

DRUNKEN DRIVERS

(Continued from page one)

offense in the first six months and in the same period in 1931 only 74 were listed. The gain in 1934 was 54.4 percent over 1933, 95.7 percent over 1932, and 267.6 percent over 1931.

Some of the increase over the first year listed was due to a change in the state laws requiring city courts to forward all convictions in drunken driving cases to the secretary of state, and greater cooperation of justices of the peace in reporting convictions during the last year. Has been partially responsible also for the larger number of cases brought to the attention of the state department.

For a considerable period of time many court officials were apparently not aware of the requirements of the law which makes it mandatory on the secretary of state to revoke the driver's license of any person convicted of driving while intoxicated, but this condition has been remedied and all courts are reporting to the state the convictions in such cases so that the required license revocations may be made.

A total of 1,032 persons have had licenses revoked from July 1, 1931 when the more stringent laws affecting drivers became operative, to June 30, 1934.

Panhandler: Can you give me a little help? My wife is sick in bed.

Fighting Chinch Bugs in Corn Belt

Dr. C. J. Drake, Iowa entomologist, and Ray Murray, Iowa secretary of agriculture, are shown inspecting the effectiveness of the crude oil barrier against the advance of chinch bugs in the corn belt of southern Iowa. The picture illustrates the effect of the crude oil barrier, and of the bugs. The denuded area at the right was once part of the same flourishing cornfield.

Citizen: I could give you a job next week.

Panhandler: That would be too late. She will be able to work herself then.

Is it true that your wife has brain fever?

Why no. But she has the next thing to it.

What's that?

Hat fever.

Diner—Do you serve crabs here?

Waiter—Sure. Sit down.

News from the Wasco Community

Herb Decker of the Farmer's National Warehousing Corporation was in Wasco Tuesday on business for the company.

Wm. Neabit is ill in bed since returning from a fishing trip last week with Cap Scott and Gus Peterson. His ailment has not been diagnosed.

There are reports that wheat is being stolen from the fields around Wasco and while some farmers are certain that they have missed wheat no one has been arrested.

IN THE CIRCUIT COURT OF THE STATE OF OREGON THE COUNTY OF SHERMAN

THE OREGON - WASHINGTON JOINT STOCK LAND BANK of Portland, Oregon, a corporation, Plaintiff,

versus
JAMES HARVEY FERRELL and COUNTY OF SHERMAN, a Municipal Corporation of the State of Oregon, Defendants.

NOTICE OF SHERIFF'S SALE

By virtue of the writ of execution and order of sale duly issued out of the Circuit Court of the State of Oregon for the County of Sherman, on the 7th day of July, 1934, pursuant to a decree entered in said Court, July 5th, 1934, in a suit wherein The Oregon-Washington Joint Stock Land Bank of Portland, Oregon, is plaintiff, and James Harvey Ferrell and County of Sherman, a Municipal Corporation of the State of Oregon, are defendants, said writ being directed to me commanding me to make sale of the real property hereinafter described, I will on Saturday, the 11th day of August, 1934, at 10:00 o'clock a.m., at the front door of the Court House of Sherman County, in the City of Moro, State of Oregon, offer for sale and proceed to sell to the highest bidder for cash in hand the following described real property, situate in Sherman County, State of Oregon, to-wit:

Southeast Quarter of the Northwest Quarter (SE 1/4 of NW 1/4) and East Half of the Southeast Quarter (E 1/2 of SE 1/4) of Section Seven (7) and the West Half of the Northeast Quarter (W 1/2 of NE 1/4) and the West Half of the Southwest Quarter (W 1/2 of SW 1/4) of Section Eight (8), Township One (1) North, Range Nineteen (19) East of Willamette Meridian, and that certain piece or parcel lying and being in said section, Township and Range and more particularly described as follows: Beginning at a point 80 rods East of the Northwest corner of the Southeast Quarter of said Section Eight (8), Township One (1) North, Range Nineteen (19) East of the Willamette Meridian, thence

East 70 rods; thence South 160 rods; thence West 70 rods; thence North 160 rods to the place of beginning, containing all told 350 acres more or less

to satisfy the sum of Four Thousand Six Hundred Seventy-Two and 68/100 Dollars (\$4,672.68) with interest thereon at the rate of six per cent (6) per annum from the 5th day of July, 1934; and the further sum of One Thousand Two Hundred Eighty-Two and 98/100 Dollars (\$1,282.98) with interest thereon at the rate of eight per cent (8) per annum from the 5th day of July, 1934; and the further sum of \$500.00 attorney's fees, together with the costs of said suit taxes at \$10.40, and the costs of and upon said writ.

Hugh Chrisman
Sheriff of Sherman County, State of Oregon

HI-WAYS TO HEALTH
by ADA R. MAYNE
OREGON DAIRY COUNCIL

Sour milk, like sweet milk, has an interesting and important place in the diet, not only because it is a wholesome and nutritious food, but because of the lactic acid in it. The consumption of sour milk of lactic acid milks has long been considered a means of maintaining bodily health and vigor and thus prolonging life.

The souring of milk is due to the lactic acid forming bacteria which are present in milk. These bacteria, besides souring milk, are antagonistic to most of the common bacteria and because of this sour milk is commonly looked upon as having antiseptic properties. The antiseptic value of sour milk is believed by authorities to be the means of prolonging life among the people who use it in appreciable amounts.

Sour milk and cream are widely used in cooking and like sweet milk add to the food value of any dish. The rich texture of sour milk gives a smoothness that no other liquid produces and its acid content acts as a leavening agent. Do not throw away milk or cream that has soured but rejoice in the fact that with it you can prepare nutritious and appetizing dishes. Sour milk lends its slightly tart flavor and healthful qualities to many favorite recipes.

Sour Milk Griddle Cakes
3 cups flour 3-4 tsp. salt
2 1-4 cups sour milk
1 1-2 tsp. soda 1 egg

Mix and sift flour, salt and soda. Add sour milk. Stir in the egg, well beaten. Bake on hot griddle and serve with butter and syrup.

Spice Cake
1-2 cup butter 1 tsp. vanilla
2 cup flour 3 tbsps. baking powder
1 1-2 cup brown sugar 2 eggs
3 cup thick sour milk
1-4 tsp. each nutmeg & allspice
1-2 tsp. soda 1 tsp. cinnamon
1-2 tsp. salt and cloves.

Cream butter, add sugar and blend well together. Add beaten eggs and vanilla and mix until smooth. Add the sour milk in which the soda has been dissolved, then the flour, sifted with baking powder, salt and spices. Beat until smooth. Place in 2 buttered and floured layer cake pans and bake in a moderate oven for about 25 minutes. Cool and put layers together with Raisin-Cream filling then frost the entire cake with the same mixture.

Raisin-Cream Filling for Cake
1 cup sugar 1 cup sour cream
2 tbsps. cornstarch (omit if cream is thick) 4 egg yolks
1 cup ground raisins
2 tbsps. butter 1-2 tsp. vanilla
1-8 tsp. salt.
Mix sugar and cornstarch (when used) and add to the cream. Add beaten egg yolks, raisins and butter and cook over hot water or very slow fire until thick, stirring constantly. Remove from fire and add vanilla and salt. Cool before spreading.

After Harvest WHAT?

Now that harvest will soon be over—what steps will you take to assure yourself of a good crop for 1935?

Field crops need a well-tilled, deeply-broken soil. Their roots are fine and delicate. Soil should be well enough broken so that these tiny roots can penetrate it easily and quickly. They must develop downward as the top soil dries out. Well-broken soil enables rain to seep downward easily before it runs off into the lower levels of your land. Water, so stored, can be drawn upon later in the season by the root system of your crop.

Your soil should also be broken up to a good depth in order that it may be properly aired. Nearly all crops require a liberal amount of air in the soil to enable them to properly manufacture the soluble foods required by the root system.

Killifer Chisel — Ideal for Local Soil

A Killifer Grain Chisel is the ideal machine for working in hard dry soil. Cutting the soil to a depth of 15 inches, it loosens and opens the hardest ground in a way which will put new vigor into your next year's crop. Into the deep cracks made by this tool—air, rain, and snow will flow during the winter months, forming a reservoir from which a deep, vigorous root system can develop to sustain a crop in 1935, even though it be a tough dry year.

The G type Killifer chisel with its unusual clearance in stubble is making a record for itself wherever used. It is the ideal tool for many spots in Wasco, Sherman, Klickitat counties. See the Killifer Grain Chisel on display at our local office. We will be glad to explain its mechanical details to you.
