

Black Widow Spiders Not Often Deadly

The sudden infestation of Black Widow spiders that have been reported from many parts of eastern Oregon has brought many inquiries concerning their identification and the effect of their bite to Dr. Don C. Mote, entomologist of the Oregon Experiment station.

The three distinctive features of identification given by Dr. Mote are the glossy black body with a round abdomen about the size of a pea; long strong black legs that stick up above the back somewhat like those of a grand-daddy long legs; and finally a distinctive red marking on the lower part of the abdomen of the adult female.

The spider is roughly described as in the shape of an hour glass, these red markings may be in a number of different forms or may be rather indistinct, warns Dr. Mote. At times two triangular red marks may touch to form an hour glass shape, while again there may be four spots instead of two or the two may not touch.

Though the ordinary spider does more good than harm in eating insects, it is a safe practice in regions where the black widow is known to exist to kill any black spider, says Mote, but in doing so to be careful not to be bitten.

The bites of the black widow do not prove fatal on humans so far as authentic records go, though there are some reports of death in the southwest that may be true. The distress caused by the poison is so great, however, as to warrant every care to avoid being bitten. Several days in the hospital is a not uncommon result of the bite of the black widow. There is no specific treatment, according to medical men, the only thing to do being to put the patient to bed and give supportive treatment.

The spiders are not known to willingly attack man unless one comes in contact with a web where the female has a sack of eggs. The spiders are found most frequently in outdoor toilets, old sheds, barns, and wood or rock piles.

Use Of Milk Needs Increasing

Preliminary reports from the voluntary city surveys of milk consumption shows that the a-

Table with financial data for THE AKINA CASUALTY AND SURETY COMPANY OF HARTFORD, CT. Includes sections for INCOME, ASSETS, LIABILITIES, and BUSINESS IN OREGON FOR THE YEAR.

mount now in use is far below the minimum requirements for general health, says the consumers council of the AAA which is conducting the study among school children of the principal cities. A news release from Washington received at O. S. C. states that the Portland, Oregon, committee found that consumption of milk and other dairy products is decidedly below even the cheapest possible adequate diet.

NI-WAY TO HEALTH by ADA R. MAYNE OREGON DAIRY COUNCIL

Summer days are usually busy days for the homemaker. With fruit to can, the vegetable garden and the flowers needing to be tended and with the family home from school, it means long and busy days in most homes.

As a consequence it becomes increasingly hard to spend much time in the kitchen over the preparation of meals. Short cuts in the meal planning are in order then during the summer days as long as one is sure to include an abundance of the protective foods, milk and its products, fruit, vegetables and eggs.

- Creamy Baked Rice With Eggs
One quart milk
One-half cup washed rice
One-half cup grated cheese
Five eggs
Scald milk, add rice and season to taste.

SUMMONS

Levi Chrisman, Plaintiff, vs Bernard Nys and Agnes Nys, husband and wife, George W. Edwards and Mary A. Edwards, husband and wife, Thomas Silverthorn and Jane Doe Silverthorn, husband and wife, Defendants.

To George W. Edwards and Mary A. Edwards, husband and wife, Thomas Silverthorn and Jane Doe Silverthorn, husband and wife: IN THE NAME OF THE STATE OF OREGON, You are hereby required to appear and answer the Complaint filed against you by Plaintiff in the above entitled court and cause within four weeks after the 8th day of June, 1934, said date being the date of the first publication of this Summons, and if you fail so to appear and answer, you will be in default and waive thereof, and the Plaintiff herein will apply to the above entitled court for the relief prayed for and demanded in its Complaint, filed herein, to-wit:

For a judgment and decree against defendants Bernard Nys and Agnes Nys, husband and wife, and each of them for the sum of \$1600.00 with interest thereon from the first day of March, 1929, at the rate of 10 per cent per annum; and for the further sum of \$200.00 attorney's fee in this suit and for Plaintiff's costs and disbursements; and that the mortgage described in Plaintiff's Complaint be foreclosed and the Defendants and all persons claiming by, through or under them, be forever barred and foreclosed of all right, title, interest or equity, save the statutory right of redemption in and to said real property covered by said mortgage and more particularly described as follows:

The South half of the North half and the Northeast quarter of the Southeast quarter of Section Twenty, and the East half of the Northwest quarter of the Northwest quarter of Section Twenty-one in Township Four, South of Range Fifteen, East of the Willamette Meridian, in Sherman County, Oregon

The Southeast quarter of the Northeast quarter and the Northeast quarter of the Southeast quarter, of Section Nineteen; the North half of the Southwest quarter, the Northwest quarter of the Southwest quarter of the Southeast quarter of Section Twenty and the Northwest quarter of the Southwest quarter of the Northeast quarter of Section Twenty-one in Township 4, S. R. 15, E. W. M. in Sherman County, Oregon.

You will take notice that this Summons is served upon you by publication thereof by order of Hon. Carl Hendricks, Judge of the Circuit Court in and for Sherman County, Oregon, entered herein on the 29th day of May, 1934, and by said order directing this Summons to be published in the Sherman County Journal, a weekly newspaper published at Moro, Sherman County, Oregon, for once a week for a period of not less than four consecutive weeks and for five issues of said newspaper.

Date of first publication June 8. CECIL CHRISMAN Attorney for Plaintiff Willows, Oregon. Date of last publication July 6.

"25 cents per acre Fuel Saving with our 'CATERPILLAR' DIESEL 50" Below is an unsolicited letter from a power user telling of the savings made with a "Caterpillar" Diesel in field work. Moro, Oregon May 15, 1934 Loggers & Contractors Machinery Co. 211 S. E. Madison St. Portland, Oregon Gentlemen: This spring we purchased a "Caterpillar" 50 Diesel Tractor from you and after doing all our season's work we are glad to state that the tractor has been very satisfactory in every respect and the most economical power investment we have ever made. So far we have operated the engine plowing 2405 acres, harrowing 600 acres and seeding and harrowing 150 acres more. Our total fuel consumption on the above work was 2700 gallons. The total fuel cost was \$155.50 The total amount of fuel used per acre in plowing was 1.099 gallons as compared to our former record of 2.5 gallons per acre with our gas engine. This represents a 25 cents per acre fuel saving with our Diesel 50. On this basis we figure that our Diesel 50 will pay for itself in three or four years out of our fuel saving alone. We believe a "Caterpillar" Diesel tractor will go a long way toward helping an eastern Oregon wheat farmer show a profit on the present price of grain. Very truly yours, Peters & Ginn By Harold Ginn
