**TRACTOR IS SOLVING
BIG FARM PROBLEM**

United Press

Washington, May 28.—The American farmer is carrying on, though his sons and his horses have gone to the war by regiments and by droves.

One hundred thousand tractors are chugchugging away in the fields, early and late, doing the work of at least 200,000 farm hands and 800,000 horses.

The former has pinned his faith to the tractor, and if he can win over the submarine with it this year, neither the I. W. W. nor the Malthusian law ever again can worry the food producer. The tractor is solving the American food production problem, the back-to-the-land problem, and many other things that used to give the good American gray hairs.

Last summer not more than 40,000 tractors were in use on American farms, and the gasoline plow horse was looked upon as an experiment. Now twelve factories are running night and day to supply the demand for tractors, and the railroad administration is rushing thousands of tractors to the fields. More than 200,000 of these gasoline laborers will be in use by the end of this year, officials of the department of agriculture estimate.

Pat Farley and family were up from Willows Saturday.

Father O'Rourke was over from Heppner Friday and Saturday to attend the commencement exercises of St. Thomas Academy.

C. W. Harris and family were Arlington visitors Sunday.

Mrs. Dave Cottmire and two daughters came up from Portland Saturday to attend the races.

**"For the freedom
of the world"**

**Tomorrow Night
WEDNESDAY, MAY 29**

"For the Freedom of the World" is a film story so interest-compelling that it does not require the services of a star. It is a tremendous war drama, showing the career of a soldier from the training camp to the first line trenches.

**Don't miss this show
25 and 50 cents**

The Liberty Theatre
