THE FIGHT FOR FAME. Man's Heroic Effort to Clutch the Priceless Jewel. His way was in a bloody lane where clanking calissons splashed along, his goal the line where blazing guns laughed out their song of death. On, on, on he went. His ears were filled with sounds of quick commands, bugle blasts, discordant drums. No fluttering fear was in his heart, no thought of home, no specter of the dread despair that waited at the hearth if he never came again. To him there was no terror in the saber's flashing blade, no warning in the bullet's deadly hiss. Youth trod all reason underfoot; ambition saw all glory overhead. On, on he went to woo and win his bride, the priceless jewel—fame!

Another in a garret sighed for fame. Crusts were his portion and his raiment only rags. Hermit-like he tolled alone, nor cold nor hunger ever daunted him. He marshaled all his hosts, and visions came and went. On, on he tolled. In the snowflakes that drifted in and touched his hands he read a message from the world without, all white, all cheerless. Still as a chrysalis his fancy wove and spun and made its garments wondrous, then burst in splendor on a waiting world. Both fought the fight, each in his way, one for a heroic shape of bronze, one for a speechless marble face, each for the epitaph, that all the ages in the dust of time might know "he did and died."—Wade Mountfort in Era Magazine.

YOUR UMBRELLA. A Simple and Effective Method of Marking It. Name plates on the handle seldom assist in the recovery of even borrowed, to say nothing of lost, umbrellas. But there is a way by which you may so mark your umbrellas that the finders and borrowers thereof will be reminded of your name and address every time they stealthily salify forth with your umbrella over their heads. Make a paste of cornstarch with water; brush over the inner surface of the umbrella where you wish to have your initials or your name in full, either with or without your street address. When this paste is dry paint your name on the cornstarch, using pure white lead. Let the paint dry thoroughly; rub a stiffish brush over the whitened surface until the cornstarch is removed. You will thereupon find the white letters of your name standing forth immaculately against the black background of your umbrella cover. The cornstarch paste is applied to keep the oils of the paint from penetrating the umbrella cover and showing on the outer side. As it is, no unsightly grease spots come through. Your name is fixed and if painted near the tip it will be unobtrusive to you, though a constant reminder to the borrower or finder.—Scientific American.

# An Error in Geography.

On one occasion the British lost a point in their war with Russia by reason of an error in their geography. This was when Commodore Elliot had succeeded in blockading the Russian fleet in the gulf of Saghalin, on the east coast of Siberia. The Russians were in a cul-de-sac, and the British ships waited contentedly for such time as the enemy should venture to put to sea. But they waited in vain, and at last an investigation was made. It was found that the Russian fleet had vanished. While the British commodore waited at the south end of the gulf, the Russian ships slipped away through the shallows at the north end into the sea of Okhotsk. Until this discovery was made the British government had believed Saghalin to be a peninsula. Now, too late, they learned that it was an island, with a very narrow channel at the north end of the gulf running into the sea of Okhotsk.—New York Tribune.
