FARM TOOLS READY

Make Needed Repairs on Machinery Before Spring Rush.

ACTUAL LOSS CAN BE SAVED

Farmers Who Wait Until Last Minute Before Examining Implements Often Encounter Trouble. —Place Orders Early.

(Prepared by the United States Department of Agriculture.)

Much time, trouble and actual loss in the operation of the farm can be saved if the implements and machines are well cared for and needed repairs made before the spring rush of work begins. Some farmers wait until it is time to use the implements then haul them out of their winter quarters. The man who follows this practice may find that important implements need repairs, and although the season is ripe for plowing or seeding, which should be done without delay, it is necessary for him to drop all other work and attend to the repair job which could have been done earlier in the season. Orders for repair parts and new machines should be placed as soon as possible. This will acquaint manufacturers and their agents with the demand in different sections and enable them to make the best possible distribution. At the same time, it will eliminate expensive delays in transportation at the busy season.

Preserve All Machinery.
All practicable steps should be taken to preserve machinery now on hand. Needless exposure to the weather should be avoided, and in cases where it is not practicable to house machinery when idle, all bearings should receive a thorough application of heavy oil or grease to keep out moisture and prevent rust. It is believed that on many farms machinery could be more adequately sheltered in the buildings available by exercising care in placing them so as to economize space.

Importance of Oiling.
More damage can be done to a machine in half an hour through lack of oil or grease on some bearings than by a whole season's exposure to the weather. Specialists of the United States department of Agriculture declare. For this sort of neglect there can be no excuse, it is said. Operating a machine without lubrication, especially when the bearings are slightly rusty, will quickly result in the wearing away of the metal, often to a considerable depth, in a very few minutes. Expensive breakages, as well as serious delays, also may be caused by operating machines on which nuts have worked loose or have come off entirely, allowing bolts to loosen or drop out.

Some consideration in the use and care of farm machinery are:
Orders for new equipment and repair parts should be placed as soon as possible.
To produce maximum results with a minimum of labor, new and modern machinery in large sizes should be used wherever possible.
Serviceable equipment, not needed, should be sold or made available to others.
Useless machinery should be returned to the channels of trade as junk.
Thorough lubrication and proper care when in use will materially lengthen the period of service of farm equipment.
More care should be given to protecting farm implements from the weather.

Solution of Sheep Problem.
Statistics show that six farms out of every seven in this country are without sheep. The solution of the problem is to get flocks of sheep on some or all of these six farms.

Weights of Milk.
A quart of milk weighs 2 1/4 pound — a 40-quart can of milk weighs 85 pounds; a 32-gallon can, 68 pounds; a gallon can, 8 1/4 pounds; 48 gallons of milk will weight 100 pounds.

Attention to Pullet.
Through winter the pullets must be depended upon for egg production and are the money makers in a poultry plant, and they should be given every attention from the poultry raiser.

Not only will every cord of wood burned save a ton of coal that can be used in some war industry, but it will save the freight necessary to haul that ton of coal—a double saving.

Sifted coal ashes make a good material for the dust boxes. Wood ashes are also good, but the lime in wood ashes discolors and destroys the gloss of the fowl's plumage.

Watch the hog pens for any signs of sickness. Hog prices are too good right now for the breeder to run any risks by permitting a contagion to break out in his herds.

Something of War.
"Is the strenuous looking young woman you showed me a war bride?"
"I should say so. When she and her husband get to arguing, she throws the first thing that comes to hand at him."—Exchange.

To restore a normal action to Liver, Kidneys, Stomach and Bowels, take Garfield Tea, the mild herb laxative. All druggists.—Adv.

Past His Power.
"There is one thing no mechanical genius has ever succeeded in doing."
"What is that?"
"Utilizing the hoarse power of a cold."—Exchange.

Garfield Tea is Nature's laxative and blood purifier; it overcomes constipation and its many attendant ailments. —Adv.

"This shortage of sugar ought to be easily remedied."
"How so?"
"Aren't the whole people raising Cain about it?"—Exchange.

DRINK MORE WATER IF KIDNEYS BOTHER

Eat less meat and take Salts for Backache or Bladder trouble.

Uric acid in meat excites the kidneys, they become overworked; get sluggish, ache, and feel like lumps of lead. The urine becomes cloudy; the bladder is irritated, and you may be obliged to seek relief two or three times during the night. When the kidneys clog you must help them flush off the body's urinous waste or you'll be a real sick person shortly. At first you feel a dull misery in the kidney region, you suffer from backache, sick headache, dizziness, stomach gets sour, tongue coated and you feel rheumatic twinges when the weather is bad.

Eat less meat, drink lots of water; also get from any pharmacist four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean clogged kidneys and stimulate them to normal activity, also to neutralize the acids in urine, so it no longer is a source of irritation, thus ending bladder weakness.

Jad Salts is inexpensive, cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep the kidneys clean and active. Druggists here say they sell lots of Jad Salts to folks who believe in overcoming kidney trouble while it is only trouble.—Adv.

Are Your Lungs Strong?

Do colds go down to your throat? Are your bronchial tubes easily affected? Above all, do colds settle on your chest? Then your lungs may not be as strong as you expected—consumption often follows.

Good Physicians Everywhere Prescribe

SCOTT'S EMULSION

Because its Pure Cod Liver Oil is Famous

for strengthening delicate throats and weak lungs while its glycerine soothes the tender linings and alleviates the cough.

Start on *Scott's Emulsion* today—it is Nature's building-food without drugs or alcohol.

The imported Norwegian cod liver oil used in *Scott's Emulsion* is now refined in our own American laboratories which guarantees it free from impurities.

H. LIEBES & CO. Raw Fur Dealers, Fur Manufacturers 149 Broadway, Dept O PORTLAND, ORE.

YES! MAGICALLY! CORNS LIFT OUT WITH FINGERS

You corn-pestered men and women need suffer no longer. Wear the shoes that nearly killed you before, says this Cincinnati authority, because a few drops of freezone applied directly on a tender, aching corn or callous stops soreness at once and soon the corn or hardened callous loosens so it can be lifted out, root and all, without pain.

A small bottle of freezone costs very little at any drug store, but will positively take off every hard or soft corn or callous. This should be tried as it is inexpensive and is said not to irritate the surrounding skin.

If your druggist hasn't any freezone tell him to get a small bottle for you from his wholesale drug house. It is fine stuff and acts like a charm every time.—Adv.

He—Isn't that Gen. Blank and his daughter over there?
She—Yes. They say that she has been through more engagements than her old father.—Exchange.

DO YOUR COWS FAIL TO CLEAN?

Soap 25c. Ointment 25 and 50c. Bride—This apartment is entirely too dark for our purposes. Agent—Why is it too dark, madam? Bride—Because we want to do light housekeeping.—Brooklyn Citizen.

Swift & Company Publicity

At a recent hearing of the Federal Trade Commission there was introduced correspondence taken from the private files of Swift & Company, which showed that the Company had been considering for some time an educational advertising campaign.

The need for this publicity has been apparent to us for several years. The gross misrepresentation to which we have recently been subjected has convinced us that we should no longer delay in putting before the public the basic facts of our business, relying on the fair-mindedness of the American people.

The feeling against the American packer is based largely on the belief that the income and well-being of the producer and consumer are adversely affected by the packers' operations, resulting in unreasonably large profits.

Swift & Company's net profit is reasonable, and represents an insignificant factor in the cost of living.

For the fiscal year 1917 the total sales and net profit of Swift & Company were as follows:

Sales \$875,000,000. Profits \$34,650,000.

This is equivalent to a \$3,465. profit on a business of \$87,500.

If Swift & Company had made no profit at all, the cattle raiser would have received only one-eighth of a cent per pound more for his cattle, or the consumer would have saved only one-quarter of a cent per pound on dressed beef.

Swift & Company, U. S. A.
