The young people departed for their homes at a late hour, all having agreed that their host and hostess had given them and evening's entertainment that would long be pleasantly remembered.

County Courts Get $9,000.

The County Courts of Tillamook and Yamhill counties have been successful in securing state aid on the Sour Grass road to the amount of $9,000. The county courts met the state officials and made an effort to secure $20,000, but of course they hardly expected to secure that amount, and realizing that they would not get more than what they asked for, aimed high, and should be complimented on securing the $9000.

This will help the county courts of Tillamook and Yamhill to complete the the road next year.

Stages Consolidate.

To better facilitate business the two auto stages running between Cloverdale and Tillamook have consolidated and in the future the White stage will carry passengers only and the mail stage will handle the mail and local freight. The through sacks of mail will be handled by the White stage and dropped off at the postoffices, thus giving the postmasters an opportunity to sort the mail and have the sacks ready for the mail stage upon its arrival. Under this arrangement both stages will arrive at their destinations earlier, by making the time on the road shorter. Having no freight to bother with the White stage can leave Tillamook immediately upon the arrival of the train.

This new service we believe will be appreciated by patrons of both stages. The aim is to give to the people the best service possible.

Owing to the fact (which is recognized by everyone who knows the up-keep cost of automobiles) that in the winter the cost is much greater than in summer, the price charged for carrying passengers will be slightly increased on and after the 1st of December.

Later on cards will be printed and posted announcing the fares between the different stations along the line.

A Practice All Should Stop

"You don't realize what a nervous strain you are putting on the man in the cab," said a Southern Pacific engineer to an Ashland automobile driver, "when you dash up toward the crossing just ahead of his train. There he is in his cab and he knows that he can't stop his engine. There you are in your automobile speeding toward the crossing just ahead. You probably know that you are going to stop just at the edge of the track and look up and laugh at him. He doesn't. He doesn't know that you even see the train. He doesn't know but what you are going to try to dash across the track ahead of him. It's a joke maybe to you. To him it's a few seconds of the most intense agony. Why do you do it? When you see a train coming and know that you can't make the crossing and don't even intend to try to make it, why don't you slow down and give the engineer the assurance that his train is about to hurl you into eternity?"

"I never thought of it in that light," said the auto man. "I guess we do those things in a spirit of deviltry. I can tell you one thing, though, I'm never going to harrow up another engineer's nerves."

"I wish they'd all quit it," said the railroad man. "It happens a dozen times a day.

DELAYED

Owing to delay in freight shipment we are compelled to postpone a part of our display of Holiday Gift Goods. We hope to have the balance of these goods in a few days and have them on display by Nov. 25th.

It will pay you to defer your Holiday shopping until you have seen these Gift Goods.

PECULIAR OCCUPATIONS.

Those of the Bacteriologist, Anthropologist and Plant Doctor.

What man leads the most peculiar modern life? The question is not an easy one to answer offhand, but it is doubtful if any one spends his days in a more strange manner than the bacteriologist. Day after day, week after week, year after year he works in the laboratory, into which only the privileged may enter, studying the microbes of disease. He may not open the window lest he infect the whole neighborhood with typhoid or diphtheria, or any other diseases with which he is at close quarters all day. He encourages bacteria to multiply, and then through a microscope, or sometimes with the naked eye, he watches how they spend their time, in order that he may combat their deadly influence.

While the bacteriologist looks forward, the anthropologist looks backward. He is the man who dashes off to any place when he hears a deep excavation is being made, and hopes always that he will find a skeleton, and especially a skull, for he is never so happy as when he unearths human relics going back centuries.

The plant doctor is akin to the bacteriologist, for, like the latter, he spends much of his time in the laboratory, not studying the enemies of the human world, but the enemies of the plant world, and he is very proud when, after diagnosing and treating the various ailments of flowers, he runs across, say, the enemy of a rose, and finds how it may be kept from doing harm. —London Tit-Bits.

Spurgeon was Noncommittal.

The Rev. W. Williams, in his "Personal Reminiscences of C. H. Spurgeon," tells an anecdote concerning the great preacher as a smoker. Some gentleman wrote to Mr. Spurgeon, saying: "He had heard he smoked and could not believe it was true. Would Mr. Spurgeon write and tell if it really was so?" The reply was sent as follows: "Dear ——, I cultivate my flowers and burn my weeds. Yours truly, C. H. Spurgeon."

Making It Clear.

"Now, my good man, before we start out in your machine let us understand each other perfectly."

"Well, what is it?"

"I am not desirous of seeing how fast you can drive this car; it is the scenery I wish to see."

His Reason

WE asked a friend of ours why he invariably insisted upon buying Brandegee, Kincaid & Co. Clothes.

He said he wanted to be absolutely sure of satisfaction.

If his reason sounds good to you, come and see our new Fall Styles.
