It Works! Try It Tells how to loosen a sore, tender corn so it lifts out without pain.

No humbug! Any corn, whether hard, soft or between the toes, will loosen right up and lift out without a particle of pain or soreness. This drug is called freezezone and is a compound of ether discovered by a Cincinnati man. Ask at any drug store for a small bottle of freezezone, which will cost but a trifle, but is sufficient to rid one's feet of every corn or callous. Put a few drops directly upon any tender, aching corn or callous. Instantly the soreness disappears and shortly the corn or callous will loosen and can be lifted off with the fingers. This drug freezezone doesn't eat out the corns or callouses but shrivels them without even irritating the surrounding skin. Just think! No pain at all; no soreness or smarting when applying it or afterwards. If your druggist don't have freezezone have him order it for you.—Adv.

Little Progress Made. My nephew on returning from school the first day was asked what he had learned. He replied: "Nothing but how to stand up and sit down, and I thought I knew that before I started to school."—Chicago Tribune.

Breaking All Records Right now—when milk prices are breaking all records—is the time to make new high records in milk production. It is surprising how effectively this can be accomplished by raising the health standard of your dairy cows. The most prevalent cow ailments—Abortion, Retained Afterbirth, Bunches, Lost Appetite, Scours, etc.—arise from an impaired condition of the genital and digestive organs. Kow-Kure has remarkable medicinal properties that act directly on these organs, producing regular, healthy action. The cow thrives on Nature's food, and a full milk flow naturally follows. An occasional use of Kow-Kure will prevent disease and pay for its cost a hundredfold. The best dairymen keep it on hand constantly. Feed dealers and druggists sell Kow-Kure, in 60c. and \$1.20 packages.

Send for free book "THE HOME COW DOCTOR" very useful wherever there are cows.
DAIRY ASSOCIATION CO.

ERADICATE LICE AND MITES

Sodium Fluorid Makes an Effective Powder and Should Be Used Freely—Use Kerosene.

(Prepared by the United States Department of Agriculture.)
The free use of an effective lice powder is always in order. Sodium fluorid makes an effective lice powder. In applying the powder hold the fowl by the feet, head down, and work the

Dusting Chicken With Sodium Fluorid a Most Effective Remedy for Lice and Mites.

powder well down into the feathers. A dust bath is essential in ridding the fowls of lice. The free use of kerosene or crude petroleum on the roosts and in the cracks will exterminate mites. Whitewashing the interior of the house thoroughly once or twice a year helps to keep it sweet and clean.

FOWLS FOR BREEDING STOCK

Health and Vigor Must Be First Points to Keep in Mind When Making Selection.

Eggs may be perfectly fertile and yet hatch unsatisfactorily, and the first consideration must be the production of hatching eggs with strong, virile, well-nourished germs. This can be done only by a careful selection, mating and management of the breeding stock and affording the eggs the proper care after they are laid. Health and vigor must be the first points to keep in mind when selecting the breeders. The rule that good seed must be used if one expects a successful crop includes the chicken crop as well as those of grass and grain. The breeding flock should include only sound, healthy, well-fed stock, and all fowls that have at any time suffered from any serious illness or show any faults or defects, such as crooked back or breast, hawk-bill or snake-head, pale face, rattling in throat, foreign growths upon any part of the body, leg weakness or string halt should be promptly discarded.

CHILLING OF MUCH BENEFIT

Wet-Packed Poultry Arrives at Destination in Poor Condition—Slow Railroads Blamed.

(Prepared by the United States Department of Agriculture.)
The chill room developed by the United States department of agriculture for the preservation of poultry and eggs and to prepare them for transportation to market has proved of great advantage to small poultry packers. Packers who have had to ship in less than carload quantities have found that wet-packed poultry has spoiled in enormous quantities because of slow transportation resulting from congestion on the railroads. Packers equipped with the small chill room recommended by the department have found that poultry dry-chilled and properly packed arrived at its destination in good condition, while wet-packed fowls in the same car were in bad order. It has been found also that the method recommended by the government requires less ice than the ice-packing process.
