

That Tired Feeling

Is a Common Spring Trouble.
It's a sign that the blood is deficient in vitality, just as pimples and other eruptions are signs that the blood is impure.

It's a warning, too, which only the hazardous fail to heed.

Hood's Sarsaparilla and Pills

Remove it, give new life, new courage, strength and animation.

They cleanse the blood and clear the complexion.

Accept no substitute.

"I sit tired all the time and could not sleep. After taking Hood's Sarsaparilla while I could sleep well and the tired feeling had gone. This great medicine has also cured me of eczema." Mrs. C. M. Root, Glenside, Conn.

Hood's Sarsaparilla promises to cure and keeps the promise.

A girl signing herself "Fifine" writes as follows: For fifteen years I have done my duty by my friends. When engagements were announced I got up new and handkerchief showers, decorated for the wedding, and gave more costly presents than I could afford. When their babies came I gave again. I am getting tired of it and ask you to inaugurate a Pay Back shower. I want some of the things: paid back, and a new style of Pay Back parties would compensate me for what I have given."

An Obituary Mixed.

Edward L. Adams, representing the United States as Consul General at Stockholm, Sweden, was for several years editor of the Rochester Democrat and Chronicle. While occupying that position he wrote an obituary notice of a neighbor's child, whose trousers had caught fire during a Fourth of July celebration, burning the little fellow so badly that he died in consequence. Mr. Adams ended his article with the statement that the sympathies of friends would go out to the bereaved parents. His shock next day may possibly be imagined when the types made him say that "the sympathies of a large circle of friends will go out to the burned pants."

For forty years Fiso's Cure for Consumption has cured coughs and colds. At drugists. Price 25 cents.

In Chicago.

Mrs. Porckops—That Mrs. Grainpit is trying to introduce some new-fangled ideas in society.

Porckops—What's the matter with her now?

Mrs. Porckops—Why, she says it's no longer good form to take strangers to see the abductor.—Puck.

Motherly find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

As Others See Us.

Chaperton—Me twined Sapleigh is aw—seemingly ill, doncher know.

Miss Caustique—What's the trouble, Chaperton?—The aw—doctah says he has concussion of the brain.

Miss Caustique—Indeed! Did he accidentally bump his head against a cobweb?

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Props., Toledo, O. We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him.

W. & T. H. WALKER, Wholesale Druggists, Toledo, O. W. & T. H. WALKER, Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price 75c. per bottle. Sold by all Druggists. Testimonials free. Hall's Family Pills are the best.

Age of Deception.

Miss Eldridge—If I had my life to live over again—

Miss Springer (interrupting)—Why, I thought that's what you were doing.

Miss Eldridge—What do you mean?

Miss Springer—Mr. Huggins said you told him you were 23 last month.

RHEUMATISM

AN INDESCRIBABLE TORTURE

Because Rheumatism sometimes comes on suddenly it doesn't prove that it is a chance disease or one due to accidental causes. It takes time for it to develop, and is at work in the system long before any symptoms are felt. The blood is the first point of attack, and the poisonous acids that cause the aches and pains are then distributed through the circulation to different parts of the system, and settle in joints, muscles and nerves; and when the system is in this condition it needs only some exciting cause like exposure to night air, damp, chilly weather, or the cold, bleak winds of winter, to arouse the slumbering poisons and bring on Rheumatism. The severity of the attack depends upon the amount of acid in the blood and the quantity of acid matter in the joints and muscles. Some people are almost helpless from the first, while others have occasional spells or are uncomfortable, restless, nervous and half sick all the time from the nagging aches and pains. Rheumatism is a disagreeable companion even in its mildest form. It grows worse as we grow older, and frequently stiffens the joints, draws the muscles out of shape and breaks down the nervous system. A disease that originates in the blood, as Rheumatism does, cannot be cured with external remedies like liniments and plasters; such things scatter the pains or drive them to some other part of the body, but do not touch the disease or improve the condition of the blood. The thin acid blood must be restored to its normal purity and strength, so that all poisonous substances may be carried out of the system, and no medicine accomplishes this in so short a time as S. S. S., which not only neutralizes the acids and counteracts the poisons, but builds up the general health at the same time.

Write for our special book on Rheumatism, and should you desire any special information or advice, our physicians will furnish it without charge.

Swabian Humor.

Max Nordau was talking recently to an American woman about humor.

"Next to the Americans," said Nordau, with a polite smile, "I think that the Swabians are the most humorous people in the world. A Swabian, if he has nothing funny to say, keeps silent. Stupidity is unknown among this race."

"One night in Swabia, in my early youth, I called on a Swabian maiden. She was very pretty. Perhaps I stayed longer than I should. Suddenly, at any rate, the young girl's mother called in a loud voice from upstairs:

"Gretchen! Gretchen?"

"Yes, mother," Gretchen answered.

"Gretchen, it is very cold here. Will you ask that young man to shut the front door from the outside?"

A Christian Work.

Chicago wealthy men are to rescue from the slums of that city the good people who, by force of circumstances, are compelled to live amid degrading surroundings. Land will be bought for them and farms equipped and the debt will be repaid by installments on easy terms. John Lambert is at the head of the movement. It is intended that the movement will extend to every American city of consequence. It is thought by its workers that 1,000,000 persons will be transferred from the misery, drunkenness and temptations of congested sections to the pure air and invigorating and wholesome life on the farm.

Growing Stock by Electricity.

The possibilities of electricity have never yet been fully demonstrated. Its beneficial effect upon growing plants in the way of hastening development has been proved to an extent, and now the mysterious fluid is being tried on animals at the University of Michigan, at Ann Arbor. It has been demonstrated that rabbits enclosed in a pen about which run a number of electrically-charged wires reach maturity in two-thirds the time taken by those kept under normal conditions. The electrically-treated animals were in all respects healthy and their flesh has been found to be unusually tender. It is thought possible that the same treatment may be applied to beef cattle, making a 2-year-old steer as large as one 3 years old under present conditions, besides producing a superior quality of beef.

Many Hands Make Light Work.

Tourist (in Utah)—Polygamy is no longer practiced, I am told.

Ex-Mormon (dejectedly)—No, and it's a shame. Only one wife!

One wife? Just a trial, that's all.

"How so?"

"Everything is at sixes and sevens. Nothing ever done. Buttons off, meals half cooked—everything wrong. In the old days we had one wife to sew on buttons, another to darn stockings, another to boss the servants, another to do the shopping, and another to attend to the duties of society. A man had some comfort then."

Essence of Orange Leaves.

One of the remarkable industries of Paraguay is the preparation of the essence of orange leaves. More than 150 years ago the Jesuit priests, who then ruled that secluded country, imported orange seeds and planted groves, which have now become immense forests, filled with small establishments for extracting the essence, which is exported to France and the United States for use in soap and perfumery making. It is also employed by the natives in Paraguay as a healing ointment and a hair tonic.

Sweeping Spoils Horses.

A well-known owner of race horses, not at all a sentimental person, recently made an order forbidding his employees to talk in loud tones or to swear in the stable. "I have never yet seen a good mannered horse," he says, "that was being sworn at all the time. It hurts the feelings of a sensitive horse, and I'll keep my word good to discharge any man in my employ if I catch him swearing within the hearing of any horse in this stable."

As Others See Us.

Chaperton—Me twined Sapleigh is aw—seemingly ill, doncher know.

Miss Caustique—What's the trouble, Chaperton?—The aw—doctah says he has concussion of the brain.

Miss Caustique—Indeed! Did he accidentally bump his head against a cobweb?

WHERE BRET HARTE LIVED.

Women Always Liked Him a Lot or Else They Hated Him.

We drove down the mountain in the moonlight, and saw a coyote cub playing with his shadow, and we drank the deep, sweet breath of the pines, and Truthful James told me about Bret Harte.

"He was a slim, little, black-eyed teacher when I knew him," said Truthful James. "He taught over in Copper-town then. They named it Copperopolis when they built it, same as they called it Copper-town. It was a lively place then, was Copper-town. Ten hotels, three banks and two places till you couldn't count 'em all. There was a lot happening in Copper. Harte of the plots of Bret Harte's stories grew up right in that town."

"What kind of a man was Bret Harte himself—in character, I mean?"

"Nice enough, I reckon," said Truthful James. "Not much of a favorite among the boys. Too quiet, and he had a kind of forgetful way of smiling into your face, as if he had forgotten all about you, and didn't care how soon you found it out."

"Women all liked him a lot, or else they hated him. I guess most of them liked him in those days."

"The society upon the Stanislaus?"

"Yes, that was true enough."

"Abner Dean lives over at Angels yet, but you don't want to mention that chunk of sandstone to him."

"It seems to kind of rile him some way."

"Lots of the boys are a little touchy on the Bret Harte subject. He hit a little too near the truth, I guess."

"Now, in my case it is different. I don't mind being handed down to posterity as a bearded ruffian that couldn't spell; they did call me 'Truthful,' you know. I don't know why, but what I don't like is making me out to be a narrow-minded crank with a prejudice against foreigners."

"Now, I have nothing in the world against the Chinese. They are a peaceable, fairly honest and very useful class of citizens, but it is a little rough to make me out sitting down to a social game with a yellow-faced, pig-tailed, grinning Chinaman, as if he were an equal, by George!"—The Reader.

IDEAS IN BOAT BUILDING.

Constructors Find New Methods of Increasing the Speed of Water Craft.

Granville H. Root, of Washington, a boat builder of wide reputation, has recently succeeded in upsetting all rules of steamer construction heretofore accepted as inviolable by the builders of the world generally. Ordinarily it has been the custom to place the propellers aft of the stern, but this iconoclastic inventor proposes to locate them well under the hull, where they will work, according to his calculations, in a body of comparatively dead water. In torpedo boats and similar speedy small craft the propeller shafts have been extended rearward of the stern in an endeavor to attain this same object—namely, to place the propellers in dead or undisturbed water away from the wash and swirl caused by the agitation of the water through which the hull has passed.

The blade propeller is also to be abandoned, being replaced by a spiral blade, which makes at least one complete turn about the shaft, it being assumed that this construction will result in greater efficiency by the avoidance of the pounding, lifting of water and the cavitation inherent in the customary form of propeller. Maximum carrying capacity and speed with minimum engine power is also sought by designing the hull along the familiar scow lines, resulting in a very light draft.

It is asserted that the engine power necessary to obtain a predetermined speed in a boat of given length is directly proportional to the depth of the hull, and, moreover, a light-draft design of hull lends itself readily to the use of multiple propellers, located parallel to its length in a comparatively undisturbed body of water. Finlike keels are provided, which serve the double purpose of supplying and carrying the several propeller shafts and of protecting the latter from injury by striking obstructions or fouling by entanglement with weeds or grasses.

When Father Speaks.

Mr. Williams has always claimed that it is an easy matter to govern children, and his own success often bears out his theories. He seldom interferes when his wife is at the helm, but once in a while he contributes a few firm words of guidance in response to an appealing glance.

"Now, Bobby," said Mrs. Williams one night, after long temporizing, "now, my dear little boy must take his medicine and jump into bed, so father and I can go down to dinner."

"I don't want to take the medicine," said Bobby, who had a snuffing cold.

Then came the appealing glance.

"Bob," said Mr. Williams, in an ominous tone, "if you don't take that medicine this minute you will be put to bed without taking it at all!"

Then Bobby promptly took the medicine, and all went well.

A Graphic Imagination.

Nathan's teacher believed in reducing poetry to diagram and visible outline. Therefore, says the Boston Herald, she told the class to make a rough illustration of the poem, "The Old Oaken Bucket."

Nathan's illustration consisted of a large circle, three buckets and a bunch of dots.

"Nathan," said the teacher, "I don't understand this. What's the circle?"

"That's the well," replied Nathan.

"And why have you three buckets?"

"One is the old oaken bucket, one is the iron-bound bucket, and the other is the moss-covered bucket which hung in the well."

"And what are all those little dots?"

"Those are the loved spots which my infancy knew."

Useful Reverses.

First Student—The professor in his lecture said that reverses were necessary to stimulate a young man.

Second Student—That's true. If I weren't for an occasional check I couldn't do anything at all.—New Orleans Times-Democrat.

When a bride is pretty she is about the prettiest thing on earth.

Ayer's

You know the medicine that makes pure, rich blood—Ayer's Sarsaparilla. Your mother, grandmother, all your folks, used it. They trusted

Sarsaparilla

it. Their doctors trusted it. Your doctor trusts it. Then trust it yourself. There is health and strength in it.

"I suffered terribly from indigestion and this blood found no relief until I took Ayer's Sarsaparilla. Four bottles permanently cured me."

MRS. F. R. HART, Mt. Kisco, N. Y.

J. C. AYER & CO., Lowell, Mass.

for

Rich Blood

Ayer's Pills are gently laxative. They greatly aid the Sarsaparilla.

Aids to Long Life.

Moderation in eating, drinking and physical indulgence.

Pure air out of house and within.

The keeping of every organ of the body, as far as possible, in constant working order.

Regular exercise every day in all weathers; supplemented in many cases by breathing movements, and by walking and climbing stairs.

Going to bed early and rising early, and restricting the hours of sleep to six or seven.

Daily baths or ablutions according to individual conditions, cold or warm, or warm followed by cold.

Regular work and mental occupation.

Cultivation of placidity, cheerfulness, and hopefulness of mind.

Employment of the great power of the mind in controlling passions and nervous fear.

Strengthening the will in carrying out whatever is useful, and in checking the craving for stimulants, anodynes, and other injurious agencies.

An Easy Way to Do It.

Mineral, Idaho, April 11.—Mr. D. S. Colson of this place has something to say which will be of interest to many men.

Mr. Colson claims to have found a simple way to get rid of pains in the back, Sciatica or Rheumatism. He has cured himself and so claims personal experience in proof of his method.

Mr. Colson says:

"I had awful pains in my hip. They got so bad at last that I could hardly walk. I tried several things but got no relief till I began to use Dodd's Kidney Pills and I had taken but a few of these pills till the pain left me entirely."

"Dodd's Kidney Pills certainly did me lots of good and I consider them a great medicine."

The remedy that cured Mr. Colson is the same that has been making such sensational cures of Bright's Disease, Diabetes, Dropsy and Rheumatism all over the country. The name of the medicine is Dodd's Kidney Pills.

Too Hasty.

"Jones has a new addition to his family."

"Indeed? I must congratulate him!"

"Hold on—it's a son-in-law!"—Atlanta Constitution.

Sweet Little Imp.

The other day at a rural railway station a colored mother who was waiting for her child exclaimed, as the youngster was handed to her from the train:

"Lawd bless his honey-sweetness! Ain't he de blackest, sweetest little Satan dat ever you did see?"—Atlanta Constitution.

NOT HARD TO CARVE GLASS.

Diamonds Are Not Needed in Cutting the Brittle Substance.

It often occurs that glass tubes of various dimensions have to be cut where a diamond is not at hand, as in shops and power plants where oil and water gauge tubes must be neatly fitted.

The usual method adopted is to file a small groove around the tube and separate the glass with a sharp rap at the place weakened by the file. The result is not always satisfactory, because the ends often break unevenly owing to the difficulty of making a straight groove with the file. Better results are obtained when only a small incision is made with a file, not all around. While the tube is still warm from the friction of the file the tube is then taken between the thumbs and forefingers, the thumbs opposite the file incision, and the forefingers around the tubing, close, but not covering the incision. Pressure of the thumbs invariably causes the tube to break in as straight and clean a line as though cut with a diamond.

Another method is to use a fine saw blade (the finer toothed the better, for a saw is only another form of file), and this should be kept fed with fine emery, carborundum, or pulverized silica sand or hard grit, moistened with camphor, oil, turpentine or water.

A straight, steady and even stroke should be made, and when the work is carefully done against a gauge the cut will be as true as though it had been ground. Nor is even a toothed blade necessary if a suitably hard and finely gritted abrasive is used and regularly fed between the glass and fine wire, watchspring, or blunt but even blade of an ordinary table knife. The latter will be somewhat slow, of course, but a fine steel wire run at high speed like a band saw, if regularly fed with fine emery or carborundum, will give very satisfactory results, not only for cutting either straight lines or curves in window, but plate or optical glass, in such thickness as makes cutting with a diamond difficult, precarious or impossible.

Window glass, especially single strength, can be accurately split either in straight or curved lines by first making an incision through the enamel of the glass, and then holding a hot iron close to the incision till a fracture is started. The fracture will follow the hot iron with remarkable fidelity. The iron should be preferably round and somewhat blunt and with a bulky head (like an ordinary fire poker), so as to retain its heat well for long cuts, especially for thick sheets, to keep the fracture going when once started, even if two heated irons have to be used.—National Gas Budget.

SIMPLICITY OF THE POPE.

How He Once Prepared Coffee for a Guest with His Own Hands.

One morning early a friend of mine, a Venetian, nobleman, called on him. Mgr. Sarto had said mass and settled down to work. His sister had gone out to mass, or for the household marketing, which they were doing at the Rialto on August 4, 1903, the day of wonders in their simple life.

"Has the count taken coffee?" asked the bishop.

"Well, to tell the truth, no, because the business was urgent, and I have come straight from the railway station," the guest replied.

No excuse availed, and Mgr. Sarto rose and went into the kitchen. So the bishop of dual Mantua and his guest might have been seen there talking and laughing, while monsignor coaxed the charcoal with a black kitchen fan, the coffee flamed in a tin pot on the range, and the count got out cups and saucers, in order to save his distinguished host what mental service he could. Then they had coffee together at the kitchen table.—Century.

Sunday at the Farm.

On Sunday mornings years ago, when but a little lad,

I used to come to salt the
