VACCINATING THE GROUND.

One of the greatest discoveries of modern times is that of inoculating the soil with bacteria which has the faculty of drawing nitrogen from the air and, by storing it in the soil, rendering it available for plant food. It has long been known that nitrogen is one of the chief foods of all plant life and that the absence of this element in worn-out soil accounts for the failure of crops. It has also been known for many years that most exhausted soils, if permitted to rest for a few years would regain their fertility. It, however, remained for modern science to discover that the secret of worn-out soil becoming enriched through rest was due to the above mentioned soil bacteria. The rudiment of the discovery was made several years ago by the noted German professor, Nobbe, but it remained for Dr. Geo. T. Moore, in charge of the Laboratory of Plant Physiology, of the United States Department of Agriculture, to work out the details of the discovery and to give to the world what has already been proved beyond a doubt to be the greatest boon to the farmer, and through him to all mankind, of any discovery of ancient or modern science.

The Department of Agriculture has given the discovery the most thorough tests in every section of the country and they now assert unqualifiedly that the inoculation of the soil with this bacteria will increase the yield of any crop from 100 to 1000 per cent. This undoubtedly means a great deal to the farming industry because it simply means enormously increased profits to the up-to-date farmer at practically no additional expense. The Department of Agriculture is extensively engaged in propagating this bacteria and upon application being made by any farmer in the United States to the secretary of Agriculture he will be furnished free a package of the bacteria in the form of a yeast cake with full instructions as to how to proceed in cultivating and multiplying the little germs and in applying the solution to the soil. The small sample package of germs which will be sent to the farmers for experimental purposes are said to be sufficient to inoculate one acre of ground.

Raymond Porter in an interesting article in Pearson's magazine for April, on this subject cites a number of specific instances, presumably gathered from reports to the department showing the phenomenal increase in yield of crops on inoculated land. In one instance a field of poor ground was divided into halves and one of the halves was inoculated. It yielded 2000 pounds of clover to the acre while the half that was not treated yielded 200 pounds. A similar experiment with vetch showed a yield of 4501 pounds on the portion treated and 581 pounds on that portion which was not inoculated. A field without inoculation, yielded 372 pounds of crimson clover to the acre while an adjacent field of similar soil after being treated with the bacteria solution produced 6292 pounds of the same crop per acre. Gilliam county farmers should investigate this matter and secure some sample packages of the bacteria at once in order to give it a trial on at least a small portion of

this season's crop. If it increases the yield 100 per cent, it means money in the bank to every farmer in the county and we have the word of the department officials that it will do even more than this. Write to the secretary of Agriculture for sample package and instructions.

BE A BRICK.

Every property owner, business man or worker in Condon should be doing something these bright Spring days to help push the town along. The railroad will be here in a few weeks and the town should double in population within the next year. It is an easy matter to say a good word for your town to every person you meet and converse with for five minutes, but unfortunately it also seems easy for some people to say a bad word in the same length of time if an opportunity is offered to "knock" some fellow townsman whom they do not happen to like. This is poor policy and if persisted in the "knocker" is sure to find out eventually his "knock" will act as a boomerang and rebound against his own head. Every time a man "knocks" a neighbor's business he injures his town and to a certain degree his own business. Don't knock! Push. Don't be a pessimist. Be optimistic and cheerful. Don't sneer and ridicule the efforts of other people who try to push the town and your business along, it don't pay. Don't be a clam. Swear to yourself and to every one you meet that Condon is the best town on earth and stand pat. Be a brick.

Ajax Notes

Geo. Crum, F. M. Burnison and Chas. E. Hicks visited Condon last week.

The weather has been very pleasant lately. We have had no frosts for some time.

There will be fully 2000 acres of new land plowed in this neighborhood this Spring.

Jas Quirk, a recent arrival from New Zealand, has completed a residence on his homestead.

Miss York, of Everett, Washington, is visiting her brother A. J. York and expects to remain all Summer.

The school meeting last Saturday was well attended. Walter Smith and Geo. Crum were elected directors and L. L. Turney clerk.

Last Hope Vanished.

When leading physicians said that W. M. Smithart, of Pekin, Ia., had incurable consumption, his last hope vanished; but Dr. King's New Discovery for Consumption, Coughs and Colds, kept him out of his grave. He says: "This great specific completely cured me, and saved my life. Since then, I have used it for over 10 years, and consider it a marvelous throat and lung cure." Strictly scientific cure for Coughs, Sore Throats or Colds; sure preventive for Pneumonia. Guaranteed, 50c and \$1.00 bottles at all druggists. Trial bottle free.

Jim Kizer, who was assisting with the survey on the Condon Lumber Co's. flume on Thirtymile, fell while at work last Thursday morning and dislocated his shoulder. He was brought to town and the dislocation was reduced by Dr. Wood the same evening.

Cheated Death.

Kidney trouble often ends fatally, but by choosing the right medicine, E. H. Wolfe, of Bear Grove, Iowa, cheated death. He says: "Two years ago I had Kidney Trouble, which caused me great pain, suffering and anxiety, but I took Electric Bitters, which effected a complete cure. I have also found them of great benefit in general debility and nerve trouble, and keep them constantly on hand, since, as I find they have no equal." All druggists, guarantees them at 50c.

George Gibbons and Charlie Lillie, of Mayville precinct, shipped two cars of fat hogs to Troutdale the first of the week.

Frightful Suffering Relieved.

Suffering frightfully from the virulent poisons of undigested food, C. G. Grayson, of Lula, Miss., took Dr. King's New Life Pills, "with the result," he writes, "that I was cured. All stomach and bowel disorders give way to their tonic, laxative properties. 25c at all druggists, guaranteed.

About Rheumatism.

There are few diseases that inflict more torture than rheumatism and there is probably no disease for which such a varied and useless lot of remedies have been suggested. To say that it can be cured is, therefore, a bold statement to make, but Chamberlain's Pain Balm, which enjoys an extensive sale, has met with great success in the treatment of this disease. One application of Pain Balm will relieve the pain, and hundreds of sufferers have testified to permanent cures by its use. Why suffer when Pain Balm affords such quick relief and costs but a trifle? For sale by Condon Drug Co.

SPOKANUS

(No. 1127 Vol. 12.)

Will make the season of 1905 at the Dysart Barn in Condon, Oregon, commencing March 20, 1905, ending July 20, 1905.

DESCRIPTION AND PEDIGREE.

Spokanus is a beautiful Bay in color and was foaled in 1888. Sired by Old Tower, 3042; he by The Malster, 1846; out of Mary Edith 1473, by Druid, 1120. Grand Dam of Old Tower was Nell of Gillespie by Viceroy, 1837. Great Grand Dam was Maggie of Gillespie, by Sir Colin, 1299. Druid was sired by Old Farmer, 286, he by Merry Tom. The Dam of Spokanus was Moss Queen, by Manfred, 1738. Grand Dam was Fanny, 3545, by Prince of Kelvin, 656. Great Grand Dam was Young Jean, 1031, by Young Victor, 1039. Great Grand Dam Jean by Wellington, 1848. Prince of Kelvin was sired by the Old Prince of Wales, 673, by the General and he by Sir Walter Scott. Young Victor was sired by Old Victor, 892. From the above pedigree it will be seen that Spokanus is descended from the most illustrious sire of the Clydesdale breed, and he has proven himself to be an excellent breeder and a very swell foal getter.

TERMS:

Single service, \$10; payable at time of service. Season, \$18, payable at end of season. Insurance for mare to be with foal, \$25. Payable when mare is known to be with foal. All service fees become due immediately if mare is taken from Gilliam county. CONDON CLYDESDALE HORSE ASS'N., Owner. W. O. MILLER, Keeper.
