## GOOD ROADS

### GOOD ROADS IN NEW ZEALAND

Concrete Declared Most Satisfactory in Land of Heavy Rains—Cheaper in Long Run.

The New Zealand authorities, both local and national, are carefully studying the subject of good roads, realizing that this is the best way to open up the hinterland of the dominion. The roads of the country, in the main, are not in very good condition. There are some good stone roads, about the larger centers, but few of them extend out more than 25 or 30 miles. Their upkeep has been found very expensive, especially in the northern part of the country, since the rainfall is heavy and washouts are numerous because the stone used is soft and grinds up rapidly, the Scientific American states. Of late much has been said in regard to the construction of concrete highways, and it is thought that this will be far cheaper in the long run than the stone roads as they are now constructed, for the reason that the upkeep will be so very greatly reduced. It is estimated that a mile of 12-foot concrete road four inches thick could be built in New Zealand for \$2,000 more than a mile of ordinary stone road, on which there would be a saving in upkeep for the first five years of at least \$1,200, while at the end of ten years there would be a saving of \$7,000 or \$8,000.

### FEDERAL AID FOR HIGHWAYS

Organization Arranged by Secretary of Agriculture Described in Recent Publication.

(Prepared by the United States Department of Agriculture.)

The organization that has been arranged by the secretary of agriculture to administer the provisions of the federal-aid road act of 1916 is described in a recent publication of the department.

Ten district offices, each directed by a district engineer, reporting to the director of the office of public roads, have been established. The district offices are located in Portland, Ore.; San Francisco, Cal.; Denver, Colo.; Minneapolis, Minn.; Omaha, Neb.; Fort Worth, Tex.; Chicago, Ill.; Montgomery, Ala.; Troy, N. Y., and Washington, D. C.

The procedure adopted calls for the submission of an application, known

Sand-Clay Road, If Well Kept, Is Satisfactory for Moderate Traffic.

as a project statement, by the state highway department to the district engineer, who examines the road it is proposed to improve, and transmits the project statement with his recommendations to the headquarters office in Washington. If the secretary of agriculture approves the project statement, the plans, specifications and estimates are then submitted by the state highway department to the district engineer, who transmits them with his recommendation to the Washington office, and when they are found to be suitable for approval, a formal certificate to that effect is issued by the secretary of agriculture to the secretary of the treasury and the state highway department, and a formal project agreement is entered into between the secretary of agriculture and the state highway department. As the work progresses or upon its completion, payment on a special voucher approved by the comptroller of the treasury is made of the federal funds apportioned to the state.

### BUYING AND SELLING EGGS

Prominent Dealer in Food Supplies Opposed to Practice of Handling Them by Dozen.

A prominent dealer in food supplies has gone on record as opposed to buying and selling eggs by the dozen.

"I am strongly in favor of selling eggs by weight," he says. "It is the only just way for both seller and purchaser. As things are now, one man may buy a carton of eggs, very good, but very small, while another may buy a carton of fine big eggs. Yet both will pay the same price. It is not fair. The only fair and just method is to buy and sell them by weight."

Eggs vary so in size that a dozen large and a dozen small eggs purchased at the same price per dozen

Eggs of Various Sizes.

may differ as much as 25 per cent in the value of the food elements furnished. Perhaps the fairest way to buy or sell eggs is by weight. Because of the wide variations in the size of eggs, it is also coming to be recognized that more accurate results in recipes can be obtained by weighing or measuring the eggs out of their shells.

### GOOD GARDEN SEED FAVORED

Essential in Successful Gardening—Best Way Is to Patronize Some Reliable House.

Good garden seed is an essential in successful gardening. If we are going to plant something, we want it to grow. The worst thing possible is to plant seed that won't germinate, and it is almost as bad to find that the seed which has been planted is untrue to name.

In order to avoid all annoyance it is best to secure good seed. When buying garden seed demand that it be fresh; likewise insist that it be true to name. The easiest way of avoiding poor seed is to purchase the product of some reliable house.

### DEVICE TO HOLD DOOR OPEN

Half-Inch Piece of Board, Eight Inches Long and Three Wide Is Easily Arranged.

(By R. PHILLIPS, Washington.)

A simple device may be made which is useful for holding doors open when the old-fashioned lock is used. Take a half-inch board, eight inches long and three inches wide and shape it like the above cut. Screw it to a 2 by 4 on the barn where the stick on the lock

Holds Door Open.

projects. Nail it so the projecting stick hits the lock about one-fourth of an inch above the point. With a little pressure, the slope of the lock will make the projecting stick move up. When it comes to the notch in the lock it will drop down, locking the door back securely.

### PROPER EGGS FOR HATCHING

Costly Mistake to Use Those From Unculled Flock—Best to Have Small Breeding Pen.

It is a costly mistake to hatch eggs from the whole uncultured flock, and to keep males enough the year around so that the eggs will be fertile.

Far better get the eggs from a neighbor who culls his hens for hatching eggs, or send to some breeder who does. It is not an expensive thing to have a small yard for one's own best hens and mate.

### Annual Waste of Food.

The annual waste in the United States of foods available for cattle has been estimated at \$100,000,000 by department of agriculture experts.

### Hatching Eggs.

Do not incubate any eggs of inferior market quality. The character may be inherited, as is the size, shape and color of the eggs.

### Getting Cows Into Barn.

Some feed in the manger and a little kindness are better for getting the cows into the barn than is sicking the dog onto them.

### Raspberries Are Neglected.

Many people plant raspberries, giving no attention or care afterward expecting them to bear well just the same.

### Hatch Chicks Early.

Hatch your chickens early and have eggs all fall and winter.

### Have Eggs in Fall.

Have eggs to sell all fall by hatching early.

## Sapolio doing its work. Scouring for U.S. Marine Corps recruits.

**AFTER "THE GRIP,"** or in convalescence from pneumonia, fevers, or other debilitating diseases, your quickest way to get flesh and strength is with Doctor Pierce's Golden Medical Discovery. That gives purity to your blood, plumpness to your body, and puts every function into perfect working order. It makes thoroughly effective every natural means of repairing and nourishing your system. For pale, puny, scrofulous children, nothing approaches it. It builds up completely their flesh, their strength, and their health.

In the most stubborn Scrofulous, Skin or Scalp Diseases, Eczema, Salt-rheum, and every kindred ailment, it effects wonderful cures. Contains no alcohol or harmful drugs. In tablet or liquid form.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules, easy to take.—Adv.

**Judging From Appearance.**  
Hokus—She spends all her husband's salary on her back.  
Pokus (at a fashionable function)—I always heard that he didn't earn much.—Buffalo Express.

**None Needed.**  
"What walk in life do you intend to select for your son?"  
"Oh, we can afford to buy him an automobile now."—Exchange.

**Suitable Punishment.**  
"What do you think ought to be done with this train robber?"  
"Why, railroad him to prison."

# The Farmer's Share

Live stock is marketed from farmer to consumer at a lower cost than almost any other farm product.

The United States Department of agriculture reported in 1916 that the farmer gets for his cattle "approximately two-thirds to three-fourths" of the final retail price paid by the consumer for the resulting beef.

Under normal conditions, the farmer's share of retail prices of various farm products is approximately as follows:

Butter	71 per cent
CATTLE	66 2/3 to 75 per cent
Eggs	65 per cent
Potatoes	55 per cent
Poultry	45 per cent
Fruits	35 per cent

The difference between farmer's price and retail price represents the necessary expenses of packing, freight and wholesale and retail distribution.

Swift & Company not only performs the manufacturing operations of preparing cattle for market in its well-equipped packing plants, but it pays the freight on meat to all parts of the United States, operates 500 branch distributing houses, and in most cases even delivers to the retail butcher. All this is done at an expense of less than 2 cents per pound, and at a profit of only about 1/4 of a cent per pound of beef.

Large volume of business and expert management, make possible this indispensable service to the live-stock raiser and to the consumer, and make possible the larger proportion of retail prices received by farmers.
