Government Decides to Discontinue Furnishing Printed Envelopes at the Bare Cost of Production—Means Much to Printers.

Master General Hitchcock announced that hereafter government will discontinue printing of stamped envelopes and recommends that the same be done by the local newspapers in every town where there is a newspaper, and by special permit for the towns where there is no newspaper.

The newspaper where a town has no newspaper of its own. No large town will be allowed to have a monopoly on the printing of the envelopes to the detriment of the smaller newspapers.

A uniform scale of printing will be prepared by the post office department and insisted upon. The department has decided that the newspaper will not be allowed to sell stamped envelopes for printing. The scale of printing will be such that a reasonable profit can be made by the office printing them. The department will also make a ruling that no newspaper at class mail will be allowed to transmit through the mails until it has a return card written or printed thereon. The above means that the envelope printing business will take on a boom soon, which is sure to continue.

The order relating to the printing of envelopes is a correction of an old evil of long standing and against which the newspapers throughout the country have fought many years, for the reason that the price charged for the envelopes was far less than the stock could be purchased by printers and the rate charged was such that a profit on the printing could not be made by the government. Hundreds of millions of stamped envelopes printed by the government are used annually throughout the country and the contemplated change will be greeted with pleasure by every printer and publisher who has felt the loss of this class of business.
