is a good time to do so.—Telegraph.

It is a fact patent to any observer that about 90 per cent of the children never receive any higher education than at the common schools, and that fact should be a strong influence in dictating a policy that would insure the greatest amount of useful instruction possible for those to whom no other avenue of learning is available. The high school is as far as the system of public education can very well go, so far as the masses are concerned, and it is there we must look for the finishing touches that will fit the large majority of our boys and girls for their life struggle. It is pleasing to notice that an effort is now in progress to revolutionize the high school and instead of continuing it as another ladder in literary and theoretical book learning, to turn it into a school of special studies suited to the tastes, inclinations and intended vocations of the pupils.—Salem Statesman.

The following from the Idaho City World might be applied to the metropolis and county seat town of our adjoining county on the east:

Those two frightful words, "small-pox" and "pest house," are not used any more in Boise. Smallpox patients are simply "ill," and are removed to the "detention hospital" That sounds better, anyway,

But the old and speckled plague, By any other name, Will pass around and plant His microbes just the same.

**A VALUABLE MEDICINE**  
For Coughs and Colds in Children.

"I have not the slightest hesitancy in recommending Chamberlain's Cough Remedy to all who are suffering from coughs or colds," says Chas. M. Cramer, a well known watch maker, of Colombo, Ceylon. "It has been some two years since the City Dispensary first called my attention to this valuable medicine and I have repeatedly used it and it has always been beneficial. That sounder better, anyway,

Mrs. H. D. Randall spent last week in Portland, returning home on Sunday accompanied by her daughter Mabel, who spent the winter with the family of L. O. Ralston.

We are having our share of religious services this season. The M. E. church held a two weeks' meeting and then Rev. Moorehouse followed with three weeks' service, closing Sunday.

(To the editor.) After hearing both sides, we think you were a fool for paying the city of Condon that mortgage. If you had shown your ability to defraud others of honest money you might have been a "hero" and could have stood in with the "other sellers."

The Best Blood Purifier.

The blood is constantly being purified by the lungs, liver and kidneys. Keep these organs in a healthy condition and the bowels regular and you will have no need of a blood purifier. For this purpose there is nothing equal to Chamberlain's Stomach and Liver Tablets, one dose of them will do you more good than a dollar bottle of the best blood purifier.

Mr. J. W. Craig, G. P. A., O. B. & N. Co., Portland, Ore., for particulars.

**Letter From Bay City.**  
BAY CITY, March 25.—(To the editor.) Agreeable to promise, will drop you a few lines.

Came down to Portland, after stopping off a day or two at Arlington and also at The Dalles; did not feel very well while in Portland. Right here let me give you a little advise: When coming down do not hamper yourself with luggage. All you need is an umbrella and a check-book, the dear people will do the rest. It has rained nearly all the time since I left Condon. Went down to Holton and spent a few days fishing, but with indifferent success. The season for trout fishing has not arrived yet, but think I can stand it here for a few days longer, as clams are biting well this month, and the first summer day that comes will try the trout.

March the 29.—Am enjoying the hospitality of Brother H. B. Hendricks, who is fixed up very cosy. Table is set 12 hours out of the 24, i.e., when the tide is out it has been one round of excitement—one day clamming, the next catching crabs and then tom-cods. It's a little early for good trout fishing, but some one told Brother Hendricks where there was an early patch of trout that were getting ripe, so we made preparations to go and pick them, but I am not going to hazard my reputation for veracity by saying how large they were; but they were nice and fat. For genuine fun the clams and ducks take the cake.

It is also fine sport catching crabs. All

you have to do is to just sail over the bay and look down in the clear water

and when you see one just reach down with a rake or spear and pick him.

It will be much pleasanter here a month later, as it rains a good deal at present but the people do not mind it much, as the rain does not hurt one so much here as in that country.

Went down to Astoria and had to wait four days for a steamer, and was sorry afterward that I found her. The weather was very rough and I lost all the good grub I had been eating for the last few days. It was then that I came to the conclusion that I was built exclusively for land. And now the question that resolves itself in my mind is how to get out of this bloomin' country without having to go through the same ocean experience.

This is going to be a fine country when they get a railroad in here. Everything in the line of game and fish is plentiful, with the exception of "suckers," which, I presume, do not like the picking here.

Do not know how long I will remain here, as I have some business to transact that is a little complicated.

Give kind regards to all inquiring friends.

Respectfully yours,  
AL HENSHAW.

Stops the Cough  
and works off the Cold.

Laxative Bromo-Quinine Tablets cure a cold in one day. No Cure, no Pay. Price 25 cents

OXEL.

Miss Grace Balding is teaching in the Bunker Hill district.

A large acreage of spring grain is being sown by our farmers.

There is more or less complaint of la grippe in the neighborhood at present.

Sherman Wade returned last week from an extended business trip to the Valley.

The road force are doing good work and are making a fine grade on the new road north of town.

Olex is expected to make more improvements this season than all other towns.

Miss Olive Curran closed a six months' term of school here on last Friday and will soon return to her home at Salem.

Grant Wade has been buying more land, including Peter Conroy's ranch. Grant is spreading himself. His pants are No. 40 now.

Mrs. H. D. Randall spent last week in Portland, returning home on Sunday accompanied by her daughter Mabel, who spent the winter with the family of L. O. Ralston.

We are having our share of religious services this season. The M. E. church held a two weeks' meeting and then Rev. Moorehouse followed with three weeks' service, closing Sunday.
