## Banish laundering drudgery with an all-electric home laundry!

Says AUDREY HERINGTON

Home Service Director for Pacific Power & Light Company

There's no sense in slaving over a wash tub and ironing board week after week. No sense in heating up your entire house just for hot water. Only a few cents' worth of electricity a week will do all your laundering in an electric washer and an electric ironer. You can have plentiful hot water whenever you turn a faucet, day or night, winter or summer, for a sum that will be scarcely noticed in almost any family's budget.

Plan now to make yours an all-electric home laundry. Electric washers, electric ironers and automatic electric water heaters are very reasonably priced, and they may be purchased on convenient monthly installments.

New washers offer more for price than ever before!

An efficient, new electric washer

The new electric washers now on display at dealers and in P. P. & L. showrooms are kind to even the most delicate fabrics. Yet their cleansing action is quick and thorough. In from 5 to 7 minutes they remove every trace of dirt—leave your clothing fresh and spotless. The wringers are efficient, too—safe and quiet. Attractively finished, any of these new models gives you more value in a washer than you have ever been able to buy before at the same price.

IRON IN COMFORT

Now you can buy an electric ironer for as little as \$44.95. A quality ironer, too, of the type that operates by easy finger-tip control. The open end roll makes possible the ironing of everything from sheets to shirts.

If you are shy on space, there is another new ironer you must see. This one folds into a vertical cabinet when not in use. Because it takes up no more space than a chair, it can easily be kept in your kitchen all the time. This model retails for \$64.50. Any dealer will gladly explain to you the merits of the ironers he sells.

Fold-away type ironer

Enjoy electric hot water service now

THE only way to know the real pleasures of automatic electric hot water service is to use it. Not only for laundering, but also for bathing, shaving, dishwashing, cleaning, in emergencies, and for every other possible use. That is why dealers and Pacific Power & Light Company make you this proposition: At a special low price you can buy a 40-gallon automatic electric water heater. Terms—\$10 down and balance in convenient monthly installments. The heater operates for only eight-tenths of 1c per kilowatt hour. Use this heater for all your hot water. Discover the thrill of abundant hot water whenever you turn a faucet. Remember, if you are not completely satisfied at the end of 60 days, the heater will be removed from your home without charge and your payments refunded. The only cost to you will be the electricity you have used.
