Hot Chal

"Didn't I meet you here two years ago?"

"I think so, your face feels familiar."

She: "We're going to give the bride a shower."

He: "Count me in. I'll bring the soap."

WHEAT HARVEST

Continued from page one.

will not begin much before the first of August as the cool weather of this month has delayed ripening. It has also aided the Federation wheat in filling and a fairly good crop is expected there at the present time.

Clarence Morrison is threshing Federation south of town and while it is not of the best quality it is making a good yield. The Johnson land farmed by Bart Burrel is making between ten and twelve sacks of very fair wheat and on the Peets place the wheat is reported to be going over thirteen sacks per acre and the quality is very good.

Late reports from the spring wheat area around Kent are to the effect that the wheat is drying up before the berries mature. This is causing much the same condition as occurred in the Biglow country and will result in a light yield of wheat.

Wasco

Bill Nisbet, E. O. Scott and Pete Peterson spent Sunday fishing on the Deschutes near Shearer's bridge.

SMUT

(Continued from page one)

smut specialist for the northwest experiment stations, who was in Moro the first few days of the week testing the nursery plants here. The government is conducting experiments with smut and has been doing so for many years and they have made great strides in prevention of the parasite. Several dips and treatments have been discovered that effectually control it if used carefully.

Mr. Holton has charge of the smut experiments on three stations in Oregon, two in Washington, two in Idaho and two in Utah where different wheats are tested. He finds considerable variation in the amounts of smut in the same wheats at different stations.

As an example of the general distribution of smut the following table prepared by the grain examination department gives the number of the cars of grain from Sherman county that were found smutty in the first six months of shipment of the 1931 crop. One half of one per cent smut is sufficient to cause gockage and these cars all had that much or more.

Number of Cars of Oregon Smutty Wheat Received at Portland and Seattle During the First Six Months Marketing of the 1931 Crop.

SHERMAN COUNTY

Table with columns: Shipping Point, Soft Red Winter, Hard Red Winter, White, Mixed. Rows include Biggs, De Moss, Bourbon, Erskine, Grass Valley, Hay Canyon, Kent, Klondike, Miller, Moro, Nish, Rufus, Sandon, Sink, Thornberry, Wasco, Wilcox, Total.

SYNOPSIS OF STATEMENT OF THE FIDELITY MUTUAL INSURANCE COMPANY, LTD. (United States branch) of New York in the state of New York, on the thirty-first day of December, 1931, made to the insurance commissioner of the state of Oregon, pursuant to law.

Table with columns: Amount of deposit capital, Net assets, Total income, Total expenses, Value of assets, etc.

NOTICE OF FINAL SETTLEMENT

Notice is given that Anna B. Guyton, executrix of the will of W. F. Guyton, deceased, has filed her final report with the Clerk of the County court of the State of Oregon for Sherman county, and that Tuesday, the 2nd day of August, 1932, at the hour of ten o'clock a. m. of said day and the court room of the said court, has been fixed as the time and place for hearing all objections to said report.

Anna B. Guyton, Executrix.

That Feed Problem

We have let our stock of feed grains run down because of the low price of wheat. We have rolled some of the shriveled grain that has been threshed this year and find it to be an excellent feed for horses or dairy cattle. It is not as rich as ordinary wheat when rolled and is therefore a safer feed.

Wheat worth from \$5.00 to \$8.00 per ton can be rolled into a good feed and can be used to feed livestock more profitably than prepared feeds

OUR FEED MILL IS PREPARED

to take care of you in making this low grade wheat into something useful.
