**Hurrah! How's This**  
 Cincinnati authority says corns dry up and lift out with fingers.

Ouch! ? ! ? ! This kind of rough talk will be heard less here in town if people troubled with corns will follow the simple advice of this Cincinnati authority, who claims that a few drops of a drug called freezezone when applied to a tender, aching corn or hardened callous stops soreness at once, and soon the corn or callous dries up and lifts right off without pain.

He says freezezone dries immediately and never inflames or even irritates the surrounding skin. A small bottle of freezezone will cost very little at any drug store, but will positively remove every hard or soft corn or callous from one's feet. Millions of America's women will welcome this announcement since the inauguration of the high heels. If your druggist doesn't have freezezone tell him to order a small bottle for you.—Adv.

**Patience on a Pullman.**  
 "When do you expect to arrive at your destination?"  
 "Haven't thought of that. When I travel now I simply get on board a train and wait and see what happens."

# GOOD ROADS

## TRACTOR AIDS ROAD MAKING

Successfully Used in New Hampshire in Conjunction With Regulation Road Machine.

In Atkinson, N. H., the farm tractor has been successfully used in making and preparing roads, doing away with horses.

A 20-horse-power tractor, as shown in the picture, was used in conjunction with the regulation road machine for rounding off the surface of the road and cleaning out gutters. It was found that the tractor not only easily does the work of six or eight horses, but better and in less time. Two men only are required as compared with four required with the former system. Besides, double the ground is covered.

When the tractor is used with the road drag, one man, driving the tractor, can round up and smooth as much state road in half a day as one man with a pair of horses in one day and a half. The tractor hauls four to six

Efficient Aid in Road Repairing.

cartloads of gravel in the same time that a two-horse team requires for one load. Figured in dollars and cents, the tractor could easily do \$24 worth of work at a cost of only \$8, with an additional saving of from 25 to 50 per cent in time.—Popular Science Monthly.

## RIGHT SYSTEM OF HIGHWAYS

It Should Include Everything From Expensive Concrete to Minor Dirt Wagon Ways.

What we need and in time will have is a system of highways which will ramify from the largest cities to the doorway of the humblest citizen—villager or farmer. Such a system of highways will include trunk lines with expensive concrete or brick surfaces for the very heavy traffic, including trucks and automobiles. Less used but important roads may be of waterbound macadam or gravel. Perhaps in certain regions where stone and gravel are not at hand oiled roads may prove most economical and practical. Minor wagon ways must remain of native soil, built and maintained with the road drag. Meanwhile antagonism to road dragging breeds in a lack of information or a narrowness which fails to comprehend the facts.—D. Ward King.

## BENEFIT OF IMPROVED ROADS

Make It Possible to Consolidate and Establish Graded Schools in Rural Districts.

(Prepared by the United States Department of Agriculture.)  
 That improved roads would benefit our country-school system there would seem to be no doubt. Good roads make it possible to consolidate or centralize the schools and to establish graded schools in the rural districts. Such schools centrally located will accommodate all of the children within a radius of four or five miles. In many communities having the advantage of improved roads commodious buildings have been provided, more competent teachers employed, and modern facilities for teaching supplied at a minimum cost.

## EXPERIMENTS TO BE TRIED

Temporary Improvement of Sand Roads to Be Made by Use of Straw, Hay or Wire Grass.

For the first time an experiment in temporary improvement of deep sand roads by use of a carpet of straw, hay, or wire grass, sprinkled with tar or bituminous produce, will be tried on Wisconsin highways in the vicinity of Rila, Columbia county. It is hoped to devise methods which will fit the road for travel at small expense, and it is predicted that this straw carpet will last three years where traffic is not heavy. Other experiments in resurfacing highways are to be tried on the Baraboo-Kilbourn road. Thirty-four hundred sections have been staked out, and treatment of each will be different.

## Plan for Rehabilitation and Re-Education of Men Who Are Disabled in War

Plans for the rehabilitation and re-education of soldiers and sailors disabled in the war, so that they may earn higher wages than before their enlistment, are outlined in two reports submitted to congress by the federal board of vocational education. Both reports urge an appropriation for the training of teachers for the work and for establishing great schools near hospitals in all parts of the country. They point out that while congress has made full plans for fighting the war, it has neglected to furnish money for the reclamation of the wounded men so that they may become not only self-supporting, but be an asset to the nation by turning back into civilian life a flood of well-trained and disciplined men who will be highly valuable in industry.

Unless the work of training the men for new occupations or for better places in their old occupations is undertaken while the soldiers are in the hospitals or in the convalescent camps, C. A. Prosser, the director of the survey, asserts, the men will lose their will power and discipline, become morbid and indolent, and finally become perpetual wards of the government. It is expected that the exercises training the wounded for new occupations or for better places in their old occupations will develop the muscles that remain inactive through the hospital period.

Director Prosser says that the training is one of the cures in the treatment of the war's wounded, because it will buoy up their spirits and hopes. It will demonstrate to them that they are not public burdens, and that "after they have played the man's part in the supreme moment of history they may take up a man's job again in civilian life at wages higher than they received before they entered the army." In some cases where men are bedridden for months he suggests that the training be undertaken at the bedside. He calls all these workshops "curative workshops."

## Mother's Cook Book

In days gone by I filled myself With puddings, pies and cakes; I dearly loved all sweetened food, (I took a chance on aches) But nothing stayed my appetite When I came in from play, Like bread smeared o'er with jam That mother stored away.

**Good War-Time Cakes.**  
 Cakes to be used are taking less sugar and honey corn and maple syrup are being used as often as possible.

**Oatmeal Cake.**  
 This is a perfectly reliable cake which will be found often in the homes where it has once been tried. Take one half-cupful of sugar, four table-spoonfuls of Troco, or any fat may be used, one egg well beaten, a cupful of cold coffee, a cupful of rolled oats that have been ground through the meat chopper, a teaspoonful of cinnamon, a cupful of flour, a teaspoonful each of baking powder and vanilla, a half-teaspoonful of soda, and a cupful of raisins. Proceed as usual in making the cake.

**Coconut Macaroons.**  
 Take a tablespoonful of butter, creamed, add a half-cupful of sugar, one egg, one and a half cupfuls of oatmeal and a half-cupful of coconut. Drop by teaspoonfuls on a buttered sheet.

**Sponge Corn Flour Cake.**  
 Beat four eggs, add a tablespoonful of lemon juice, a cupful of sugar, a cupful of corn flour, and an eighth of a teaspoonful of salt. Bake in gem pans.

**Potato Flour Sponge Cake.**  
 Beat the yolks of four eggs until thick, add a cupful of sugar gradually, beating constantly; add the whites beaten stiff and stir into the first mixture; add a teaspoonful of baking powder to a half-cupful of potato flour, and to the eggs; flavor to taste. Bake 30 minutes.

**Raisin Drops.**  
 Take a third of a cupful of shortening, add a cupful of sugar, two well-beaten eggs, a cupful of raisins, two cupfuls of corn flour sifted with two and a half teaspoonfuls of baking powder, a cupful of milk and a teaspoonful of vanilla. Mix and bake as usual. Strained honey boiled and used for boiled frosting as one does a sugar sirup, saves sugar. Maple sirup or sugar may also be used if a filling or frosting is necessary.

**SWIFT & COMPANY U.S.A.**

## If Swift & Company Made No Profit

The cattle raiser would receive only 1/8 cent a pound more for his cattle

So small is Swift & Company's profit on any single transaction that if it were turned over to the cattle raisers of the country, they would receive only 1/8 cent a pound more for cattle than they receive now.

Swift & Company pays for live cattle about 90% of the amount received for dressed meat and by-products. The remaining 10% pays for packing-house expense, freight to market, operation of distributing houses and profit. Swift & Company's actual figures per head for 1917 on over two million cattle were as follows:

Receipts		Payments	
From By-products	\$24.00	8.61	8.61
	26%	9%	9%
From Meat	\$68.97		
	74%		
<b>Total</b>	<b>\$93.06</b>		
		Paid for Live Cattle	\$84.45
			91%
		<b>Total</b>	<b>\$93.06</b>

\* This net profit of \$1.29 per head averages 1/8 cent a pound live weight.

And out of this small net profit dividends must be paid to shareholders.
