## HI-WAYS TO HEALTH by ADA R. MAYNE OREGON DAIRY COUNCIL

Everyone enjoys entertaining or being entertained during the Christmas season. The sparkle and color to be found every where—in the Christmas tree, the holly, or pine wreath on the door, the red candles in profusion—all contribute toward the general air of festivity.

You have undoubtedly been serving hot rolls all year for the Sunday dinner, or with a salad when friends have joined you for an evening of bridge. But these rolls have been purchased at a convenient bakery, for you had the mistaken idea that 'homemade' rolls were such an effort - you simply couldn't be bothered.

As Christmas approaches you make plans for your holiday entertaining that include home-made pies and home-made candy. There is just as great a difference between home-baked and bakery rolls as between home-made and commercially made candies and pies. Your Christmas dinner will be remembered because of the delicious rolls that were 'different' because you baked them yourself. And therefore we call your attention to the following recipe.

**Raised Sweet Rolls**  
One cup scalded milk  
Five tablespoons granulated sugar  
One teaspoon of salt  
Four tablespoons of butter  
One compressed yeast cake  
Two tablespoons lukewarm water  
One egg, well beaten  
Four cups sifted all purpose or bread flour  
Combined the scalded milk with the granulated sugar, salt and

butter, and cool until lukewarm. Meanwhile soften the yeastcake in the lukewarm water, then stir into the first mixture. Next add the well beaten egg and as much of the flour as can be stirred into the dough without kneading. Turn onto a lightly floured board, form into desired shape for rolls and arrange in greased pan. Cover with a clean cloth and let rise in a warm place until nearly double in bulk. Bake in a hot oven of 425 deg. for 12 to 14 minutes. Remove from the pan, brush with butter and cool on a cake rack. Makes 2 dozen medium sized rolls.

If you will make the effort to try this recipe for Raised Sweet Rolls you will find that delicious rolls can be quite simply made. And the rolls may take many interesting forms.

If it's Parker House Rolls you want, cut off small pieces of dough and pat into rounds. Rub half circle with melted butter, and fold over.

For Clover Leaf Rolls divide dough into even portions the size of hickory nuts. Shape into smooth balls. Place 3 or 4 balls in each greased muffin cup.

A very popular luncheon roll is made by using a basic recipe such as the one given for Raised Sweet Rolls. Then make a syrup of butter, brown sugar and cinnamon. Spread on dough rolled one-half inch thick. Roll up into long rolls and cut into slices. Put some of syrup into small muffin tins and drop a slice in each.

### WHEAT LEAGUE

Continued from page one.

one who attends, will meet and discuss the problems of their business from information gathered by county committees during the past few months.

Quite a number of farmers and others interested in farm problems in this county have expressed their intention of going to Pendleton for the two day session and many will leave Thursday in order to listen to and take part in the preliminary discussions which will begin Thursday afternoon.

### Go To It, Vicar

A kind hearted English vicar one day observed an old woman laboriously pushing a preambulator up a steep hill. He volunteered his assistance, and when they reached the top of the hill said in answer to her thanks: "Oh, it's nothing at all. I'm delighted to do it. But as a little reward, may I kiss the baby?"

"Baby, Lor' bleas you, sor," she returned, "it ain't no baby, it's the old man's bear."

### SEED GROWING

Continued from page one.

For western Oregon Jackman expects all kinds of clover seed to have a relatively better price for the next few years than grains, although many factors may alter this situation. Hairy vetch seed, on the other hand, is grown on enough land to handle prospective needs.

Oregon has a virtual monopoly at present on hairy and Hungarian vetch and Italian rye grass, Ladino clover, Tennessee Anthracnose Resistant Red clover, certified English rye grass and Bent grass. The state supplies a large share of the Reed canary grass seed. Austrian winter peas and Ladak alfalfa.

Seed Production requires a higher type of farmer than general farming, but it has its advantages for those willing to devote care and intelligence to the business, says Jackman. County farm outlook conferences this winter will probably give much attention to this industry.

## Rufus Pupils Make Good School Marks

By Lawrence Henderson

Evidently the school spirit must surely be prevalent in Rufus by a brief glimpse of our honor roll. This six week another student was added to the honor roll, now making the total number of pupils on the present honor roll ten. The honor roll includes three sophomores: Marjorie Brady, Laura Burnett, and Clara Mathieson; five juniors, Norma and Georgiana Blackburne, Anna Coats, Marie Mathieson, and Lawrence Henderson; and two seniors: Ida Coats and Margaret Macnab.

As far as we have been able to determine Catherine Tom visited her grandmother in Stanfield and Marjorie Morris, Lila Morris and Ina Jones visited friends near Big Eddy during the Thanksgiving vacation.

As an after thought we all enjoyed our vacation and have returned to school prepared to do as well, if not better than before.

Miss Valentine has commented upon the Girl's League's successful sale of Christmas cards. Keep up the good work, girls.

Be prepared, you Rufus Boosters! Our first basketball game of the season is at hand. Tonight we meet Kent on our own floor—and, are we going to fight? Yes, sir! That's our attitude toward the double header program that opens the Rufus season. Both boys and girls will participate.

Mr. and Mrs. Tetz and family visited at the home of Mr. and Mrs. V. B. McGowan in Pendleton over the Thanksgiving holidays.

Oh, ho! Is this news! The primary teacher, Miss Murdock, tells us that there has been an increase of three in her roll call as a result of families coming into the district where the breadwinners are employed on the dredging project that is under way directly opposite Biggs, at the present time Lindsay Warren and Charles Bozarth both in the first grade are staying at Fleck's Orchard and Donald Lindre of the third grade is staying at Poplar Grove.

Miss Valentine visited her parents in Lexington during the Thanksgiving holidays.

Further primary news brings to us that the youngsters are being given parts and are practicing in preparation for the Christmas operette, "Christmas in the Toy Hospital." Everything seems to indicate a very nice play on the part of the children's cooperation in practice. This play is under the supervision of the grade school faculty. Miss Murdock, the music and dancing; Miss Ashbaugh, the dialogue and costumes; and Mr. McKenzie who is preparing the scenery for the play's setting.

"On my trip to South America I saw a lot of beautiful panoramas."

"I thought you told me you wouldn't run around with those native girls."

SHERMAN COUNTY JOURNAL

## FIRST in power savings performance

10,000 "Caterpillar" Diesel Tractors have now been put to work by farmers, contractors, loggers and governmental bodies. This is more than has been produced by all other manufacturers combined.

This army of owners selected "Caterpillar" Tractors because "Caterpillar" Tractors have definitely proved their leadership... as better performers... as economical performers. Now consider the range of sizes offered by "Caterpillar"...

**The new "CATERPILLAR" RD7**  
60 drawbar horsepower, 70 on the belt; four forward speeds, 1.6 - 2.4 - 3.4 - 4.7. The equal of the old "Caterpillar" SIXTY and 10% more powerful than the Diesel FIFTY; 3000 square inches of track ground contact.

**The new "CATERPILLAR" RD6**  
45 drawbar horsepower, 51 on the belt forward speeds 1.7 - 2.5 - 3.2 - 4.6; 2392 square inches of track ground contact; pulls a full load on less than 3 gallons cheap fuel per hour.

**The new "CATERPILLAR" RD4**  
30 drawbar horsepower, 40 on the belt; forward speeds 1.7 - 2.4 - 3.0 - 3.7 - 5.4... the widest range of usable speeds ever offered. 1600 square inches of track ground contact. Operates on 2 gallons of fuel per hour.

We are unable for a few weeks to secure machines for display purposes. However, we are now filing orders with the factory for early spring delivery.

**O'Meara Supply & Imp. Co.**
