

OVER THE TOP

By Arthur Guy Empey, an American soldier
From page 4

Then the professor would take another handful of mud and fill the tin, after which he would punch a hole in the lid of the tin and put it over the top of the bomb, the fuse sticking out. Then perhaps he would tightly wrap wire around the outside of the tin, and the bomb was ready to send over to Fritz with Tommy's compliments.

A piece of wood about four inches wide had been issued. This was to be strapped on the left forearm by means of two leather straps and was like the side of a match box; it was called a "striker." There was a tip like the head of a match on the fuse of the bomb. To ignite the fuse, you had to rub it on the "striker," just the same as striking a match. The fuse was timed to five seconds or longer. Some of the fuses issued in those days would burn down in a second or two, while others would "size" for a week before exploding. Back in Blighty the munition workers weren't quite up to snuff, the way they are now. If the fuse took a notion to burn too quickly they gen-

erally buried the bomb maker next day. So making bombs could not be called a "cushy" or safe job.

After making several bombs the professor instructs the platoon in throwing them. He takes a "jam tin" from the fire step, trembling a little, because it is nervous work, especially when new at it, lights the fuse on his striker. The fuse begins to "size" and sputter and a spiral of smoke, like that from a smoldering rag, rises from it. The platoon splits in two and ducks around the traverse nearest to them. They don't like the looks and sound of the burning fuse. When that fuse begins to smoke and "size" you want to say good-by to it as soon as possible, so Tommy with all his might chucks it over the top and crouches against the parapet, waiting for the explosion.

Lots of times in bombing the "jam tin" would be picked up by the Germans, before it exploded, and thrown back at Tommy with dire results.

After a lot of men went West in this manner an order was issued, reading something like this:

"To all ranks in the British army: After igniting the fuse and before

throwing the jam-tin bomb, count slowly one! two! three!"

This in order to give the fuse time enough to burn down, so that the bomb would explode before the Germans could throw it back.

Tommy read the order—he reads them all, but after he ignited the fuse and it began to smoke—orders were forgotten, and away she went in record time and back she came to the further discomfort of the thrower.

Then another order was issued to count, "one hundred! two hundred! three hundred!" But Tommy didn't care if the order read to count up to a thousand by quarters, he was going to get rid of that "jam tin," because from experience he had learned not to trust it.

When the powers that be realized that they could not change Tommy they decided to change the type of bomb and did so—substituting the "hair brush," the "cricket ball," and later the Mills bomb.

The standard bomb used in the British army is the "Mills." It is about the shape and size of a large lemon. Although not actually a lemon, Fritz insists that it is; perhaps he judges it by the havoc caused by its explosion. The Mills bomb is made of steel, the outside of which is corrugated into 48 small squares, which, upon the explosion of the bomb, scatter in a wide area, wounding or killing any Fritz who is unfortunate enough to be hit by one of the flying fragments.

Although a very destructive and efficient bomb the "Mills" has the confidence of the thrower, in that he knows it will not explode until released from his grip.

It is a mechanical device, with a lever, fitted into a slot at the top, which extends half way around the circumference and is held in place at the bottom by a fixing pin. In this pin there is a small metal ring, for the purpose of extracting the pin when ready to throw.

You do not throw a bomb the way a baseball is thrown, because, when in a narrow trench, your hand is liable to strike against the parapet, traverse or parapet, and then down goes the bomb, and, in a couple of seconds or so, up goes Tommy.

In throwing, the bomb and lever are grasped in the right hand, the left foot is advanced, knee stiff, about one and a half its length to the front, while the right leg, knee bent, is carried slightly to the right. The left arm is extended at an angle of 45 degrees, pointing in the direction the bomb is to be thrown. This position is similar to that of shot putting, only that the right arm is extended downward. Then you hurl the bomb from you with an overhead bowling motion, the same as in cricket, throwing it fairly high in the air, this in order to give the fuse a chance to burn down so that when the bomb lands, it immediately explodes and gives the Germans no time to scamper out of its range or to return it.

As the bomb leaves your hand, the lever, by means of a spring, is projected into the air and falls harmlessly to the ground a few feet in front of the bomber.

When the lever flies off it releases a strong spring, which forces the firing pin into a percussion cap. This ignites the fuse, which burns down and sets off the detonator, charged with fulminate of mercury, which explodes the main charge of ammonal.

The average British soldier is not an expert at throwing; it is a new game to him, therefore the Canadians and Americans, who have played baseball from the kindergarten up, take naturally to bomb throwing and excel in this act. A six-foot English bomber will stand in awe and silence when he sees a little five-foot-nothing Canadian outdistance his throw by several yards. I have read a few war stories of bombing, where baseball pitchers curved their bombs when throwing them, but a pitcher who can do this would make "Christy" Mathewson look like a piker, and is losing valuable time playing in the European War bush league, when he would be able to set the "big league" on fire.

We had a cushy time while at this school. In fact, to us it was a regular vacation, and we were very sorry when one morning the adjutant ordered us to report at headquarters for transportation and rations to return to our units up the line.

Arriving at our section, the boys once again tendered us the glad mitt, but looked askance at us out of the corners of their eyes. They could not conceive, as they expressed it, how a man could be such a blinking idiot as to join the Suicide club. I was beginning to feel sorry that I had become a member of said club, and my life to me appeared doubly precious.

Now that I was a sure-enough bomber I was praying for peace and hoping that my services as such would not be required.

CHAPTER XIII.

My First Official Bath.
Right behind our rest billet was a large creek about ten feet deep and twenty feet across, and it was a habit of the company to avail themselves of an opportunity to take a swim and at the same time thoroughly wash themselves and their underwear when on their own. We were having a spell of hot weather, and these baths to us were a luxury. The Tommies would splash around in the water and then come out and sit in the sun and have what they termed a "shirt hunt." At first we tried to drown the "cooties," but they also seemed to enjoy the bath. One Sunday morning the whole section was in the creek and we were having a gay time, when the sergeant major appeared on the scene. He came to the edge of the creek and ordered: "Come out of it. Get your equipment

on, 'drill order,' and fall in for bath parade. Look lively, my hearties. You have only got fifteen minutes." A howl of indignation from the creek greeted this order, but, gut we came. Discipline is discipline. We lined up in front of our billet with rifles and bayonets (why you need rifles and bayonets to take a bath gets me), a full quota of ammunition, and our tin hats. Each man had a piece of soap and a towel. After an eight-kilo march along a dusty road, with an occasional shell whistling overhead, we arrived at a little squat frame building upon the bank of a creek. Nailed over the door of this building was a large sign which read "Divisional Baths." In a wooden shed in the rear we could hear a wheezy old engine pumping water.

We lined up in front of the baths, soaked with perspiration, and piled our rifles into stacks. A sergeant of the R. A. M. C. with a yellow band around his left arm on which was "S. P." (sanitary police) in black letters, took charge, ordering us to take off our equipment, unroll our puttees and unlace boots. Then, starting from the right of the line, he divided us into squads of fifteen. I happened to be in the first squad.

We entered a small room, where we were given five minutes to undress, then filed into the bathroom. In here

A Bathroom at the Front.

there were fifteen tubs (barrels sawed in two) half full of water. Each tub contained a piece of laundry soap. The sergeant informed us that we had just twelve minutes in which to take our baths. Soaping ourselves all over, we took turns in rubbing each other's backs, then by means of a garden hose, washed the soap off. The water was ice cold, but felt fine.

Pretty soon a bell rang and the water was turned off. Some of the slower ones were covered with soap, but this made no difference to the sergeant, who chased us into another room, where we lined up in front of a little window, resembling the box office in a theater, and received clean underwear and towels. From here we went into the room where we had first undressed. Ten minutes were allowed in which to get into our "clabber."

My pair of drawers came up to my chin and the shirt barely reached my diaphragm, but they were clean—no strangers on them, so I was satisfied.

At the expiration of the time allotted we were turned out and finished our dressing on the grass.

When all of the company had bathed it was a case of march back to billets. That march was the most uncomical one I imagined, just cussing and blinding all the way. We were covered with white dust and felt greasy from sweat. The woolen underwear issued was itching like the mischief.

After eating our dinner of stew, which had been kept for us—it was now four o'clock—we went into the creek and had another bath.

If "Holy Joe" could have heard our remarks about the divisional baths and army red tape he would have fainted at our wickedness. But Tommy is only human after all.

I just mentioned "Holy Joe" or the chaplain in an irreverent sort of way, but no offense was meant, as there were some very brave men among them.

There are so many instances of heroic deeds performed under fire in rescuing the wounded that it would take several books to chronicle them, but I have to mention one instance performed by a chaplain, Captain Hall by name, in the brigade on our left, because it particularly appealed to me.

A chaplain is not a fighting man; he is recognized as a noncombatant and carries no arms. In a charge or trench raid the soldier gets a feeling of confidence from contact with his rifle, revolver, or bomb he is carrying. He has something to protect himself with, something with which he can inflict harm on the enemy—in other words, he is able to get his own back.

But the chaplain is empty-handed, and is at the mercy of the enemy if he encounters them, so it is doubly brave for him to go over the top, under fire, and bring in wounded. Also a chaplain is not required by the king's regulations to go over in a charge, but this one did, made three trips under

"Actions speak louder than words - Act - Don't Talk - Buy Now"

He Needs Somebody to Send Him another pouch of Real GRAVELLY Chewing Plug

Uncle Sam's Boys don't ask for much in the way of comforts—but good tobacco they must have. A few cents spent for Real Gravelly will buy more tobacco satisfaction than many times the money in ordinary plug.

Give any man a chew of Real Gravelly Plug, and he will tell you that's the kind to send. Send the best! Ordinary plug is false economy. It costs less per week to chew Real Gravelly, because a small chew of it lasts a long while.

If you smoke a pipe, slice Gravelly with your knife and add a little to your smoking tobacco. It will give flavor—improve your smoke.

SEND YOUR FRIEND IN THE U. S. SERVICE A POUCH OF GRAVELLY

Dealers all around here carry it in 10c. pouches. A 3c. stamp will put it into his hands in any Training Camp or Support of the U. S. A. Even "over there" a 3c. stamp will take it to him. Your dealer will supply envelope and give you official directions how to address it.
