HANDLE SHEEP WITH PARTICULAR CARE

RIGHT WAY TO MOVE SHEEP.

DRAGGING A SHEEP—WRONG WAY.

(Prepared by the United States Department of Agriculture.)
These two photographs show the wrong way and the right way to move a sheep—especially fat sheep. The sheep has a delicate frame and its skin is sensitive. Rough handling, therefore, particularly in caring for breeding animals, may do serious harm.

DRY-PACKED FOWLS FAVORED

Bird Should Never Be Wet Until It Gets Final Quick Rinsing Off in Housewife's Kitchen.

Wet-packing a broiler and sending it to market in ice causes it to lose 13 per cent of its value while fowls lose about ten per cent, according to investigations by the United States department of agriculture. If dry-packed broilers are worth 40 cents, wet-packed broilers are not worth more than 35 cents; and if dry-packed fowls cost 30 cents, wet-packed ones should not cost more than 27 cents. The department specialists point out that consumers who pay the same price for dry-packed ones, are losing money.

A chicken thrown into ice-water to remove animal heat and sent to market in a barrel in direct contact with

cracked ice, it is pointed out, absorbs water for which the consumer has to pay chicken prices. The water also dissolves out from the chicken valuable flavoring and nutritive substances. These go into the water at the bottom of the barrel along with filth that is washed from dirty feet and bloody heads and trickles downward over the poultry.

With a dry-packed chicken the animal heat is removed by hanging the bird in an artificially cooled room maintained at nearly freezing temperature. The chicken is then packed into a box containing 12 birds and sent to market. The box is hauled in refrigerator cars and is kept by good retailers in good ice boxes until sold. The bird is never wet; has no chance to absorb water or become washed out. A bird should never be wet until it gets a final quick rinsing off in the housewife's kitchen.

MERITS OF WINTER PLOWING

Greatest Advantage Is from Economic Standpoint—Permits Better Utilization of Labor.

The merits of fall and winter plowing have been discussed pro and con by many writers. It is evident that the advisability of plowing land in the fall depends upon several factors. It is not advisable, as a rule, to break land not in seed of some kind, if it is in need of organic matter, and a cover crop can be grown on it to plow under in the spring. Stiff sods can be plowed in the fall, and in most cases ought to be, if possible. The greatest, and perhaps the only decided advantage in fall plowing, is from an economic standpoint. It permits a better utilization of the farm labor and permits part of the hardest work on the farm to be done at a time when other work is not pressing.

Calves that are not taken from the cow soon always remember how to milk and are often nuisances when large.

INSURE STRENGTH IN LAMBS

Well-Built, Strong, Vigorous Young Ram Is Always Good Investment—Keep Him Outdoors.

A well-built, strong, young ram is always a good investment, which will insure strength in the future lambs. If he is thin or not in good condition it will be well to feed him judiciously for a few weeks before turning him with the ewes, then leave him with them during the daytime and turn him out at night. During the time of preparing the ewes and ram for breeding it is necessary that they be kept outdoors in order to secure plenty of exercise.

Prevent This Loss.

Rats destroy grain when newly planted, while it is growing, in shocks, stalks, mow, crib, granary, elevator, ear or ship.

Care for Market Eggs.

When marketing is done but once a week, the eggs should be kept in a cool place and turned daily.

WILL YOU BE ONE?

Thousands of thoughtless people neglect colds every winter. A cough follows; they get rundown—then stubborn sickness sets in. Sickness can be prevented easier than it can be cured and if you will give your system the benefit of a few bottles of

SCOTT'S EMULSION

you will find your whole system strengthened. It will fortify your lungs and throat and enrich your blood against rheumatism. It is powerful concentrated nourishment without alcohol or opiates. Don't neglect taking **Scott's—commence today.**

The imported Norwegian cod liver oil always used in Scott's Emulsion is now refined in our own American laboratories which guarantees it free from impurities.

IF HAIR IS TURNING GRAY, USE SAGE TEA

Here's Grandmother's Recipe to Darken and Beautify Faded Hair.

That beautiful, even shade of dark, glossy hair can only be had by brewing a mixture of Sage Tea and Sulphur. Your hair is your charm. It makes or mars the face. When it fades, turns gray or streaked, just an application or two of Sage and Sulphur enhances its appearance a hundredfold.

Don't bother to prepare the mixture; you can get this famous old recipe improved by the addition of other ingredients for 50 cents a large bottle, all ready for use. It is called Wyeth's Sage and Sulphur Compound. This can always be depended upon to bring back the natural color and lustre of your hair.

Everybody uses "Wyeth's" Sage and Sulphur Compound now because it darkens so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through the hair, taking one small strand at a time; by morning the gray hair has disappeared, and after another application it becomes beautifully dark and appears glossy and lustrous. This ready-to-use preparation is a delightful toilet requisite for those who desire dark hair and a youthful appearance. It is not intended for the cure, mitigation or prevention of disease.—Adv.

Acts Like It.

"There is one force which always wears a fatigue uniform."
"Who are they?"
"Messenger boys."—Baltimore American.

Garfield Tea, by purifying the blood, eradicates rheumatism, dyspepsia and many chronic ailments.—Adv.

On His Dignity.

"What'll you say, ol' man, if your wife asks if you've been drinkin'?"
"I sh'll treat the quehshun with (hic) dignified shilence."—Brooklyn Citizen.

As we grow more sensible, we refuse drug cathartics and take instead Nature's herb cure, Garfield Tea.—Adv.

Release of Energy.

"So you approve of the government's action in taking over the railroads?"
"Yep," replied Mr. Growcher. "I approve of that and prohibition for several reasons, one of them being that now a lot of people can quit lecturing on the subject and go to work."—Ex

SUFFERING CATS! GIVE THIS MAN THE GOLD MEDAL

No humbug! Any corn, whether hard, soft or between the toes, will loosen right up and lift out without a particle of pain or soreness.

This drug is called freezone and is a compound of ether discovered by a Cincinnati man. Ask at any drug store for a small bottle of freezone, which will cost but a trifle, but is sufficient to rid one's feet of every corn or callous.

Put a few drops directly upon any tender, aching corn or callous. Instantly the soreness disappears and shortly the corn or callous will loosen and can be lifted off with the fingers. This drug freezone doesn't eat out the corns or callouses but shrivels them without even irritating the surrounding skin.

Just think! No pain at all; no soreness or smarting when applying it or afterwards. If your druggist don't have freezone have him order it for you.—Adv.
