Safety Glass Law Talked For Oregon

Designed to eliminate one of the most serious causes of injury in an automobile smashup—splintered, razor edged glass—the Oregon state legislature at a proposed session in September may consider a measure which would require all new automobiles to be equipped with safe, shatter proof windshields and windows.

The safety glass law has been adopted in 21 states.

Virtually all of the new laws follow a uniform pattern. It was pointed out in that they require safety glass of a type approved by the state motor vehicle authority as a prerequisite to registration of new vehicles manufactured or sold in the state after a certain specified date, or on school buses and common carrier passenger vehicles operating after a certain date.

Try Journal advertising, it pays.

A large number of the Kent residents attended the three days of the Sherman county fair at Moro last week, bringing home their share of ribbons in open class and 4-H club work.

TREATING WHEAT ?
CERESAN
New Improved Ceresan has more good points than any other dust—and costs you LESS to use

Consider everything, and you will treat seed wheat with New Improved CERESAN!

It is cheaper to use than other dusts; costs less than 3c an acre at the average seeding rate. It is recommended by the U. S. Dept. of Agriculture. It can be applied in a gravity treater without labor of turning. Does not clog or injure drill. Little or no free dust to breathe in treating—for all you use is 1/2 ounce per bushel of seed! Yet you get better control of stinking smut, and frequently a bigger yield. The average acre increase in tests has been 1.13 bushels on clean seed, even more on smutted seed!

Use New Improved CERESAN on barley, too. Costs less than 4c an acre and controls covered smut, stripe, black loose smut, seedling blight. Ask dealer or write to Bayer-Semesan Co., Inc., Wilmington, Del., for free Cereal Pamphlet 102-A

SAT-IS-FY. Something that pleases, gives satisfaction; something that just suits. For example, you are pleased with a dress. As applied to cigarettes, it means one that is MILD—that is not harsh or bitter; one that TASTES just right.
