## FIRST OFFICIAL COW TEST REPORT

The Nestucca Cow Testing Association was organized four months ago and a daily test of the cows belonging to members of the association has been made. Those who have become members of this association are enthusiastic in the belief that it furnishes the logical and economical way of finding out the profitable members of their herds, or, better yet, the unprofitable ones.

The following record gives the names and records of the cows in the association which have produced more than 190 pounds of butter-fat or 5,000 pounds of milk during the period of four months, ending August 10, 1914:
