

The Small of the Back

That is where some people feel weak all the time. They are likely to be despondent and it is not unusual to find them borrowing trouble as if they hadn't enough already. The fact is their kidneys are weak, either naturally or because of sickness, exposure, worry or other influences.

"I am thankful to say," writes J. L. Campbell, of Sycamore, Ill., "that Hood's Sarsaparilla has cured me. For many years I was troubled with backache. At times I was so bad I had to be helped from the bed or chair. I am now well and strong and free from pain. What this great medicine did for him it has done for others."

Hood's Sarsaparilla

Promises to cure and keeps the promise. Begin treatment with Hood's today.

Why He Was Glad.
"Here's a queer announcement on the bottom of the bill of fare: 'The proprietor will be glad to receive complaints against the waiters.'"
"What's queer about that?"
"Why should the proprietor be 'glad' to receive complaints?"
"Because he knows that the customers are not getting more than their money's worth."—Catholic Standard and Times.

Some people enjoy Rheumatism or Neuralgia—if they did not they would use Hamlin's Wizard Oil.

A Safer Sport.
"There's one respect, at least, in which fishing is a good deal safer sport than hunting."
"How is that?"
"We don't make any fatal mistakes hooking up men who happen to look like fish."—Cleveland Plain Dealer.

CATARRH

Catarrh has become such a common disease that a person entirely free from this disgusting complaint is seldom met with. It is customary to speak of Catarrh as nothing more serious than a bad cold, a simple inflammation of the nose and throat. It is, in fact, a complicated and very dangerous disease; if not at first, it very soon becomes so.

The blood is quickly contaminated by the foul secretions, and the poison through the general circulation is carried to all parts of the system. Salves, washes and sprays are unsatisfactory and disappointing, because they do not reach the seat of the trouble. S. S. S. does. It cleanses the blood of the poison and eliminates from the system all catarrhal secretions, and thus cures thoroughly and permanently the worst cases.

Mr. T. A. Williams, a leading dry-goods merchant of Spartanburg, S. C., writes: "For years I had a severe case of nasal Catarrh, with all the disagreeable effects which belong to that disease, and which make life painful and unendurable. I used medicine prescribed by leading physicians and suggested by numbers of friends, but without getting any better. I then began to take S. S. S. It had the desired effect, and cured me after taking eleven bottles. In my opinion S. S. S. is the only medicine now in use that will effect a permanent cure of Catarrh."

SSS is the only purely vegetable blood purifier known, and the greatest of all blood medicines and tonics. If you have Catarrh don't wait until it becomes deep-seated and chronic, but begin at once the use of S. S. S., and send for our book on Blood and Skin Diseases and write our physicians about your case.

PEISO'S CURE FOR CATARRH CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Taste Good. Use in time. Sold by druggists.

TEASING A YOUNG SOLDIER.

Commander of a Military Institute Teases a Small Cadet. In the "Personal Recollections" of Capt. James Dinkins is an account of a little cadet who suffered a severe "scare" at the North Carolina Military Institute. When he entered the school, he reported at once to the president, Maj. Hill.

"Well, sir, what is your name?" asked Maj. Hill.
"James Bleeker."
"Well, what is your middle name?"
"I have no middle name. Just James."

The examination proceeded rather disastrously, but the cadet was finally dismissed, and told to answer to his name at reveille the next morning.

The little fellow lay awake nearly all night, fearing he might not hear the drum-beat; and when it sounded he was promptly in line. The roll was called, and each boy answered; but when it came to "Bleeker," there proved to be several: H. H., H. B. and J. J. When the last-named was called, no one answered, and the little newcomer felt that he had been forgotten.

After breakfast, when the boys had gone to their rooms for study, little Bleeker heard a tap outside. He threw open the door, and found there a sergeant and two men, with their guns at a carry.
"I have orders, sir," said the sergeant, "to arrest you and take you to Maj. Hill."
The boy started back in genuine horror and despair. He wondered if his father had any conception of the awful situation, and what he would say if he knew. But there was nothing to do but to yield, and he walked away with his guard. As soon as they reached the Major's presence, that officer asked:
"Why were you not at roll-call this morning?"
"I was there," replied the boy.
"Sergeant, did he answer to his name?"
"No, sir."
"Well, sir, why did you not answer to your name?"
"He did not call my name, sir. I was there! I declare I was there! But did not hear my name called."
"Call the roll, sergeant," ordered the Major.

The sergeant began, and went on until he reached "Bleeker, J. J."
"Stop, sir!" said the Major. "Is that your name?"
"No, sir, my name is James Bleeker."
"But you told me that your name was just James Bleeker."
"Yes, sir."
"Well, doesn't J stand for just?"
This was the Major's private joke, which he had concocted in secret, and at which he never smiled.

FREAKS OF NATURE.

A Monstrous Growth of Vegetation Found in the Golden State.
"We are not so much on corn here in California," said Seedman L. Gorman, of Los Angeles, "but in all other products of nature we can beat the world. He is perhaps the oldest seedman on the Pacific coast, says a Los Angeles letter. What he does not know about fruit, grain and vegetables is not worth knowing.

When asked about vegetable monstrosities yesterday he refreshed his memory for a moment and then continued: "Of course, you have heard of the big grape vine at Santa Barbara, which covers an area of three acres of land. There is the monster rose bush at Santa Rosa. I remember when a boy, I marveled at the size of this plant. It grew to an enormous height and completely covered the house where it grew. During my lifetime here in California I have handled squashes running all the way from 150 to 300 pounds each.

"Wormholes I have seen weighing from thirty-five to 100 pounds. Beets are frequently known on this coast weighing all the way from forty to seventy-five pounds. Last fall I saw three onions, the aggregate weight of which was nearly five pounds. In the Pomona Valley I have known of onions weighing from one and three-quarters to two and a half pounds. Tomato vines frequently grow ten or twelve feet across, and I have often seen radishes that looked like big turpins."

"How about potatoes?"
"Well, I have observed specimens of the Humboldt County potato which weighed from two to three pounds. It is not at all unusual to see cabbage weighing from thirty-five pounds to seventy-five pounds. Some years ago a Mr. Fox, who lived down in the Santa Cruz Mountains, raised a carrot of the white Belgian variety which weighed about twenty-eight pounds. It was the biggest carrot on record. In the way of fruits, we have raised on this coast enormous peaches and pears. The largest pears that come to the San Francisco market, of course, are what they call pound pears, but I have seen them weighing two and a half pounds."

Mr. Moody and the Questionable Book.
Some one asked the late Dwight L. Moody if he had read a certain book. He replied, "No, I believe there is poison in it; at least I have heard so on good authority." The friend said, "But wouldn't it be well for you to read it for yourself?" "No," said Mr. Moody; "if I take poison in my stomach the doctor has to come with a stomach-pump to take it out. Why should I take poison in my mind? I might never be able to get it out."—Ladies Home Journal.

Explaining a Unique Motto.
There is a newspaper in Kansas whose motto is "Lie, steal, drink and swear," and it is thus explained by the editor: "When you lie, let it be down to pleasant dreams; when you steal, let it be away from immoral associates; when you drink, let it be pure water; when you swear, let it be that you will patronize your home paper, pay your subscription and not send your job work away from home."

Reading-Rooms in Jena.
The small German university town of Jena has no fewer than seven free reading-rooms, with newspapers and books.

What a pity it is that when nature does a good thing (like a rap or snow in a dry season), we cannot clap for an encore.

There is a very strict law in Italy against the export of works of art, and a member of the royal family even could not sell or give away a picture or statue, ornamental piece or pillar from a palace without the consent of the authorities.

Lantern Fly.
The lantern fly of Surinan, South America, has two sets of eyes, to catch the light from all possible directions. The luminosity which glows from the head is so brilliant that it is easy to read by it.
