SUFFERING CATS! GIVE THIS MAN THE GOLD MEDAL
No humbug! Any corn, whether hard, soft or between the toes, will loosen right up and lift out without a particle of pain or soreness. This drug is called freezone and is a compound of ether discovered by a Cincinnati man.
Ask at any drug store for a small bottle of freezone, which will cost but a trifle, but is sufficient to rid one's feet of every corn or callous.
Put a few drops directly upon any tender, aching corn or callous. Instantly the soreness disappears and shortly the corn or callous will loosen and can be lifted off with the fingers. This drug freezone doesn't eat out the corns or callouses but shrivels them without even irritating the surrounding skin.
Just think! No pain at all; no soreness or smarting when applying it or afterwards. If your druggist don't have freezone have him order it for you.—Adv.

Escaped the Patience Tester
"Job had wonderful patience."
"Yes. But Job never had to listen to a lot of camouflaged German propagandists."—Washington Star.
Kindly Student.
"How's your boy Josh getting along with his studies?"
"Pleasantly," replied Farmer Corn-tassel. "He don't bother 'em none."—Washington Star.
Suited Her.
"Gossipy Mrs. Gaddy told me the other day she had a car which suited her exactly."
"Then it must be a runabout."—Exchange.
Matrimonial Mathematics.
He—You know, my dear, X is an unknown quantity.
She—I certainly do. I haven't seen one since I married you.—Exchange.
Not Quite So Good.
"What did papa do when you asked him to give you my hand?"
He—He put down his foot.—Baltimore American.

USE OF TRACTORS IN SAVING LABOR

Greater Acreage Made Possible by Improved Machines.

INCREASE CORN PRODUCTION

Larger Plows, Harrows and Other Implements, Make It Possible to Accomplish More Work Per Man on Farm.

(Prepared by the United States Department of Agriculture.)
The more extensive use of labor-saving implements will make it easier in 1918 to approximate the record-breaking acreage of 1917, especially when employed in sections where corn is now grown profitably but on a more limited scale than is desirable because present methods require a large amount of man labor. The more general use of recently developed and improved tractors that are adapted to the uses of the small farm as well as the large farm would tend to increase the acreage and to effect a saving in labor. The use of larger plows, harrows, and other implements used in fitting the land would make it possible to accomplish more work per man. Similarly the substitution of two-row planters and two-row and double cultivators in place of smaller and less efficient implements would make it possible to do the same amount of work with less expenditure of labor.

Replant Missing Hills.
In some corn-growing sections it is the practice to replant missing hills as soon as the corn is up to a stand. Frequently this is done by dropping kernels by hand and covering with a hoe. A labor-saving and quicker method would be the use of small hand planters. These could be used to advantage for the first planting also in sections where comparatively small areas are planted and where it is at present the custom to drop the corn by hand and cover with the hoe.

It is the practice in some localities to plant a much larger number of kernels than the number of stalks desired and to thin to the desired stand when the corn plants are about 6 to 8 inches tall. This method may be satisfactory where plenty of labor is

available, but where it is desirable to economize labor it would be advisable to plant tested seed at about the same rate as the stand desired and do no thinning.

Two-Row Cultivator is a Labor Saver.

A more general use of efficient harvesting machinery would permit a more economical use of labor. A corn binder with an attachment for elevating the bundles of corn into a wagon should be used much more extensively than it is for harvesting ensilage corn. There is also on the market a machine that converts the corn into ensilage in the field, elevating it into a wagon, from which it is sucked or lifted into the silo. The use of either of these

COST OF MILK PRODUCTION

Market for Dairy Products Concerned Only in Two Things—Amount Offered and Quality.
The market for dairy products does not care what it costs to produce milk. It is concerned in only two things—the amount offered and the quality. Most farmers are looking at the market instead of looking at the cost, and every poor cow makes it cost more.

Ear Corn in Crib.
When you wish to know how much ear corn there is in a crib find the cubic capacity of the crib and divide by 2 1/2 for good quality corn and you will have the answer.

Valuable Assets.
The skillful hand and a cultured mind are the farmer's most valuable assets.

Good egg production during the "unnatural" or winter months, depends pretty largely on keeping the stock comfortable.

machines, especially the latter, would do away with the necessity of much laborious work.

Harvest by Machinery.
A large percentage of the cutting and shocking of corn is done by hand labor. In some sections, because of unfavorable topography or other reasons, it is not practicable to use machine cutters. However, the greater part of the corn that is now cut by hand labor could be harvested by machinery, economizing labor and doing the work in a less laborious manner.

Much of the corn that is now husked from the shocks could be handled more economically and with a saving in feed value of stover by substituting machine huskers and shredders for hand labor. The use of corn pickers would accomplish similar results in the case of corn husked from the standing stalks. Unloading and elevating machinery at the crib should be introduced and more generally used in many sections where it is now unknown or not commonly used. Where such facilities are not available cribs should be constructed in such a manner that they can be filled and emptied with the least possible labor. For level ground, double cribs with an elevated driveway and approaches that will enable the loads to be driven through the cribs and dumped or scooped out of the wagons without any high pitching are very satisfactory.

GARDENS FOR SOLDIERS

(Prepared by the United States Department of Agriculture.)
A backyard garden for every soldier.

Keep this in mind in deciding whether or not you will have a garden this year.
Of course, the soldiers at the front cannot enjoy the fresh vegetables you raise, but you can, and every meal made up of the vegetables from your garden will leave more meat and wheat for the soldiers. These can be readily shipped to France; most fresh vegetables can not, and unless you eat more vegetables, some soldier will not have his share.

RASPBERRY FOR SPECIAL USE

Varieties Come From Different Parts of America and Europe—Adapted to Different Uses.

(From the United States Department of Agriculture.)
The varieties of raspberries under cultivation have come from different parts of North America and Europe and are adapted to different conditions of environment and to different uses. Thus the Sunbeam and Ohta originated in South Dakota and generally withstand the trying conditions of the cold winters there. The Superlative, which originated in Europe, where the winters are milder than in most raspberry-growing sections of this country, is grown only in the Pacific coast states. The King is a desirable variety throughout the region between the Mississippi river and the Appalachian mountains, where raspberries succeed. In New York and New England, however, it has proved, for the most part, inferior to many other varieties.

In selecting the varieties of raspberries to cultivate in any locality it is usually important to consider (1) the hardness of the canes, (2) the productiveness of the variety, and (3) its fitness for the particular purpose for which the crop is to be used. In the characterizations here given special attention has been paid to these points.

Get Weed Seeds Out.
In almost all small grain fields a certain amount of weeds grow and the seeds are threshed with the grain. These same weeds are sown with the grain if they are not gotten out.

How Indiana Responded.
As a result of the campaign for increased food production, one Indiana town of less than 5,000 people had 1,384 gardens last season. In eight towns of another Indiana county 98 per cent of all vacant lots were under cultivation. In three townships in still another county, where special effort was made to increase food production, it was estimated that ten times the average amount of garden crops was produced. Canners for canning fruits and vegetables were placed in each consolidated school in one county, and were loaned to communities which desired to use them.

Value of Stable Manure.
A ton of stable manure, of good quality, may be said to contain 11 pounds of ammonia, six pounds of phosphoric acid and 10 pounds of potash.

The gravel road probably ranks next to the earth road in total mileage.
Every acre should produce something. Idle acres are slackers.

Awarded GRAND PRIZE at the P. P. L. E.

KOVERALLS

Reg. U. S. Pat. Off.

Keep Kids Klean

The most practical, healthful, playtime garments ever invented for children 1 to 8 years of age. Made in one piece with drop neck. Easily slipped on or off. Easily washed. No tight elastic bands to stop circulation. Made in blue denim, and genuine blue and white checky stripes. Also lighter weight, fast-color material in a variety of pleasing designs, all exceptionally trimmed with fast-color galatas. All garments made in Dutch neck with elbow sleeves or high neck and long sleeves. Folder (in color) showing different material sent free on request.

\$1.25 the suit
If your dealer cannot supply you we will send them, charges prepaid on receipt of price, \$1.25 each.

Satisfaction guaranteed—money refunded.

Occasions for Excitement.
"Do the people of this country realize they are in war?" asked the visitor.
"I think so," replied Miss Cayenne.
"But they don't seem excited over it."
"No. Excitement is all right for baseball or racing. But a war is so serious that it must be faced with calm determination."—Washington Star.

Cuticura Heals Eczema
And rashes that itch and burn. If there is a tendency to pimples, etc., prevent their return by making Cuticura your daily toilet preparation. For free samples address, "Cuticura, Dept X, Boston." At druggists and by mail. Sosp 25, Ointment 25 and 50.—Adv.

Not Like Vaudeville.
"Don't you like grand opera in vaudeville? Sometimes the voices are very fine."
"I like that part. But it seems funny."
"What?"
"To have a singer go through three songs without any change in costume."

Dr. Pierce's Pellets are best for liver, bowels and stomach. One little Pellet for a laxative—three for a cathartic.

A Discovery.
Extract from the Plunkville Gazette: "We recently heard the town band render the 'Marseillaise' for the first time. It is a stirring air. We predict it will become popular."

Not Much.
"Boss, I'm hungry."
"Hunger makes a fine sauce."
"But what good is a sauce without something solid to go with it?"

ALLEN'S FOOT EASE FOR THE TROOPS.
Shaken into the shoes and sprinkled in the foot-bath it gives rest and comfort, takes the friction from the shoe and prevents blisters and sore spots. Makes walking easy. Accept no substitute. Sold everywhere, 25c.

More to the Point.
Berlin's vehicles of all sorts are said to have gone to rack and ruin. What we're waiting for is the collapse of the kaiser's band wagon.—Detroit News.

The Other Kind.
"Have you any wax?"
"Sealing?"
"Ceiling, no; floor."—New Haven Register.

HOW MRS. BOYD AVOIDED AN OPERATION

Canton, Ohio.—"I suffered from a female trouble which caused me much suffering, and two doctors decided that I would have to go through an operation before I could get well.
"My mother, who had been helped by Lydia E. Pinkham's Vegetable Compound, advised me to try it before submitting to an operation. It relieved me from my troubles

so I can do my house work without any difficulty. I advise any woman who is afflicted with female troubles to give Lydia E. Pinkham's Vegetable Compound a trial and it will do as much for them."—Mrs. MARIE BOYD, 1421 5th St., N. E., Canton, Ohio.
Sometimes there are serious conditions where a hospital operation is the only alternative, but on the other hand so many women have been cured by this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, after doctors have said that an operation was necessary—every woman who wants to avoid an operation should give it a fair trial before submitting to such a trying ordeal.
If complications exist, write to Lydia E. Pinkham Medicine Co., Lynn, Mass., for advice. The result of many years experience is at your service.
