A delicious Fresh Fruit Salad! And what could be more appealing on a warm day? Salads are always an attractive part of the meal but this is the time of the year for featuring them. Not only because they appeal to the summer appetite but because our markets and gardens offer every thing to make the perfect salad.

Fresh peaches, apricots, grapes cantaloupe, watermelon, and even some of the ever bearing types of berries are available now. These in various combinations chilled, attractively arranged on crisp lettuce leaves and topped with a delicious dressing, make a picture as well as a food fit for a king.

Fresh vegetables, too, are plentiful and of so many different varieties. Tomatoes, which are a favorite with everyone, are colorful and lend themselves to many different combinations. Simple and attractive salads, such as tomato and cottage cheese, can be easily made and served as the main course for the lunch or supper. Chopped olives, green onions, or chives added to the cottage cheese will give it an unusual and good flavor. With a salad of this kind no dressing is necessary but for most salads the dressing has a place of importance.

A variety of salad dressings should be the rule. The same dressing used too often gives a sameness to salads and detracts from the flavor of the other ingredients. Dressings are combined with salads not only for flavor and appearance but for the added food value. Without the salad dressing many salads would give the body very little energy food, and as they have come to be such an important part of the menu that food value is necessary.

The following dressings will give new interest to your salads:

Fruit Salad Dressing
 3 tbsp lemon juice
 3 tbsp orange juice
 6 tbsp pineapple juice
 1-4 cup hot water
 1-2 cup sugar
 2 tbsp cornstarch
 2 eggs

Mix the dry ingredients. Add fruit juice and water slowly. Cook over hot water 15 minutes. Pour

Winter or Summer Positive Starting

"Caterpillar" Diesel Engines start positively . . . because they employ an independent 2-cylinder engine with ample power to turn the Diesel engine over rapidly and for as long a period as necessary. No electrical equipment to deteriorate during long winter lay-off's. No intricate valves to get out of order. No part of the starting engine effects the operation of the Diesel. No part of the Diesel effects the operation of the starting engine. They are independent units. Starting a "Caterpillar" Diesel involves hand cranking the starting engine, a short warm-up for the Diesel engine . . . then throw in the clutch and go to work.

A good cigarette, too needs Balance—

And that's why the tobaccos in Chesterfield are carefully balanced one against the other . . . not too much of one—not too little of another.

We take the right amounts of the right kinds of four types of tobacco — Bright, Burley, Maryland and Turkish.

It is this balancing of tobaccos that makes Chesterfields milder and makes them taste better.

Chesterfield... the cigarette that's Milder
Chesterfield... the cigarette that TASTES BETTER
