We think that there is not as much interest taken in the Liberty Loan as there should be in our fertile little valley. We all should sacrifice for this great cause. It dollars will win the war, its much cheaper than our boys, and after sending our boys we should see that they are abundantly supplied with everything essential for their effectiveness and comfort. Let the women, the boys and the girls each take a Liberty Bond. The terms of payment are very reasonable, and this is not all, the security is good.

Mr. Gilbert spent Wednesday in Tillamook.

LIBERTY LOAN BOND BUYERS

Lightly Attended Meeting Following the Moving Picture Show.

Messrs. Edwards, Baker and Lamb, of Tillamook, came over to Cloverdale last Saturday to boost the sale of Liberty Loan Bonds. At the close of the moving picture show each of the above named gentlemen gave a short talk on the necessity and loyalty of purchasing the bonds. Although the hall was uncomfortably cold and the crowd small the efforts of the speakers has not been in vain as there were quite a few subscribers that evening and others have fallen in line since the meeting.

A committee of three, F. L. Owens, W. A. High and Chas. Ray, were appointed to solicit for the sale of the bonds up to the time of the closing, Saturday, October 27.

Following are those who have subscribed for the Second Liberty Loan Bond up to the present time:

BIRDS OF PREY ARE NEEDED

Australia Suffering Loss of Crops and Other Damage Through Lack of Feathered Scavengers.

Australia is regretting the laws passed some 30 years ago ordering the slaughter of hawks, owls, carrion crows or other birds that prey on young animals and birds. For these have now been almost wiped out, with the result, as described by W. P. Pyecraft in the Illustrated London News, that "decaying bodies, numerous on sheep farms, have been left to be demolished by the larvae of blowflies, which have now increased to such an appalling extent as to threaten the sheep on the runs with destruction, the animals becoming 'fly-blown' and eaten up alive by this dangerous pest.

"Similarly, Victoria is complaining of the difficulty of saving the immense wheat stacks of the country from the plague of mice, which the absence of their natural enemies has be-gotten. Some protection has been secured by inclosing the stacks with sheets of galvanized iron, leaving convenient holes opposite tins sunk in the ground and filled with water. In this way as many as 10,000 mice have been caught in a single night. At Minyip recently the catch for two nights weighed rather more than a ton. Contemplate the cost of the corn bill for a ton of mice for a single week, and weigh this against the cost of a properly organized bureau of ornithology!"

And Mr. Pyecraft warns Great Britain that she is rapidly nearing a similar condition by reason of her passion for protecting game birds against owls, hawks and their like.

HUNGER CAUSES NEW DISEASE

Manifests Itself by Swelling of Feet and Legs—Bed and Hospital Diet Found Necessary.

One of the results of the restricted diet now enforced in Germany is a new disease due to malnutrition. This, which is called an "oedema disease," and is now very prevalent, is discussed in the Deutsche Medizinische Wochenschrift by four physicians who have been studying it, two in the general hospital of Hamburg-Barmbeck, one among industrial workers in West Prussia and one in the prison camps.

This disease manifests itself by swelling of the feet and legs, sometimes of the hands, and often of the face. The blood is found to be watery. Rest in bed on ordinary hospital diet is followed by recovery, but this is very slow.

NEW ANTISEPTIC IS USED

French Soldiers Supplied With Powder Intended for Immediate Application to Wounds.

As an antiseptic for immediate use upon wounds, Chief Surgeon Vincent of the French army, inven-

tor of one of the best systems of antityphoid vaccination, is distributing to the soldiers little jars of a powder based upon Dr. Alexis Carrel's hypochlorite antiseptic fluid, with glass tubes through which to blow the powder on the wound.

Doctor Vincent's invention is chloride of lime mixed with boracic acid, both in powder form. Its application causes no pain, even if nerves be exposed, only a sense of warmth. The powder dissolves very slowly, so that its antiseptic action is prolonged for several hours.

According to La Nature, treatment with this powder has proved so successful that Doctor Vincent is instructing all the regimental surgeons in its use.

JAPAN'S BIG NEW WARSHIP.

Rapid progress is making on the great battleship Nagato, 32,000 tons, on the stocks at the naval yard at Kure, says the East and West News. She will be larger and faster than the Ise, now building at Kobe. Her speed will exceed 21 knots, that of the Ise; her principal arms will be larger and heavier than those on any battleship ever built in Japan. Preparations are making at Kure for the construction of a 40,000-ton war vessel. The shops at Sasebo are very busy overhauling warships.

Thomas A. Edison
It has been proved many times in public that their magnificent voices are literally Re-Created by the New Edison and that their voices cannot be detected from the New Edison's Re-Creation of them when heard in comparison. We are very anxious to have you hear these Re-Creations. We are sure you will appreciate them.

There are many sound reproducing machines, but there is only one instrument which Re-Creates Music. It is the New Edison, "The Phonograph With a Soul."
