

Reception For Wasco Teachers Planned

Many Visitors From California Call on Wasco People

A reception for teachers and patrons of the Wasco school, including friends, will be given on the evening of Wednesday, September 11 at Fraternity hall. It will be sponsored by the Women's Study club and the Tuesday Afternoon study club.

Dorcas members meet on Thursday of each week in the basement of the Christian church and spend the afternoon quilting.

Mrs. Vinton Watkins is in The Dalles hospital. Her two children are staying with their grandparents, Mr. and Mrs. W. D. Watkins on the farm.

Mrs. M. Potter of Oakland, California, is a guest of Mrs. A. B. Potter at Klondike.

Mrs. Gus Hartman and son visited last week in The Dalles at the home of her mother, Mrs. Burkart.

Mr. and Mrs. Lloyd Hennagin were overnight guests Saturday at the home of the former's parents Mr. and Mrs. George Hennagin at Moro.

Mrs. Dick Yocum was the one for whom the farewell party was given August 22nd instead of Mrs. Leo Watkins as previously reported (Mrs. J. A. Butler is visiting this week in Portland).

House guests at the George Lamborn home over the week end were Mrs. Lamborn's niece and husband Mr. and Mrs. Thomas Price of Emporia, Kansas.

Mr. and Mrs. Floyd Brown of Trout Lake, Wash., spent labor day here and Mrs. Myron Halse returned home with them after spending a week visiting in that community.

Mrs. Marie Cooper has been absent from the farm visiting with relatives in Portland.

Mr. and Mrs. P. A. Everett and son, Bobby, of Klamath Falls were guests of the former's parents, Mr. and Mrs. H. E. Everett.

Mrs. Wilma Sheets, accompanied by her daughter Beryl spent the week end in Portland.

Wes Wilde drove to Banks and brought his son, Kenneth home from his grandmother's where he has been visiting.

Mrs. McArdell and grandson, Jolen McNeil of St. Paul, Minn. and Vilas Winther of Seattle are house guests of Mr. and Mrs. Geo. Drinkard and family.

Mrs. Wayne of Burlingham, Cal., sister in law of Mrs. R. A. McPherson spent the week here and Mr. and Mrs. Earl Brown of Portland also visited at the McPherson ranch.

John and Olive Robinson, Sarah Stalcup, James Maddox and Mr. and Mrs. William Clothier drove to Lost Lake over labor day.

Ed Feldman and wife spent labor day at Taft.

Mr. and Mrs. G. H. Sundby and son Hubert of Portland visited several weeks at the home of Mr. and Mrs. Otis Royse.

Delta Grey attended teachers institute at The Dalles Tuesday. She will teach at Friend this winter.

Margaret McKee will leave Saturday to take up her duties as seventh and eighth grade teacher at Arlington.

Mrs. Burres and daughter, Rheata spent the week end at Vancouver, visiting with Mr. and Mrs. Orville Burres.

Mr. and Mrs. Kenneth McCafferty and Betty were at Battle Ground for the vacation period.

Bill Dodson of Walla Walla visited at the Huckin home this week.

Friday Miss Lillian Van of Boise visited at the home of Mrs. Lydia Darby.

Betty Brown of Portland has returned to her home. She drove down with Mr. and Mrs. Floyd Ford of that city.

W. E. Tate and wife have returned to Wasco after a trip to California and Reedsport and Grants Pass.

Guests of Mrs. J. A. Butler this week end were Mr. and Mrs. Lee Hull and daughter, Marceline and Mr. and Mrs. Francis Soden of Canon City, Colorado.

June Hines fell Thursday of last week and broke her wrist. She was roller skating. She was taken to the Dalles for treatment.

Kendrick, Pierre and Bucly Barnett have returned to Portland after visiting their aunt, Mrs. Marie Cooper for a few days.

Mr. and Mrs. Leo Watkins and Harry Richelderfer drove to Glenwood to spend labor day.

WHEAT CONTRACT

(Continued from page one) visions for specific basic commodities. As protection to consumers the AAA is not authorized to maintain prices above parity levels.

A few miscellaneous provisions in the amendments encourage producer cooperatives, appropriate funds for elimination of diseased cattle and to carry out the existing options for the purchase of sub-marginal lands, and provide means of stimulating agricultural exports as well as domestic consumption.

Father: "Fancy a 'big boy like you being afraid to sleep in the dark."

Five-Year-Old: "It's alright for you, you've got mother to look after you."

Mother—What is it, dear?
New Bride—Jack has gone on a hunger strike. He won't eat a single thing I cook.

Mo—Why in the world do you let your wife go around everywhere bragging that she made a man of you? You never hear my wife saying that.

Lees—No. But I've often heard her say she tried her hardest to do so.

Rufus—Tell me what time it is, Goofus. I've got to catch that 2:30 train and I'm going to have a hard time to make it.

Goofus—Don't worry Rufus. It's only 2:10. I set the clock back 30 minutes so's to give you more time.

Horse Show and Rodeo To Head Entertainment at Exposition

Here are illustrated jumping and bulldogging, two of the most fascinating events of the Indoor Horse Show and Rodeo.

This year the Pacific International Livestock Exposition celebrates its Silver Anniversary, October 5 to 12 in Portland, Oregon. Heading a large and varied program of entertainment will be that ever popular combined Horse Show and Rodeo. Spectacular and thrilling events have been scheduled with liberal cash awards for winners.

The Rodeo will be the final of all western shows this year at which the grand champion cowboy will be chosen. Only the best of America's cowpunchers and buck-springs will be seen in action. Events will include bronc riding, bareback riding, bull dogging and brahmin steer riding with cash awards of approximately \$5000 for winners.

Veteran arena directors will have charge of events, assuring a first class program of all performances. Events include a

promised with accompanying spills and thrills.

Homer Holcombe, World famous clown, will again add his thrilling, daring acts and inject into the Show those extremely delightful and humorous scenes so well liked by both youngsters and grown-ups.

Exposition officials predict that this year will see the breaking of all recent records for entries and attendance.

Industrial exhibits are expected to exceed in size all previous years. Included will be dairy products, land produce, wild life, fish and game, wool and mohair, and many others.

In addition, there will be nine-teen complete shows staged under the mammoth eleven acre Exposition building roof. These will include dairy cattle, beef, swine, fat stock, draft horses, sheep, goats, dogs, poultry and pet stock, 4-H Club and Smith-Hughes vocational exhibits.

Cooking World's Largest Omelet

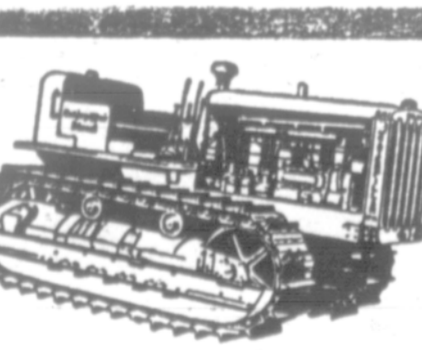

Gov. Clarence D. Martin of the state of Washington stirring the world's largest omelet, prepared and served as a feature of the annual celebration at Chehalis, center of the nation's outstanding egg producing areas. The omelet, which required 7,000 eggs, was mixed in a huge concrete mixer before being poured into the giant skillet.

Food Consumed by an Elephant

If an elephant ate the same amount proportionally as a mouse it would consume ten tons of food daily. Actually it eats only about 100 pounds.

Cause of Growling Intestines

Growling or rumbling of the intestines is known as borborygmi. It is caused by the formation of gases in the digestive tract and very little can be done to stop it.

Fall Plowing Held Bad Thing For Dry Lands

Chiseling of Land Found Helpful in Some Places

U. S. Department of Agriculture, Soil Conservation Service, Pullman, Washington, September 1935—Considering the problem of erosion on plowed lands during the winter snows and fall and spring run-off periods. Soil Conservation Service officials for the Pacific Northwest today advised against turning under burned-over grain lands with a moldboard plow this fall—if the land is to be used in a summer-fallow—grain rotation. Stubble burning this fall was

Tracks That Grip

Ever watch a track-type tractor spinning its tracks on a hard pull and hear an onlooker say, "Boy, that's power?" Just the opposite! When a track grips, that's power. When it slips, it's lost power. That's why "Caterpillar" engineers are so particular about balance... between engine... tracks... weight. That's why "Caterpillar" engines develop all the power the tracks will convert into pull... and no more.

O'MEARA SUPPLY CO.

HI-WAYS TO HEALTH by ADA R. MAYNE OREGON DAIRY COUNCIL

A visit to the county fair just recently made me realize that apples are in season again. There were rows of luscious looking ones of many varieties and colors. Green yellow and red combined to make the fair booths festive and tempting.

Apples are palatable, healthful and inexpensive as a food. They should be ripe when used because when unripe they have a high starch content, which is gradually changed to sugar during the ripening process. Because of the quantities eaten, apples are considered a fairly good source of the vitamins, especially vitamin C.

Apples are capable of greater diversity in serving than most any fruit and contribute to the menu for any meal during the day. The most simple of all apple dishes is, of course, applesauce and when served with cream or icecream it is a favorite with everyone. When you have exhausted your family's wholehearted interest in applesauce and are looking for new ways of serving apples try the following recipes:

Apple Marlow

1 cup apple juice
20 marshmallows
1 cup apple pulp
2 tablespoons lemon juice
1 cup whipped cream
Heat the apple juice and marshmallows in top part of double boiler until marshmallows are melted. Remove from stove, add apple pulp and turn into refrigerator tray to cool. Adjust refrigerator temperature to coldest setting. When mixture begins to stiffen, turn into a

chilled bowl. Beat with rotary egg beater, add whipped cream. (Taste mixture as it may be necessary to add more sugar, depending on sourness of apples.) Return to refrigerator to freeze. Serves 6 to 8 persons.

Apple Compote

One and a half to one and three fourths Tart apples
One cup water
Three fourths to 1 cup sugar
Two tablespoons lemon juice
Two in. stick cinnamon f. g. salt
One grated rind of lemon
Cook the sugar, salt, water, and cinnamon together, 5 minutes. Add the washed, cored apples, pared or not, and cook slowly uncovered, turning frequently until tender. Apples should retain their shape. Remove carefully to serving dish. Discard stick of cinnamon, add lemon juice and grated rind to sirup, and pour over apples. Serve hot or cold with cream.

Apple Dumplings

2 cups pastry flour
5 1-2 tablespoons butter
About 6 apples
2 tablespoons baking powder
1-2 cup sugar
2-3 cups cold milk
1-2 tap. salt
1 to 2 tablespoons nutmeg
Cut butter into flour, baking powder and salt. Add milk to make soft dough. Roll thin and cut in squares. Place about half of one whole peeled apple, depending on size, in each square and sprinkle corners over the apple and bake in moderate oven. Serve with coffee cream.

discouraged since it destroys a valuable soil binder which adds fiber. This destruction of fibrous material breaks down the soil structure, thus causing it to puddle and wash more severely.

Certain types of fall tillage were recommended especially when grass alfalfa or pea-sweet clover seedings are planned for the following spring.

Tillage with the moldboard type of plow erodes badly during the winter and spring seasons if the stubble has been burned. If the stubble has been left and turned under, less erosion takes place than if the stubble was burned. More erosion will occur if the soil is tilled than if left undisturbed during the winter.

Best success with the moldboard plow will occur if the furrow slice is turned on edge so that the straw is partly under and partly exposed. The best erosion control condition is a rough surface condition.

Fall tillage with a disk tiller was recommended as a less erosive tillage method than moldboard plows. This tillage method will mix the stubble and previously spread straw with the top soil and will increase its porosity as well as facilitate seed bed preparation. The disk tiller has three advantages over other types of disk plows, since its disks are larger, the machine

heavier, and there is more spacing between disks.

Tillage with a chisel has given satisfactory results in many parts of the country. The chisel tends to loosen the soil to a slightly greater depth by heaving it from beneath, thus leaving the topsoil on the surface and the subsoil beneath.

This heaving-loosening action of the chisel not only leaves all stubble and debris near the surface, but also leaves most of the weed seed on top. As a result of being in the warmest, thinnest layer of soil, nearly all the weed seed germinate at once, greatly reducing the labor and expense of weeding.

Various commercial tools are available for the chiselling type of tillage. The cost of the chisel can be considerably reduced by con-

verting a moldboard plow into a chisel by removing the moldboard units and attaching to the beams two-inch chisel points that can be made by any blacksmith.

SWALLOW THIS!

The youth who swallowed a campaign button is much better, but there is no improvement in the condition of those who swallowed campaign promises.

—Se. Joseph (Mo.) News-Press.
