

Wheat Advances Sharply On Account Of Money

Following the embargo against exports of United States gold, the British pound sterling advanced 40c in terms of American dollars. The currencies of other European countries also advanced with the result that bids for United States wheat in Pacific Northwest markets were only slightly below current local quotations. Price of native wheats in Europe and also of foreign wheats in Liverpool advanced sharply in terms of United States money while holding about unchanged in terms of local currency. German milling wheat at Hamburg was slightly lower in local currency compared with a week ago but about 12c higher in terms of United States money. French wheat was about unchanged in local currency but about 1 1/2c higher in United States dollars. Italian prices advanced the equivalent of about 4c in local currency and about 23c in United States money. At the close of the market April 21, native milling wheat was quoted at Hamburg at \$1.43 3/8, at Paris at \$1.11 1/2 and at Genoa at \$1.74 1/2 in United States currency. On the basis of current exchange, No. 2 Manitoba was quoted at Liverpool at 60 1/2 in United States currency, 63 lb. Argentine float at 48 1-8c, Western Australian wheat for May shipments at 57 1/2c and Southern Australian wheat float at 55c.

Seeding of American spring wheat was further delayed by cold weather but intended acreage has been over three fourths seeded in South Dakota, over half completed in Minnesota, with about ten percent of the work done in Montana and twenty percent in North Dakota. About 75 percent has been seeded in Washington and over 90 percent in Oregon. Wet weather has also delayed spring seeding in parts of the Canadian spring wheat area. Seeding in Russia is progressing rapidly with the work much further along than last season at this time. Nearly 17,000,000 acres of spring grains had been seeded to April 10, compared with only 5,000,000 to that date last season and about 3,000,000 acres two years ago.

Country mills and elevator stocks of wheat in the United States at the first of April were nearly 30,000,000 bushels larger than a year ago, according to official estimates which placed total stocks in this portion at 98,796,000 bushels compared with 69,327,000 bushels a year ago. These, together with market stocks and farm stocks as reported last week, gives a total supply, not including merchant mill stocks, of approximately 413,000,000 bushels or about 30,000,000 bushels less than a year ago. The bulk of the remaining supplies is in the spring wheat states and in the Pacific Northwest. Stocks in North and South Dakota country mills and elevators were nearly three times as large as a year ago and in Washington and Oregon more than twice as large as on April 1 last year.

Father (at supper table)—Well, Charles, how did you get along in school today?

Charles—Papa, my physiology book says that conversation at meals should be of a pleasant character. Let's talk about jig-saw puzzles or something like that.

COUNTY ENTERTAINS

Continued from page one.

A. C. Smythe, of the Smythe ranch in Gilliam county was a witness for the prosecution, and from his testimony it is apparent that Sherman county sheep owners have much to learn about handling sheep.

Attorney Dick, in his talk to the jury, spoke of the character of the "little girl" who was the defendant in the case, the sterling worth of her progenitors, the good name of the farmers of Sherman county and their financial difficulties, made fun of Mr. Smythe's record as a sheep man, recalled the apparent honesty of his witnesses and said that "if a lawyer can ever be guilty of telling the truth" the defendant should be cleared of this charge.

Prosecutor Updegraff reviewed the testimony in a few words after which the jury made their decision. What was it? Not Guilty, to be sure. Everybody knew that before it started. But it was a nice party.

WASCO HIGH SCHOOL NOTES

By Mary Jeannette Sargent

The Glee club and school orchestra, under the direction of Mr. McCulloch, presented a show Saturday April 21st, to raise money for the Wasco Public Library. The fore part of the evening was taken up with several acts of voodville and the last hour of the evening was given over to an old time minstrel show. The tumbling act and the voodville drew much favorable comment. The scene for the minstrel show was laid in a railroad yard with the members of the chorus wearing red caps and white coats, porter style. Soloists for the evening were John Johnson, Phil Andrews, Max Williams, and Malcolm Guy. Chester Watkins, Bob Ferrell, Leonard Fields, kept the audience in an uproar. The boys' quartette sang several numbers which were well received. The dialogue and song arrangement for the minstrel was by Mr. McCulloch. The evening's entertainment netted twenty dollars which was turned over to the Wasco Public Library.

The Wasco High School Orchestra received several compliments upon their numbers last Saturday evening and are planning to furnish music for several occasions other than weekly assemblies, in the future.

SALES TAX

Continued from page one.

All the families live partly on the farms and buying is at a low ebb. At this rate the sales tax collected from Sherman county would be \$10,000 per year. Added to our personal property tax loss we would have a total of \$19,000 per year going out of the county for state taxes under the sales tax. Now, including the elementary school tax, we have a little over \$40,000. Therefore Sher-

man county, from a tax standpoint would save about \$21,000 per year with a sales tax.

Under the sales tax the county would not have to pay the direct state tax of \$24,977. All state millages would be paid by the sales tax including the elementary school tax. This county would save \$41,719.74 from both the state tax and the elementary school tax if they remain the same in future years. The law states "In the event the revenues accruing to the state under this act shall exceed the amount required to offset the total state levy on property." There is no accurate way of telling how much money will be raised by the sales tax but take it at \$8,000,000. The state property tax replacement will take nearly \$8,000,000 of it. The millage for elementary schools, higher education, world war veterans, etc. are very likely to use the remainder so that the amounts to be returned to the counties may not be very large. One million so returned would bring this county \$8,250 on the present basis. It is quite probable that it would not exceed the loss the county would suffer from the personal property tax removal. Our saving would be approximately the present state tax and elementary school or \$41,719.74.
