**Positive Proof
of FORD ECONOMY**

City of Detroit purchases 137 new Ford cars
Hundreds now in use prove low cost of operation

THESE 137 new Ford cars represent one of the largest deliveries ever made to a municipality at one time.

21 of these Ford scout cars were traded in on this purchase. They had been operated day and night for two years in heavy traffic and all kinds of weather.

The individual records ranged from 76,494 miles to 143,723 miles with a grand total of 2,933,897 miles. The operating cost of the 21 cars was 2,291 cents a mile — less than 2 1/2 cents. This cost included all fuel, oil, tires, repairs and every other item except depreciation and insurance.

Of 277 Ford cars in Detroit City service, the Police Department traveled a total of 6,591,937 miles during the past fiscal year, at an average cost of 2.9 cents a mile.

Many claims have been made on operating costs, but here in the carefully kept motor car records of the City of Detroit is positive proof of Ford economy.

In the paragraphs above, it is seen that 21 Ford scout cars averaged less than 2 1/3 cents a mile and 300 Ford cars in all branches of Detroit police work averaged 2.9 cents a mile!

Day and night, twenty-four hours a day, these Ford cars are in operation, in every branch of transportation, in every kind of grading service. The records show that low fuel and oil consumption, the ruggedness of the Ford's heavy construction, the simplicity of design and the economy in manufacturing prove the real economy and stamina — freedom from breakdowns and repairs.

The individual car buyer as well as the purchasing department of a City can hardly afford to ignore the proved economy of the Ford car.
