Everyone should do all he can to provide for his family and in order to do this he must keep his physical system in the best condition possible. No one can reasonably hope to do much when he is half sick a good share of the time. ### Suggestion for a Camping Trip

Buy a bottle of Chamberlain's Colic and Diarrhoea Remedy before leaving home. As a rule it cannot be obtained when on a hunting, fishing or prospecting trip. Neither can it be obtained while on board the cars or steamships and at such times and places it is most likely to be needed. The safe way is to have it with you.

### About Rheumatism

People are learning that it is only a waste of time and money to take medicine internally for chronic and muscular rheumatism, and about ninety-nine out of a hundred cases are one or the other of these varieties. ### WHAT IS CHIROPRACTIC

(Ki-to-prak-tik)

It is Not Medicine, Not Surgery, Not Osteopathy or Naturpathy

It is a scientific method of adjusting the cause of disease without drugs or instruments, based on a correct knowledge of anatomy, and especially the nervous system. The Chiropractic idea is that the cause of disease is in the person afflicted, and the adjustment in correcting the wrong that is producing it. The function of every organ in the body is controlled by mental impulses from the brain, which it transmits through the nerves. Any impingement of these nerves interfering with the transmission of

mental impulses results in an abnormal function called disease. This interference is produced by subluxated vertebrae pressing upon nerves as they pass out from the spinal cord. The trained Adjuster is able to locate the point of obstruction or interference, and by means of adjusting the subluxated vertebrae corrects the cause, and normal conditions, or health, is the result.

The X-ray shows just what vertebrae of the spine are involved. We remove the cause of disease and nature cures.
