Don't Use Any Other Than Cuticura Soap To Clear Your Skin

With the Fingers! Says Corns Lift Out Without Any Pain

You reckless men and women who are pestered with corns and who have at least once a week invited an awful death from lockjaw or blood poison are now told by a Cincinnati authority to use a drug called freezone, which the moment a few drops are applied to any corn or callous the soreness is relieved and soon the entire corn or callous, root and all, lifts off with the fingers.

Freezone dries the moment it is applied, and simply shrivels the corn or callous without inflaming or even irritating the surrounding tissue or skin. A small bottle of freezone will cost very little at any of the drug stores, but will positively rid one's feet of every hard or soft corn or hardened callous. If your druggist hasn't any freezone he can get it at any wholesale drug house for you—Adv.

Now His Move.
"Wife, I'm afraid I can't afford new clothes for you this spring."
"Well, then, Dick, we must move. I don't mind wearing my old clothes in a new neighborhood, but I won't stay here and wear them."—Boston Transcript.

GRANDMA USED SAGE TEA TO DARKEN HAIR

She mixed Sulphur with it to Restore Color, Gloss, Youthfulness.

Common garden sage brewed into a heavy tea with sulphur added, will turn gray, streaked and faded hair beautifully dark and luxuriant. Just a few applications will prove a revelation if your hair is fading, streaked or gray. Mixing the Sage Tea and Sulphur recipe at home, though, is troublesome. An easier way is to get a 50-cent bottle of Wyeth's Sage and Sulphur Compound at any drug store all ready for use. This is the old time recipe improved by the addition of other ingredients.

While wispy, gray, faded hair is not sinful, we all desire to retain our youthful appearance and attractiveness. By darkening your hair with Wyeth's Sage and Sulphur Compound, no one can tell, because it does it naturally, so evenly. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning all gray hairs have disappeared, and, after another application or two, your hair becomes beautifully dark, glossy, soft and luxuriant.

This preparation is a delightful toilet requisite and is not intended for the cure, mitigation or prevention of disease.—Adv.

The Judge and the Expert.

Mayor Hylan of New York has no belief in efficiency experts and has banished them from the city hall.

An efficiency expert undertook to teach Judge Hylan, as he then was, a lesson some years ago.

"I observe, Judge," the man said, "that you've given notice to your office boy, Jimmy. That's a great mistake."

"But he's the most worthless little—"

"Judge," the expert interrupted, with a superior smile, "I'm going to give you an efficiency lesson. Take Jimmy back, for he sings at his work, and there's no surer sign of efficiency."

"Humph, that's no sign," said the Judge. "A mosquito does that."

To keep clean and healthy take Dr. Pierce's Pleasant Pellets. They regulate liver, bowels and stomach.

A One-Man Job.

Ferdinand De Footlites was billed for a one-night stand at Mallow-on-the-Marsh. So he sent a telegram to the proprietor of the local theater:

"Will hold a rehearsal tomorrow night. Have stage manager, stage carpenter, property man, assistant electrician and all other stage hands there without fail."

Within a few hours he got a reply from the proprietor, who wired back: "He will be there."—Tit-Bits.

Hard Worked.

"There goes the hardest worked man in town."

"Nonsense! He's rich and independent."

"Yes, but he has three daughters who work him for the support of their husbands."—Exchange.

Weary.

Actress (to her fiance)—Please don't ask me to kiss you for a week or so, darling. You must remember I took over £200 yesterday selling kisses for the Red Cross.—Passing Show.

A Saving Theory.

"Billings isn't very generous with all his money, is he?"

"No; he holds that wealth is a burden, and that it is not fair to put one's burdens on other people's shoulders."—Baltimore American.

Divided Authority.

"Who really is boss in your home?" inquired the abrupt person.

"Well," replied Meekton, "of course Henrietta assumes command of the pug dog and the canary. But I can say pretty much what I like to the goldfish."—Exchange.

THE REFLECTIONS OF A MARRIED WOMAN—

are not pleasant if she is delicate, run-down or overworked. She feels "played out." Her smile and her good spirits have taken flight. It worries her husband as well as herself. This is the time to build up her strength and cure those weaknesses or ailments which are the seat of her trouble. Dr. Pierce's Favorite Prescription regulates and promotes all the proper functions of womanhood, enriches the blood, dispels aches and pains, melancholy and nervousness, brings refreshing sleep, and restores health and strength. It cures those disorders and derangements incident to womanhood.

A well-known agent which can be procured at all drug stores is "Pleasant Pellets," made up of the May-apple, the dried juice of the leaves of aloes and the root of jalap. First put out by Dr. Pierce nearly fifty years ago.—Adv.

HAND-PICK BEAN SEED IS FAVORED

Most Effective Method to Reduce Amount of Disease.

PLAN TO SECURE BEST STAND

Germination Test Should Be Made During Winter Months When Other Work on Farm is Slack—Good Method Outlined.

(Prepared by the United States Department of Agriculture.)

Bean anthracnose and blight are carried over from year to year in the seed. The most effective method to reduce the amount of disease, according to the United States department of agriculture, is by hand-picking the seed very carefully before planting. This will eliminate most of the spotted, discolored, shriveled, undersized, and cracked beans, and does a great deal toward insuring a uniform stand. A germination test of the seed will indicate whether a good stand is likely to result. This work should be done during the winter months when work is slack and before the spring rush begins.

Secure Cleaner Crop.

By removing all discolored and spotted beans the source of infection will be greatly reduced, and the result will be a cleaner crop. The weather conditions determine to a certain extent the severity of bean anthracnose and blight, but if all diseased seeds are removed the grower will be insured

Sample of Beans Unfit for Planting Purposes.

against these losses regardless of the weather conditions. The undersized, shriveled, irregular, and cracked beans do not germinate well and their removal will help to secure a uniform stand. No chances should be taken with the 1918 crop. Only the very best seed available should be used.

Test Germination.

Germination tests should be made to determine what percentage of the seed will grow. Follow the method commonly employed for testing the germination of corn. The seeds may be laid between moist blotters or folds of cloth placed in a shallow dish, covered with a plate and kept in a warm room; or they may be planted in sand or soil.

If the germination is poor, the fact must be taken into account when deciding upon the rate of planting, in order to insure a good stand. It is very important that seed be tested this year, since early frosts in the fall of 1917 prevented the crop from maturing properly in some of the principal bean-growing sections of the country. A failure to do so may result in a poor stand and much reduced yield.

CATTLE ADAPTED TO SOUTH

Pasture Season is Long and Feed is Produced at Minimum Cost—Little Shelter Needed.

(Prepared by the United States Department of Agriculture.)

There is no section of the country which can produce cattle more cheaply than the South, for the lands are still cheap, the grazing is good, the pasture season is long, feed can be produced at a minimum cost, and inexpensive shelter only is required for the animals during the winter months.

NECESSARY TO SAVE MANURE

Sometimes Overlooked by Small Farmer Who is Just Starting in Live Stock Business.

Save manure. The necessity for this is sometimes forgotten by the small farmer who is just starting in the business of live stock production. Fertilizer is scarce, high in price, and hard to get for any reasons. Therefore, the more manure saved to apply to the land the less need for fertilizer.

There Is No Monopoly

in the packing industry.

Swift & Company, although the largest packer, handles not to exceed one-eighth of the total meat production of the United States.

The five large packers do not handle to exceed one-third of the total meat production of the United States.

Swift & Company is not in combination with any other packer or packers to control prices.

There is very active competition in the buying of live-stock and equally keen competition in the sale of dressed meats and by-products.

1918 year book of interesting and instructive facts sent on request. Address Swift & Company, Union Stock Yards, Chicago, Illinois
