big, rangy and fast enough to keep Moro from returning a punt. Johnson, Webb and Cushing, descendants of the families whose offspring have made up Dufur teams for years, were a smooth working set of backs.

The little orange team played game football throughout the game and were still trying in the end although badly beaten from the score board point of view. Barnes did excellent kicking from a position close to the line of scrimmage. Fraser and Ruggles backed up the wavering line and prevented gains through that sector. Powell, playing his second game, and Thompson, both little backs did some good tackling of the Dufur ball carriers.

HI-WAYS TO HEALTH

HOW TO MAKE MILK SOUPS

Milk may be used with many vegetables to make nourishing soups. Make them for your children! A milk vegetable soup is one of the best foods you can give your family for dinner or for supper. It is also one of the best ways to help your child consume his daily quart of milk. Milk is recognized by scientists as the most valuable and yet one of the cheapest foods for health.

Milk soups may be made from many different vegetables such as lentils, beans, dried peas, corn, celery, onions, spinach, potatoes, tomatoes. Either left over vegetables or freshly cooked ones may be used. Use only one vegetable at a time. This provides opportunity to make different kinds of soups and prevents children, especially, from refusing to eat them.

Cook any vegetable selected with a few slices of onion until soft. Chop finely or rub through a strainer according to the vegetable. Add the chopped or strained vegetable and juice to the white sauce (recipe below).

Lentils, split peas or dried beans are excellent for soups. They are both nourishing and cheap. Wash such vegetables thoroughly and soak over night. Cook with onion in the water in which they were soaked. Do not add soda to the cooking water. Rub cooked vegetables through a strainer.

In making tomato soup use one-eighth teaspoonful of soda for each cup of juice. Stir the soda into the juice just before adding it to the white sauce to prevent curdling of the milk. Serve at once.

WHITE SAUCE

Two tablespoons butter or other fat
One tablespoon of flour for each cup of milk and vegetable juice used
One teaspoon salt
Two cups milk
All measures are level

Use a double boiler for making white sauce. Melt the fat, add flour, and stir until well mixed. Gradually add the milk, stirring until smooth and slightly thick. Add the chopped or strained vegetables and juice to the thickened milk. The amount of vegetable necessary varies with the kind and flavor, usually 1 cup of vegetable for each two cups of milk. If the soup is too thick after the vegetable is added, milk or vegetable juice can be used to make it the desired consistency. Season to taste with salt and butter.

This same white sauce made a little thicker may be put over any vegetable and make what is known as creamed vegetable. Two level tablespoons of flour for every cup of milk and vegetable juice make the sauce a desirable consistency for creamed vegetables.
