

WHEAT MEETING

Continued from page one.
 tary of agriculture. This makes the plan more desirable to a majority of the farmers although some have expressed an opinion that if the reduction was greater the plan would be more successful.

Figures show that the average acreage for Sherman county for the past four years has been 121,081. A 15 percent reduction will throw 18,162 of these acres out of wheat production for the 1934 crop. The four year average production for the entire county for the 1929-32 period has been 14.9 bushels. Therefore the county will produce 270,614 bushels of wheat less if the average is maintained for 1934. For reducing this 270,614 bushels the county may receive, if all farmers sign, \$319,013.24 which is approximately \$1.18 per bushel. If the crop for 1934 is 18 or 20 bushels per acre instead of the average, the contracted acreage will not yield so large a price per bushel but will be slightly below a dollar per bushel.

It is not known when the final date for signing applications will be set, but as it is the intention of the department of agriculture to give the farmers their bonus this fall in time to seed it is thought that the work of gathering data about wheat production for the four year period must be hastened.

Next week the first meeting of the county board of directors will be held in Moro and organization of the county will be completed.

MILLION BUSHEL

Continued from page one.
 wheat has already been hauled to warehouses in the county. Quite a bit of wheat is being stacked or shedded on the farms either for truck shipment later in the year or because it may be sold for seed wheat. This is especially true of turkey red winter wheat of which very little has been received at the warehouses.

FROM DOWN UNDER

Austin Robertson, best of the Australian professional sprinters, is in the United States and has challenged Eddie Tolan, Ralph Metcalfe and all other American sprinters to meet him on the cinder path. In San Francisco he ran 100 yards in 9.6 seconds.

Children Will Drink Milk

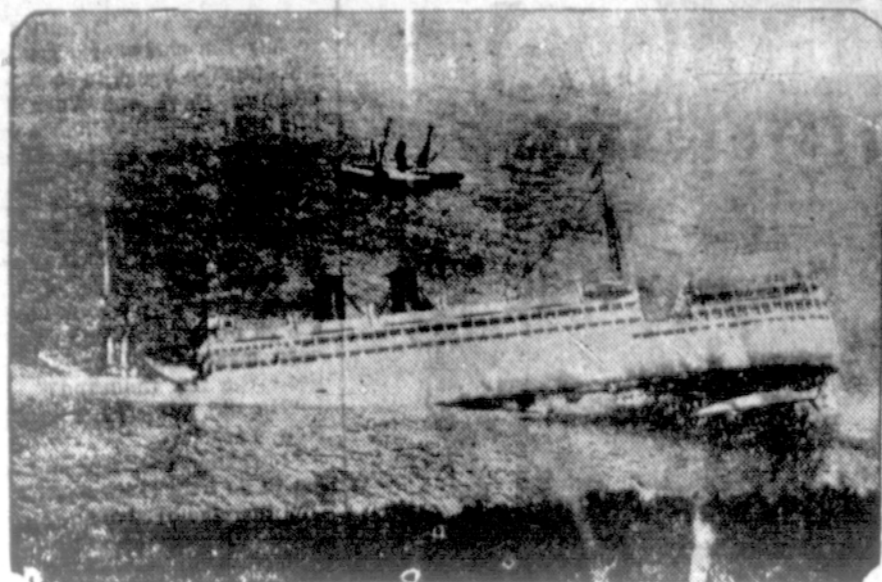

THE VERY IDEA!

"The Very Idea for Parents of Children who Don't Drink Milk" is the name of an attractive leaflet just brought to my attention. The information in it is so good and given in such a concise way that I am passing it on to you.

All young children do like milk. Do not let them lose their taste for this essential food. According to this leaflet, the points to remember in preventing children from disliking milk are as follows:

- 1 Teach children to drink from the cup before completely weaned.
- 2 Serve only whole milk which has been well mixed. Do not deprive your child of the essential food elements in both the top and the bottom of the bottle.
- 3 Help them with your attitude. Let them see that you like milk.
- 4 Never ask them if they want milk. Take it for granted that they will drink it.
- 5 Do not argue about milk. Ignore the child who states that he will not drink his milk. All children like attention and often fuss over their food in order to get it.
- 6 If the child who usually likes it, occasionally refuses to drink his milk, it may be best to disregard

Wrecked on the Rocks of Tangier

The French liner Nicolas Jaquet grounded on the rocks near Tangier recently. The passengers and crew escaped, but it was feared that the London insurance market would have to pay about a quarter of a million pounds in the event of total loss of the vessel.

this for a meal or two. Do not let it be prolonged to form a habit. Be certain that milk offered a child is fresh, sweet and cold. For the child who seems to dislike it, it is permissible to try ways to make the milk taste good to him. Some of these methods which parents have found successful are:

- 1 Letting the child pour his own milk from a pitcher.
- 2 Drinking milk through a straw.
- 3 Using a special cup or glass of an unusual size, shape or color.
- 4 Putting two or three raisins in the glass of milk.
- 5 Adding some vegetable coloring.
- 6 Adding a little chocolate syrup or a few drops of vanilla.
- 7 Making an egg nog.
- 8 Pasting a picture on the bottom of the glass to be discovered when the glass is emptied.

Milk in the bottle, pitcher or glass will never make the child grow. It must be gotten into him. Nutritionists have set the standard of one quart of milk daily for every growing child. It takes this much to furnish the amount of calcium or lime necessary to meet the demand of the growing body. Part of this quart may be eaten in custards, cereals, soups and other foods.

EGG NOG

One egg
 2 tsp sugar
 Two-thirds cup milk
 Few grains salt
 Few drops vanilla
 Beat egg, add sugar and salt. Add milk and flavoring and mix well. White of egg may be beaten separately with half the sugar to garnish the top.

Jack—My idea of a good wife is a woman that can make good bread.
 Jill—My idea of a good husband is a man that can raise the dough in the hour of knead.

Dad—The road to success is apt to be a long, hard one, my boy.
 Son—Aren't there any short cuts, Father?
 Dad—Yes; our prisons are filled with men who took the short cut.

"Do you tell your husband everything?"
 "No; he won't listen to me more than an hour at a stretch."

Domestic Tranquillity

Sanders—Before we were married, just 20 years ago, my wife and I agreed that I should decide on all minor ones.
 Herman—How did it turn out?
 Sanders—So far no major things have come up.
