GOOD ROADS

PROPER WIDTH OF HIGHWAYS

Writer Advocates Narrower Roads and Restoring Acres of Valuable Land to Farming.

Just at this time many are interested in the question, how wide should our public roads be? A number of things should be considered in answering this question, says a writer in Utah Farmer. The kind of material to be used in making the road. The topographical conditions through which the road will pass, the proper drainage of the road. The special use to which the road may be put, if any. For years very little attention has been given to the waste of land in our road building. Land has been cheap and plentiful and years ago we did not

Good Road in West.

give the attention to proper road building as we do now.

Public roads have been of a uniform width of 66 feet and the by-roads about 40 feet. They have been too wide if we were to judge by the condition in which we find many of them. Wasted land on either side is used only to grow weeds.

Why not make them the width that is used and plant trees on either side as we have advocated in these columns before? Then the thousands of acres of land that are now practically wasted could be put to some good use.

Some of the Eastern railroads are teaching us a lesson in this regard for they are farming their right-of-way. On a recent trip East I saw great long stretches of land on either side of the railroad track planted to alfalfa. Acres were planted to truck gardening. I understand similar conditions are to be found in some parts of California.

For the sake of economy in building and upkeep let's build our roads more narrow. Restore the acres of valuable and to farming. Build scientifically constructed roads the proper width and plant trees on both sides.

KEEPING UP COUNTRY ROADS

Whether or Not Farmer Lives on Public Highway He Should Take Interest in Nearest One.

Every farmer should feel his dependence upon good roads. Whether or not one lives on a public highway he should take an interest in the nearest one to his farm or the road he must use to market his farm, orchard and garden products.

There are many times when a day's work can be spared for the road. After heavy rains the road may need certain repairs or improvements when the overseer is not ready to call out the hands. Why not individual farmers donate a day's work on the road at such time?

By keeping a road drag and dragging the road along one's land after heavy rains the road may be greatly improved. It is an easy matter to have an agreement so each farmer will drag the road in front of his farm. This would maintain the road till the regular hands could be called out at stated intervals or till the commissioner could make the repairs.

The time has come when we must consider the roads an asset, indispensable to the well-being of the farmer and his family. This being true, is it not every man's duty to do all he can to keep the roads in good condition?

Concrete Highways Being Built in Twenty-Two Cities and Towns—Cost \$15,000 a Mile.

The construction of concrete highways is going on in 22 cities and towns in Connecticut, and when these contracts have been completed there will be about 70 miles of concrete-surfaced pavement in that state. The highways are 18 feet wide and cost \$15,000 a mile. The longest single street of concrete road in Connecticut is two miles in Cheshire, on the main highway from Plainville to New Haven.

Sticks to Lovely.

The young lady had been educated at college and was giving an order to the grocer.

"I require some cheese," she said.

"Yes, miss," replied the grocer, smiling amiably. "I have some lovely cheese."

"You should not say 'lovely cheese,'" said the girl severely. "Lovely" should only be used to qualify something that is alive."

The grocer's smile broadened as he glanced at the Gorgonzola. "Well, then, miss," he said, "I'll stick to 'lovely.'"

Looking for a Decent Road.

"I say, my friend," called the motorist to the farmer, as he drew up alongside of the field, "I'm looking for a decent road to take me into Squigglesville."

"I'm durned glad to hear it," replied the farmer. "Ef ye happen to find it, stranger, send me a tellygram, will ye?"

It Works! Try It

Tells how to loosen a sore, tender corn so it lifts out without pain.

No humbug! Any corn, whether hard, soft or between the toes, will loosen right up and lift out without a particle of pain or soreness.

This drug is called freezone and is a compound of ether discovered by a Cincinnati man.

Ask at any drug store for a small bottle of freezone, which will cost but a trifle, but is sufficient to rid one's feet of every corn or callous.

Put a few drops directly upon any tender, aching corn or callous. Instantly the soreness disappears and shortly the corn or callous will loosen and can be lifted off with the fingers.

This drug freezone doesn't eat out the corns or callouses but shrivels them without even irritating the surrounding skin.

Just think! No pain at all; no soreness or smarting when applying it or afterwards. If your druggist don't have freezone have him order it for you.—Adv.

GLASS OF SALTS IF YOUR KIDNEYS HURT

Eat less meat if you feel Back-achy or have Bladder trouble.

Meat forms uric acid which excites and overworks the kidneys in their efforts to filter it from the system. Regular eaters of meat must flush the kidneys occasionally. You must relieve them like you relieve your bowels; removing all the acids, waste and poison, else you feel a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, your stomach sour, tongue is coated and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment; the channels often get irritated, obliging you to get up two or three times during the night.

To neutralize these irritating acids and flush off the body's urinous waste get about four ounces of Jad Salts from any pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine and bladder disorders disappear. This famous salt is made from the acid of grapes and lemon juice, combined with lithia. and has been used for generations to clean and stimulate sluggish kidneys and stop bladder irritation. Jad Salts is inexpensive; harmless and makes a delightful effervescent lithia-water drink which millions of men and women take now and then, thus avoiding serious kidney and bladder diseases.—Adv.
