CUPID DOES GOOD WORK

Prominent Condon Young People Are United for Life During Past Week.

WILL MAKE GONDON THEIR HOME

Quiet Home Weddings—Ceremonies Beautiful and Impressive.

Parman-Riggs

At an early hour Thursday morning, Oct. 3rd, the marriage of Miss Maude Riggs to Mr. Lloyd Parman was solemnized at the home of the bride's parents in this city. The bride is the only daughter of Rev. and Mrs. G. W. Riggs. She has been a resident of Condon for the past two years and since coming here has made many friends. The groom is one of Gilliam county's prominent and respected young men, having lived in this vicinity nearly all of his life and is deservedly popular among his many friends. The impressive marriage service was read by Rev. G. W. Riggs, father of the bride, in the presence of only the near relatives of the contracting parties. After the wedding luncheon the newly wedded couple took the morning train for Portland where they will visit for sometime. After their return they will make their home near this city and will be "At home" to their friends after Nov. 1st.

The many friends of both Mr. and Mrs. Parman unite in best wishes for their future happiness and prosperity. They were the recipients of many costly presents from their relatives and friends, among which was a beautiful piano.

Purvine-Bowerman

Miss Mary Bowerman was married to S. Ellis Purvine in Salem, Sunday, Sept. 29, at the home of her mother, Mrs. Lydia H. Bowerman. Both young people are well known to Gilliam county people, the bride having practised her chosen profession, medicine, in Condon for several years until a few months ago. The groom is in business in Condon and is highly respected.

The young couple will make their home in Mann's Addition, Condon, about the 10th, when they will return from a short honeymoon.

A GREAT WHEAT CENTER. Condon Warehouses Crowded with Grain—More Coming in Every Day.

All roads lead to Condon. And all of these roads are lined with two, four, six and eight-horse teams loaded with the wheat and barley which has been harvested in the great country tributary to Condon. On Tuesday morning there were sixteen heavily loaded teams in line at the warehouses waiting to be unloaded and in whatever direction a person wishes to look they can see large teams enroute to the warehouses.

It was reported to a representative of the GLOBE that one firm received 5000 sacks on Monday last. And when one stops to consider that there are three or four firms buying grain and all getting their share they must be willing to concede that Gilliam county as a great wheat country cannot be excelled.

J. K. Fitzwater left Tuesday morning for a few days visit in Portland.

A GOOD IMPROVEMENT

Old Landmark Around which County Seat Sprung Up To Be Modernized.

The old platform around the famous spring at South Main street will be torn down and the spring covered over, thus rendering the street more passable to the large amount of travel on that road. The city has had a large watering trough made by Jamieson & Marshall and this is to be placed just below the Palmer building at lower Main street and fed from a pipe running down from the spring. The trough is a large one, 17 feet six inches in length, and of heavy galvanized iron and was made to last.

The improvement is a good one and will be a boon to the city besides providing an excellent watering place for the large number of horses now on the road to Condon daily hauling wheat as well as a good camping place for those hauling at a great distance. This change will do away with the old landmark around which the county seat started its growth, and although a few of the pioneer residents of the county may miss the old familiar sight when they come to town, they will no doubt be impressed with modern change and improvement.

The present outlook for a fuel shortage in Condon during the coming winter is rather serious. The local dealers however are doing their best to supply the people. Prices are very high, pine wood selling from \$10 to \$12 per cord and coal about \$12.

It was reported this week that a row occurred among a threshing crew that has been working near Spray and several were severely beaten. We have been unable to get any further particulars.

A son was born to Mr. and Mrs. I. C. Orwick on Monday, Sept. 30.

NEWS FROM OUR SCHOOLS

Registration now 160 — Many New Pupils Are Added Each Day.

LACK OF BOOKS DELAYS WORK

Condon High School Pupils to Be Admitted at U. of O. without Special Exams.

The total registration of pupils at present is 160 with new ones being added each day.

Owing to the fact that we have been unable to secure text books we have met with many difficulties, but at the present time work in all the departments is progressing and the teachers are demonstrating the fact that the text book is not necessarily the source of all knowledge.

As there is a misunderstanding with reference to the standing of this school and the credits given to a graduate from here, should he go to a higher institute of learning, the following statement bearing on the question is made: Graduates from the Condon High School will be admitted, without examination, to the freshman class of the University of Oregon as is shown on page 39 of their catalogue for 1907-8 which states: "Schools, that have a four years' course with nine months a year, and subjects running for a half year or more, five times per week, with recitations forty minutes long and which have the subjects of the state high school course, will have their students admitted to the freshman class in the University."

We have based our course in accordance with the foregoing, and in consequence of same, our students will be admitted in higher institutes of learning as

readily as students from any school in Oregon; as will be shown from the list of "Units" they receive here. It requires 15 units to enter the university, divided as follows: English composition and English classics, 4 units; Algebra, 1; geometry, 1; Greek, Roman and Mediaeval history, 2; Physical geography, 1; botany, 1; latin, 2; modern history, 1; zoology, 1; book keeping, 1; physics, 1; political economy, 1; a total of 16 1/2 units or 1 1/2 units more than is necessary for entrance. All of the above subjects will be found in our four years course of study and it is not necessary to make other statements with reference to the standing of the school as you can readily see that it is above the average.

Under the existing conditions we are unable to offer but one course and all the pupils entering are expected to take specified studies including latin.

Parents are requested and expected to investigate the work done.

Gives the Best of Satisfaction

Why use poor Teas and Coffees when the best costs no more?

Best Groceries. Best Prices. Good Satisfaction or Money refunded. Call and see us.

GLOBE OFFICE READY FOR ALL WORK

New Diamond Cylinder Press Installed in Globe Office Does Beautiful Work—Appreciated by Advertisers.

This issue of the GLOBE is the first of the enlarged size to be hereafter given to its readers. The management has spared neither expense nor efforts in selecting the press, shown by the above cut, and much other printer's material, in order to meet the demand of the office work—that is the large amount of advertising and news matter which comes in weekly into this office. The Diamond Cylinder press is a very handsome machine with power attachment and all the latest improvements that have been made during the past few years. It is built to meet the demands of country newspapers and is considered one of the best presses made for large job work.

The GLOBE now appears in its new attire as a six-column six-page paper, full of good sound reading and advertising matter. Our subscribers will be pleased to see that our efforts are turned in the right direction; we expect to give them all the news and thus keep the lead in the newspaper field of this county. Our advertisers are daily telling us of the value of the GLOBE as an advertising medium and "business getter", and they bring us their job work on account of unexcelled equipment, quality of workmanship and promptness.
