MORO SCHOOL NOTES
Gordon Fraser, editor.

Followers of the fortunes of the basketball teams probably came to the games Friday night with the expectations of witnessing some exciting contests but it is doubtful if they expected two such closely contested and thrilling games.

In the opening game the Moro girls won out over fighting Grass Valley team 11 to 8. As the score indicates there were but a few baskets made although both teams took a good many shots. The guards of both teams checked so efficiently that

the forwards had but little chance to shoot without being rushed.

Moro led off in the scoring dropping in a basket as the game began. Grass Valley followed with a foul shot. Moro looped in another which was followed by a grass Valley field goal. The teams fought on even terms till near the end of the second quarter when Moro drew ahead a bit. The half ended 8 to 5.

The second half was even more closely checked by the guards of both teams each allowing but three points.

The Moro line-up: Forwards; Says Peetz, and M. Nahouse. Guards. Amidon, Johnson, Stephens. Substitutes: G. Nahouse, guard.

"Uses of Whole Wheat in Home."
Powdered skim milk is an inexpensive substitute for skim milk and can be used in such dishes as cocoa, juice cream and bread. Miss Case explains— With the addition of half a pound of butter to one pound of dry skim milk, one may obtain the equivalent of five quarts of whole milk. Beet sugar costs slightly less per 100 pounds than cane sugar and has the same food value and uses. Manufacturers sugar costs even less than beet sugar though it is somewhat coarser.

Where the home maker's labor has low value a large saving can be realized by making bread at home, suggests Miss Case. Another money saver is cooperative buying of large quantities of foods which may be handled with out waste.

Copies of the leaflet "Suggestions for Inexpensive Breakfast Dishes" may be obtained from the home economics extension service, Corvallis, or from any county extension office.

LIVING costs stayed UP

ELECTRIC costs came DOWN

Living costs in 1932 were 22% below 1923, when prices began to stabilize following the World war. It was not until 1930 that these costs began to decline from those of 1923. During this 10-year period the average cost of electricity to the homes and farms served by your Company constantly and sharply declined. In 1923 the average cost of a kilowatt hour was almost 8 cents. Today it is less than 3 cents.

While the Cost of Living in 1932 was 22% less than it was in 1923, the average Cost of Electricity was 63.5% less.
