BE CAREFUL Winter brings new hazards to motoring, it is pointed out by the safety department of the Oregon State Motor association. Wet high ways, glaring headlights and rain-smearred windshield add tremendously to the dangers of driving, and motorists are warned to use extreme cautions. Records show a sharp rise in the number of accidents during the winter months.

FINDING SQUEAKS When trying to locate the source of annoying squeaks or rattles in the car it is a good plan to inflate the tires a few pounds over normal, suggests the emergency road service of the Oregon State Motor association. The added pressure causes harding riding, which, in turn, causes the noises to become more pronounced and hence more easily traced.

Grass Valley had an organized rooting section with red and grey caps, pom poms, and megaphones. They serpenitined before the game and during the half, giving yells and singing to our section.

The boys will begin their basketball season Saturday night, the 23rd of November, at 8 o'clock, when Dufur comes to play with us. We are hoping this season will give us pleasure, even though we are not always successful in the games.

DRINK YOURSELF SOBER "If you can produce prosperity from scarcity, if you can encourage private industry to reach out by scaring them white; if you can make people want to own property and buy property by continually multiplying taxes on it; then you can make water run up hill, you can spend yourself out of debt; you can drink yourself sober."
