A stock company is being organized at Montague for the purpose of drilling for artesian water. The stockholders of the company are the farmers of the Montague and Eightmile neighborhoods. A drilling machine, with which it is possible to go down 1800 feet has been secured and it is probable that T. Womeldorf of this city will be engaged to handle the machine. There are several artesian wells at Castle Rock, almost directly across the river from the Montague country, also one on Butter Creek, and the residents of Montague confidently expect to strike artesian at less than the depth of 1000 feet. Operations will start on the Asher Montague place and several other wells will be sunk. The primary object of securing artesian water is for irrigation purposes. Although the soil in that section of the county is of the best, the late dry years have discouraged the farmers, especially the homesteaders and new settlers, but it is hoped that with the advent of artesian water the land may be made highly productive regardless of dry seasons.

Rents Big Sheep Ranch

The Gordon Shown sheep ranch on Shoo-Fly has been rented by Ed. McDaniels of Grants Pass, the deal having been made by the Investment Society. Mr. McDaniels also took an option to buy within a year and has put up \$500 as forfeit on the option. He also rents with the place about 1500 head of sheep together with other live stock. The Shown ranch with outlying range consists of about 10,000 acres, 50 in alfalfa, about 250 more being tillable and the balance is range land. It is a first class sheep ranch.

An Unusual Proposition

A 320 acre farm, team of mules, harness and wagon and bank account of \$50 to be given away. If you will pay the market price for the live stock now on the ranch and a valuation for the improvements, will make you a deed to the place. Call on or address, THE INVESTMENT SOCIETY OF OREGON, Mayville, Oregon.
