In profound sleep the dreams refer to latent recollections of "You should sleep on your right long-past events and matters seemingly having no connection with the pres-"I really can't do it doctor; my hus- ent; but the dreams of light slumber band talks in his sleep, and I can't hear a thing with my left ear."—Town excitements, and are sometimes connected with what is transpiring around the sleeper.

Coal workings around Cheadle, in North Staffordshire, England, have been traced back as far as the reign of Richard III. The early mining is explained by local geological conditions, as the coal-seams-instead of being hidden under drift as in other parts of England-were brought to notice through dark streaks turned up by the plow. A late discovery is an

After a series of experiments with carrier-pigeons for conveying intelligence, the German naval authorities have decided to erect permanent pigeon stations on the coasts of the North and the Baltic seas. Every warship, East; to Dee Moines, Kansas City and except torpedo-boats, leaving Kiel or the Southeast, via Chicago Great Western railway. Electric lighted trains. Wilhelmshaven will hereafter carry a consignment of pigeons, to be released Unequalled service. Write to J. P. at varying distances from the land stations. It is estimated that the birds have sufficient endurance to fly home over a distance of about 186 miles from land.

After so much has been said of the excellence of applied science in Gergreatly inferior to the peacents, in Eng-iand members of the learned societies Lieutenant Carden, who has returned are physically superior to the laboring from an inspection of the iron, steel and machinery establishments of Europe, conducted in the interests of the St. Louis Exposition, that even in German shops the high-grade work is done with American tools. For general work, he says, German toolschave taken the place of English tools, which, ten years ago, were employed in every shop of importance; but for work requiring great precision and excellence, there is to be found, in nearly all the leading shops, a group of American tools.

Emile Guarini of Brussels, automatic signals are sent to the engine house by wireless telegraphy. The rise of the mercury in a thermometer acts upon a relay, and sets in motion a wheel which makes and breaks the electric circuit by a series of contacts. A series of impulses is thus sent through an induction coil and the usual transmitting apparatus. The receiver at the central station or engine house includes air and earth conductors, coherer, battery and Morse instrument. The same receiver can serve a number of transmitters in different places, and as the contacts on the wheel can be varied, the exact location

NICKNAMES

of the fire can be indicated.

Given Often for Absurd Reasons, and Generally They Stick.

"Wonderful how nicknames stick to reason I tramped all de way here a person," said the observant man. the males and duller in color, although trough de blazing sun to finish de "There were two nice little women in the red-eyed female is quite black. our village who came to call on us The bird receives its name from its one evening, and we offered them popfilling the plates and they kept crunchdiscovered at Niagara Falls. incessantly in a high-pitched voice and a bright girl dubbed him 'the chirper.' "Mis'ry likes comp'ny, don't it?" a bright girl dubbed him 'the chirper.'
"Yes, but when I see it comin', dat's The name was quickly passed around greater part of his friends know him the name of 'Whont' to this day because when she was a very little girl she used to call herself 'Mrs. Whont' Ayer's Pills are good liver when she played grown-up ladies, and pills. You know that. The best the family picked it up. She simply can't shake the absurd name.

"More than one red-haired man is They keep the bowels regular, known by the name of 'pink,' and philcure constipation. J.C. Arer Co., osophically accepts the title. I have an acquaintance who holds a responsible position who is known by the name of 'Dotty.' It seems that one day a mischlevous girl discovered that he had three very prominent dimples. She promptly dubbed him 'Dotty Dimple,' and now he is known to all his associates as 'Dotty.' Another man of my acquaintance is always called 'Bluebeard' because he has such a very white and thin skin that if he does not shave daily his beard shows blue through it. That name, too, came

through a woman's quick wit. "An old lady friend of mine is still criled 'Peachy' because when she was a young girl she had a complexion like peaches and cream. Her brother promptly dubbed her 'peachy,' and 'Peachy' she will remain to the end of her days. In a certain household a very feminine little woman is still called 'The Boy,' because when she was a young girl she went through a very serious illness which made it necessary to cut her hair short. Her younger sister said she was 'The Boy' of the family, and the dainty lady is still called by that absurd name.

"An effeminate man was once called

he sot angry at first he has cheerfully accepted the name now.

"Our bookkeeper is always putting in his oar when it is not at all neces sary, and I think now he will be known until the end of time as 'General Butts.' A friend of mine who is always called 'Cheerful' doesn't know whether he is called that because his friends believe he has a sunny disposition or because they consider him a cheerful idiot. But, at any rate, he can't shake the name."-Philadelphia Ledger.

FIRST PLANTING OF SPONGES.

Successful Experiments Made by the Government on Florida Coast. Not content with utilizing all the available resources in the United States for the purpose of supplying the needs of the people of this country, Uncle Sam has invaded the sea, says the Philadelphia Ledger. The government has gone in for sponge culture. The supply of sponges has never equaled the demand, and we have been importing most of those required for the domestic According to the enthusitic trade. According to the enthusiasts of the United States Fish Commission, the American invasion of Europe soon will add sponges to its list of commodities.

Successful experiments have been conducted, and the actual work of planting sponges off the coast of Florida is being done under the supervision of Captain James A. Smith, of the Fishhawk. The sponges used in the propagation are of the sheepshead variety, the most valuable in the world, and which fill every commercial requirement. Dr. H. F. Moore, assistant Commissioner of Fish and Fisheries. devised the method of planting.

The sponges are cut into small pieces from one to two inches in diameter. These small fragments of the living sponge, which are dark in color, the pores filled with fishy matter, are firmly fastened to pleces of coral, rock or terra cotta brick and dropped overboard. Thin aluminum wire is used for fastening them to the objects. The use of the aluminum wire is the solution of the difficulty which confronted the experimenters. The pieces of sponge have one outer skin intact, with the outer edges raw. The latter, however, quickly heal. The aluminum wire will, of course, pierce the sponge and form a small bore, or hole, through them. The wire corrodes; but this is an advantage, for it gradually wears away, leaving the sponge free of any

foreign substance. Most of the difficulties attending the culture have been met in attempting to find something to bind the sponges to the rocks which would last long enough for the growth to attach itself naturally to the new bed. The aluminum wire does this. Wood, string, copper and iron wire and various other substances were attacked by the salt water and animal life and rendered useless.

cayne bay, Anclote Keys and Key West. An effort will be made to put the new industry on its feet so that private capital will become interested in carrying it on. There is every reason to believe that the venture will be successful and that in a short time all the sponges needed in the United States will be raised in Florida wa-

HABITS OF COWBIRD.

It Associates with the Animals in Order to Find Insects.

The cowbird is black and a little smaller than the red-winged blackbird. There are three species, two of whichthe common and red-eyed-migrate to our Northern States and are found associated together. The male of the common cowbird has a head and neck of deep wood-brown, while the redeyed is wholly black and very lustrous. The females are smaller than

Free Medical Advice to Women.

Every young girl who suffers monthly, Every woman who is approaching maternity,

Every woman who feels that life is a burden, Every woman who has tried all other means to regain health without success Every woman who is going through that critical time - the change of life invited to write to Mrs. Pinkham, Lynn, Mass., in regard to her trouble, and the most expert advice telling exactly how to obtain a CURE will be sent absolutely free of cost.

The one thing that qualifies a person to give advice on any subject is experience - experience creates knowledge.

No other person has so wide an experience with female ills nor such a record of success as Mrs. Pinkham has had.

Over a hundred thousand cases come before her each year. Some personally, others by mail. And this has been going on for twenty years, day after day, and day after day.

Twenty years of constant success-think of the knowledge thus gained! Surely women are wise in seeking advice from a woman with such an experience, especially when it is free.

Mrs. Hayes, of Boston, wrote to Mrs. Pinkham when she was in great trouble. Her letter shows the result. There are actually thousands of such letters in Mrs. Pinkham's possession.

"DEAR MRS. PINEHAM: - I have been under doctors' treatment for female troubles for some time, but without any relief. They now tell me I have a fibroid tumor. I cannot sit down without great pain, and the soreness extends up my spine. I have bearing down pains both back and front. My abdomen is swollen, I cannot wear my clothes with any comfort. Womb is dreadfully swollen, and I have had flowing spells for three years. My appetite is not

good. I cannot walk or be on my feet for any length of time.

"The symptoms of Fibroid Tumor, given in your little book, accurately describe my case, so I write to you for advice."—Mrs. E. F. HAYES, 253 Dudley St. (Boston), Roxbury, Mass.

"DEAR MRS. PINKHAM: — I wrote to you describing my symptoms, and asked your advice. You replied, and I followed all your directions carefully for several months, and to-day I am a well woman.

The use of Lydia E. Pinkham's Vegetable Compound, together with your advice, carefully followed, entirely expelled the tumor, and strengthened the whole system. I can walk miles now.

"Your Vegetable Compound is worth five dollars a drop. I advise all women who are afflicted with tumors, or any female trouble, to write you for advice, and give it a faithful trial."—Mrs. E. F. Haves, 252 Dudley St. Mrs. Hayes will gladly answer any and all letters that may be

addressed to her asking about her illness, and how Mrs. Pinkham

An All the Year Round Disease. Rheumatism does not come and go with winter time always; in fact some suffer more during the Spring and Summer than at any other season. When the blood is charged with Uric Acid, Alkali and other irritating poisons, then the system is in the right condition for Rheumatism to develop, and an attack is liable to come at any time, Winter or Summer, Rheumatism, because it attacks different parts of the body, and is sudden or slow in its action, is given

various names such as acute and chronic, muscular, articular, inflammatory, mercurial and sciatic, but it is the same old acid blood that causes all. Some as constant sufferers, while others have only occasional spells of Rheumatism but either kind is wearing upon the constitution, and in time produce

stiffness in the muscles and joints, and sometimes the acids thrown off by the blood settle upon the valves of the Portland, Ind., Jan. 10, 1908. heart and ends suddenly and fatally. It won't do to let Rheumatism

run on. It is a dangerous disease, and you can never tell where it is going to strike. Home remedies, plasters, liniments and such things as produce counter-irritation, are soothing and may relieve the pain temporarily, but the polluted, acid blood cannot be reached by external applications.

Rheumatism must be treated through the blood, and no remedy brings such prompt and lasting relief as S. S. S. It attacks the disease in the blood, neutralizes the acids, and removes all irritating poisons and effete matter from the system.

After being terribly crippled for three years with Rhoumatism, and having tried well known remedies I read of the wonderful effects of S. S., I concluded to try it, and am happy to say that I was entirely cured, and am able to work as well as I over did. I cheerfully recommend S. S. S. to

and will say that if they will con-

tions, they will find a permanent S. S. S. strengthens and enriches the thin acid blood, and, as it circus lates through the body, the corroding, gnawing poisons and acid deposits are dislodged and washed out of the muscles and joints, and the sufferer

is happily relieved from the discomforts and misery of Rheumatism. S. S. S. is a purely vegetable remedy, does not contain any Potash or mineral

safety by old and young.

Rheumatic sufferers who write us
about their case will receive valuable aid and helpful advice from our physicians, for which no charge is made. A WEIRD RELIC.

History of the Skuti Used by Edwin

On a bracket in Edwin Booth's bed room at The Players-the apartment remains as he left it that solemn April day ten years ago-stands a sadly dilapidated skull which the elder Booth, and afterward his son Edwin, used to sollioquize over in the graveyard at Elsinore in the fifth act of "Ham-

In the early forties, while playing an engagement somewhere in the wild West, Junius Brutus Booth did a serice of kindnesses to a particularly undeserving fellow, the name of him unknown to us. The man, as it seemed, was a combination of gambler, horse stealer and highwayman-in brief, a miscellaneous desperado, and precisely the melodramatic sort of person likely to touch the sympathies of the halfmad player. In the course of nature or the law, presumably the law, the adventurer boldly disappeared one day, and in time ceased to exist even as a reminiscence in the florid mind of his sometime benefactor.

As the elder Booth was seated at breakfast one morning in a hotel in Louisville, Kentucky, a negro boy entered the room bearing a small osier basket neatly covered with a snowy napkin. It had the general aspect of a basket of fruit or flowers sent by ers of the district have every reason to some admirer, and as such it figured believe that wealth increases to a for a moment in Mr. Booth's conjectreasonable depth - say 2,500 feet. ture. the dark nature of his burden. Shortly afterward, however, the horse-stealer's residuary legatee, recovering from the first shock of his surprise, fell into the grim humor of the situation and proceeded to carry out to the letter the testator's whimsical request. Thus it was that the skull came to secure an engagement to play the role of poor Yorick in J. B. Booth's company of strolling players, and to continue awhile longer to glimmer behind the footlights in the hands of his famous son .- Century.

AN EXTRAORDINARY FEAT.

Castaway Sailor Overpowers His Companion in Order to Save Him, Clements, who was cast away in a dory only last summer off the Labra- Stickney Gasoline Engine dor Banks. On July 21, when the Fifty dollars can be saved by buying schooner Protector was just beyond the above. Will run cheaper, chopping the straits of Belle Isle, Clements and 15 to 20 bushels per hour, wood saw, George Johnston, another of the crew, drilling machinery, pumps, etc. Write were out in a dory together. The fog for catalogue. REIERSON MACHINERY CO., shut down suddenly and shut them off Foot of Marrison Street, Portland, Oregon. from their ship. They rowed about for hours trying to find her, as there were no other craft in that region, and land was thirty miles away. When night came on they determined to make for the coast before the polar current swept them south. They were without

food and water and the ocean was filled with icebergs. The morning came at last with a men bailing their hardest. As the Box 818, Seattle, Wash. third night approached without sight of land Johnston last heart and chandoned the oars. Clements held on until his mate became delirious and

threatened to jump overboard. Then Clements, being the stronger, overpowered Johnston and tied him up in the bottom of the boat, an operation which, from their struggles, nearly swamped her. After daybreak Clements got out the oars again and at noon reached the shore, landing in a little cove. Here he found a brook that gave Johnston a refreshing draft, besides a meal of fresh roots and berries. This restored the latter and Clements cut him loose. Then they started to coast south, and in the afternoon were picked up by a Newfoundland schooner.-Leslie's Monthly.

OLD FOLKS OF MORMON CHURCH

An Interesting Gathering of Adher-

ents of Brigham Young. A recent dispatch from Salt Lake City tells of a gathering of the old folks of the Mormon Church which could get no relief. And having had just been held at American Fork. Of the old people present forty-one all other makes. were above the age of 90; 158 were over 80 and under 90, and 617 of them were more than 70 and under 80 years old. They had a banquet whereat all sufferers of this terrible disease, they devoured sixty bushels of green peas, 800 chickens, 250 pounds of ham, tinue the treatment, as per directwenty bushels of potatoes, ten bushels of cherries, 100 large cakes, 500 loaves of bread and the "trimmings" appropriate to such a meal. Some of these persons were members of the Mormon organization when Joseph Smith was at its head, and all of them lived under and recognized the leadership of Brigham Young. The aggregate age of the 818 men and women at this gathering was 68,414 years, and of any kind, and can be taken with safety by old and young.

They have 48,780 descendants—a showing safety by old and young.
