

CLOVERDALE COURIER.

VOL. 5.

CLOVERDALE, TILLAMOOK COUNTY, OREGON, NOV. 26, 1909.

NO. 18

LET ALL BE THANKFUL

THE OFFICERS AND DIRECTORS OF THE

First National Bank of Tillamook

are thankful that we have enjoyed a substantial increase in the number of our depositors, during the past year and we hope each and every resident of our prosperous county has much to be thankful for. We invite you to call on us for anything in the banking line, feeling sure that our facilities and resources are such that we can please you. We are especially equipped for issuing drafts on the Old Country.

All Kinds of Fresh and Cured Meats
For Sale at Right Prices.

Highest Market Price Paid for Cattle, H'gs
and Hides.

All Phone Orders Promptly Attended to

The New Schooner.

From the Herald:

The Elmore steamer Oshkosh, a gasoline two masted schooner, in command of Capt. Latham, arrived in on Thursday on her maiden trip to Tillamook. In her company was the Elmore and Argo; all three boats being tied up at the wharf at one time gave our water front a lively appearance.

The Oshkosh's gross tonnage is 145 ton, net 123. She is 95 feet long and 24 foot beam. Hold is 7 feet deep and when fully loaded draws 8ft aft. She brought in a cargo of 187 tons under the hatches.

Capt. Thomas Latham, her commander, informs us that she left Astoria at 5:45 a. m. on the 11th and arrived at Garibaldi at 11:20

a. m. He thinks that she will be able to make nearly 12 knots when her engines get down to their bearings, and under favorable conditions. The officers are bearthed aft in a deck cabin and the crew forward.

Unearths Rare Coin.

From The willamina Times:

Mr. James Wooden, who lives some five miles out on the Butler road, brought to this office last Friday a rare old coin that was found by his son while plowing in the field. The coin is a trifle larger than the fifty cent piece and bears date of 1830. It is of the Bolivian Republic of South America. Just where this coin came from and how it has spent the 80

years since its manufacture is a conjecture, but it is supposed by Mr. Wooden that it was brought in by the Hudson Bay Company and paid to the Indians in early days and lost by them. It was found at the bottom of the furrow which would indicate that it had been there a long time but was still as bright as when it came from the mint.

An agreement has been filed with the County Clerk between N. N. Brooten and John Anderson and T. H. Faulconer, in which it is agreed to sell the ore from what is known as the Brooten mineral property, in the south part of the county. The ore is to be known as the "Brooten's Kelp Ore," and the parties agree to take not less than \$500 worth of ore during the first year; \$1000 the second year; \$1500 for the third year, delivered at the mine and to be sold in the State of California or the territory of Arizona, upon the following terms: for antiphlogestine, containing medical properties for poultices, at \$200 per ton; ore containing medical properties for mud and steam baths, \$125 per ton; for ore containing medical properties for water baths, \$75 per ton; for ore containing medical properties for drinking water, \$200 per ton. The ore is to be treated by Brooten before delivery, suitable for the purposes expressed in the agreement, and the contract is for 20 years with the privilege of taking more ore if desired.—Headlight.

On Wednesday the Launch Queen of Pacific City made a trip to Cloverdale, having on board Mr. Brier, Fred Murphy, Virgil Magarrell and J. H. Perkins. They made the trip against the current in one hour and eleven minutes. Mr. Perkins is the father of Mrs. Magarrell, and he and wife who are from Atlanta, Iowa, have been visiting at the home of their daughter for the past two months. Mr. Perkins is an Iowa farmer, and has seen the state develop from its earliest days, having been born there. He is now well up in his sixties.

THIS VICINITY IS VISITED BY A SEVERE RAIN STORM.

Water Has Not Been So High In Nineteen Years.

From Sunday afternoon until Tuesday evening of this week this locality was visited by the most severe rain storm of the past nineteen years, the water raising higher than it has been since 1890.

The water reached its highest stage about five o'clock Monday evening and did not begin to recede until sometime towards the next morning. When the water was at its highest it flooded the street in front of the post office some, and the street from the hardware store to a point south of Grandma Ray's residence was entirely under water, the water being three feet deep in places.

The approach to the north end of the bridge was afloat in about six feet of water, making it impossible for the mail or teams from Cloverdale to reach Woods by that route, and all the bottom lands were covered by several feet of water.

We did not receive any mail from outside until Wednesday and then only letters were brought in as it was necessary to bring the mail on horseback. All papers and bulky mail arrived on Thursday.

We understand that there has been some bad washouts on the grades south of Beaver and that a large fill just this side of Tillamook was partially washed away causing considerable damage. No serious damage was done in this locality.

Ladies! make your men folks buy the Ross shoe-sole, at the Cloverdale Mercantile Co. store, to keep your fresh washed floors clean and protect your carpets.
