**Two Kent Men Hurt**  
**In Auto Mixup**

Max Pluemke and Charles Garhammer of Kent suffered a serious accident on the Columbia highway east of The Dalles the night of the Fourth of July when after sideswiping another car their light roadster skidded off the road and down a fifty foot embankment.

Pluemke suffered a fractured skull and Garhammer was cut and bruised about the head. Both were taken to a hospital and are expected to recover.

and no one will receive any of the benefits of the movement unless they do actually reduce acreage.

The contracts between the farmers and the government will specifically state what cannot be grown. Other crops may be produced on the unused wheat land at the discretion of the farmer.

In lieu of the loss the farmer suffers by reduced acreage and his crop, the government is to pay him the entire income from the thirty cents per bushel processing tax less administrative expenses estimated at less than two cents per bushel. As this tax cannot be levied on any wheat but that milled in the United States and as that is assumed to be but five-eighths of the entire crop the farmer who reduced his crop from 2,000 bushels to 1,600 bushels would receive 28 cents per bushel on five-eighths of his crop in addition to the price he received when he sold it on the market. In this case he would get 28 cents per bushel on 1000 bushels or \$280 from the government for refraining from growing 400 bushels of wheat. This is 70 cents for wheat not grown.

A manager is to be appointed in each county and a board of directors will be elected to allot percentages to farmers. Each county will be charged with its own administrative expenses. Two cents per bushel is held to be a high figure by the leaders in the movement for in a 2,000,000 bushel county that amounts to \$40,000 which sounds several times too high even for counties having lots of small farmers.

Those who do not agree to reduce acreages will not receive any of the benefits of the processing tax. If the above example of the farmer is taken again and the farmer did not sign he would have raised 2,000 bushels instead of 1,600. If the price on the market had been fifty cents he would have received \$1000 for his 2000 bushel crop. Had he joined the movement he would have received \$800 for his crop plus \$280 from the government or \$1080 as a total. He would have saved the expense of raising the other 400 bushels and would have received \$80 more. Also in case the crop was better than it had been and the 160 acres of land produced 3200 bushels the farmer would be privileged to sell the total amount. If the price was fifty cents he would get \$1600 plus the payment on five eighths of his crop of \$280 or \$1880. Had he not joined he would have received \$2000 for the 4000 bushels he would have produced on the full 200 acres. Benefits will be paid for three years and the farmer is asked to reduce acreage but two years under the present plan.

As the movement is intended to be temporary no one will be permitted to join unless they do at the start
