FATALLY BURNED

Hubert Scott Edwards, the fourteen-months-old son of Mr. and Mrs. Bert Edwards of Mayville was fatally burned last Saturday afternoon in the cookhouse of Mr. Edwards' threshing machine. Mr. Edwards had been working short handed and his wife had been cooking for the crew. About five o'clock Saturday afternoon she took the baby and went out to ride in the header box with Mr. Edwards and after going a round or two the baby fell asleep and she then took it to the cookhouse and laid it in the opposite end from the stove. Then, as it was almost supper time, she started a fire and went out to the threshing machine which was only a short distance from the cookhouse. It seems that the heading crew, although it was further away from the cookhouse than the threshing machine, was the first to discover the fire and immediately called attention to it but by the time Mrs. Edwards got to the house the bedding with which she had covered the baby and the clothes which were on him were completely burned. A doctor was immediately summoned from Fossil, seven miles away, but could do nothing except to alleviate the pain of the little sufferer and he passed away at nine o'clock Saturday evening. It is not known exactly what started the fire but, as the cookhouse was not damaged at all, it is supposed that it was caused by a spark from the stove which alighted upon the bedding and ignited it. The funeral was held Sunday afternoon and was attended by a few from Condon. Elder J. H. Amend conducted the services. This is a sad death and a hard blow to Mr. and Mrs. Edwards and we join with their many friends in extending our heartfelt sympathy to them in their bereavement.

Frank Morrison who was formerly the telegraph operator at this place came up last week to visit for a few days with friends.

Horsemen, Attention.

One of the most important branches of Veterinary Science is Veterinary Dentistry, and this department in this country has been neglected owing to the scarcity of Veterinarians. The horse, after he has reached the age of five years, has a complete new set of teeth, and as he grows older and the teeth wear, they cause numerous diseases and disagreeable habits, heretofore ascribed as constitutional trouble, which have been traced to the teeth; such as blindness, drooling, stopping short, starting suddenly, frothing, loss of flesh, weak eyes, driving and pulling on one rein.

Rough edges and sharp corners of the teeth lacerate the mouth and produce nervousness and irritability; uneven and elongated molars and incisors prevent the proper mastication of the food, producing indigestion and general debility. Decayed molars cause necrosis of the bone, abscesses, nasal gleet, fistula, of the jaw, etc.

Condon, Oregon.

AJAX

Will Adlard & Bros. are heading for Ed Palmer.

Hines & Brandon have part of their barley cut and it is going 45 bushels per acre. They are having their grain hauled to Condon as fast as they can get teams. Their wheat tested 61 pounds.

Cooney Bros. on the C. S. Palmer ranch will buy a threshing machine.

Shelt Burres is running a meat wagon here.

Messrs. Stanley, Fagan and Brown have purchased another header and gone to work again.

"Mickey" Tierney and Jas. Brehaut returned Sunday evening from Long Beach. They report a good time.

Elmer Stevens was on the sick list the first of the week but is now able to be at work again.

Your Child's Eyesight

How sad it is to see a child with cross-eye or squint. Yet, parents, you ought to know that in 8 out of 10 cases of cross-eye the defect is caused by an error of refraction, the proper correction of which in nearly every case will straighten the eyes. You have tried glasses and it didn't work? Well, notice we said "the proper correction." But it will not be an easy matter if not attended to early.
