Paving of Five Blocks of Main St. Starts in April, Morris Chosen Engineer

A special meeting of the council was called Friday night by Mayor Burns and all councilmen attended. J. W. Morris, a civil engineer of Portland, was also present and explained the various kinds of pavement to the council. He makes a specialty of engineering public improvements and is at present city engineer for Heppner, Forest Grove, Silverton and many other towns in this state and Washington. Mr. Morris was retained by the council as city engineer for Condon to superintend the surveying of the streets and all street improvements.

The council has definitely decided to pave five blocks on Main street. The ordinance is being drawn and as soon as the necessary survey is made, which will probably be in a month or six weeks, the council will issue a call for bids on the paving. A new sewer will probably be laid and it has been decided to change the width of the walks on Main street from eight to twelve feet. It is probable that the Rockolite pavement will be used. The council hopes to get the work started some time in April.
