

Brock Family Hold Reunion At Port Orford

Arthur VanGilder Now On Battleship Maryland In Phillipine Island

Mr. and Mrs. S. J. Brock returned from a family reunion held at Port Orford. Those attending were Mrs. C. C. Spoon of Fallow, Nev. Mrs. Cora Conley of Sparks, Nev. Mr. and Mrs. J. R. Hunt and daughter Gwendolyn and Mrs. Mildred Mortensen of Salem. Mr. and Mrs. Claude Spoon and daughters Muriel and Leah of Port Orford, Mr. and Mrs. Frank Hammond of Fallow, Nev. This is the first time in over thirty years that the four sisters and two brothers have been together.

Arthur Van Gilder has been transferred to the battleship Maryland in the Phillipine Islands. Expectations generally throughout the Wasco territory are that the wheat yield will be heavy and of high quality. Fifteen per cent protein was obtained from the first test on one farm.

Muleskin Leather Aprons for Wheat Bucks. They last for years. \$3.50. J. P. Yates Store.

Miss Hazel Bales and Miss Darlene Ruse attended the dance at Grass Valley Saturday evening.

Miss Beryl Sheets and Miss Betty Jean Brown were among the guests attending the house party Saturday evening by Isabel, Thelma and Emma Ellen Fortner at Grass Valley. Betty Jean, who was from Portland, remained at Grass Valley for a short visit.

W. A. Tate and son James, of LaCenter, Wash., are harvest hands at the Everett Watkins ranch.

Heat shoved the thermometers up to 102 in Wasco Sunday and Monday which made threshing easy.

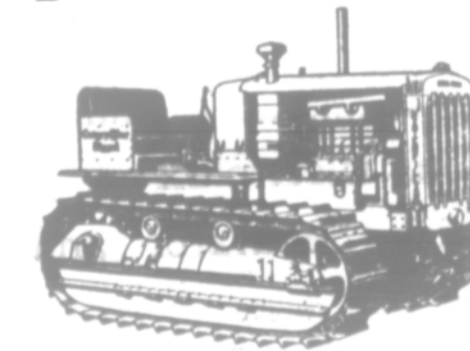

Irma Morgan returned to Moro after a stay of a week at the Joe Hilderbrand home.

White Shoes—Mens and Ladies. Reduced Prices. J. P. Yates.

Miss Maxine Cramer left by bus for Kent to visit over the week end at the Howell home.

A visit of ten days with relatives

4 and 40 horses went to pasture

April 23, 1936. Caterpillar Tractor Co. Peoria, Illinois

Gentlemen:

I'm doing all the work on my 1200 acres with two "Caterpillar" Tractors . . . a Diesel RD-4 and a TWENTY-TWO.

With one hired man and the two machines, we do the same work as 44 horses and 6 men. This means a big saving in money and time, and, what's even more important, more timely field work which increases the yield per acre.

The RD-4, working in fourth gear, harrows 130 acres in ten hours. It does it on 1 3-4 gallons of cheap fuel per hour. My old THIRTY required 3 1-2 gallons of high priced gasoline. That's a saving of nearly 75% over former costs.

The TWENTY-TWO will do nearly as much work as the old THIRTY, and at a much lower cost.

I'm very much pleased with both of my "Caterpillar" Tractors which I bought after a pretty careful investigation into the quality of all other makes.

I've always had respect for "Caterpillar" quality. The performance of the two I now have indicates that I didn't know how good they really are.

Yours very truly, Burdett Prince.

O'MEARA SUPPLY CO.

at The Dalles and Portland was recently enjoyed by Mrs. Jessie Amos.

Irene Dutton who has been in Wasco, formerly staying at the Halse home and of late at the Sherman hotel has returned to her home in The Dalles.

Mrs. Isobel Ebi and Mrs. Vivian Gunther visited here Wednesday of last week with Miss Dutton.

Wednesday evening a traveling group of players performed at the Townsend club meeting singing songs of the organization.

Mrs. J. G. Medler of Lebanon has been visiting at the home of S. J. Brock. Mrs. Medler is a sister of Mrs. Brock. Mrs. Brock and grand daughter, Beverly Ann accompanied Mr. and Mrs. Medler on their return home as far as Portland where she will visit with Mrs. M. A. Church.

Mr. and Mrs. R. W. Brock of Hood River spent the week end at Wasco visiting with Mr. and Mrs. S. J. Brock.

Mr. and Mrs. Homer Wall came from Corvallis Saturday returning home the following day.

Mr. and Mrs. J. R. Yocum and children and the S. J. and R. W. Brock families visited Sunday at the home of Mr. and Mrs. J. M. Yocum, near Mosier.

Beryl Sheets is now staying at the Joe Hilderbrand home.

Mrs. Helen Dingle visited in The Dalles Sunday at the home of her daughter. Relatives from the eastern states came to spend a few days.

See the Lang Wood Range, burns its own ash. at Forsberg Appliance Co., 203 E Third St., The Dalles, Or

Mr. and Mrs. H. Hardy moved out of the Amos cottage and are living near the river.

The Tate house is now occupied by Mr. and Mrs. Wm. Sanford and he is employed on the A. D. Richel-dorfer farm.

Glen Knox of The Dalles is employed at the ware house and is staying with his brother Frank.

Mrs. F. R. Fortner spent several weeks at Pendleton to be with Mr. Fortner in his employment there. They returned home Saturday.

A reception was given at the M. E. parsonage Friday for Mr. and Mrs. Douglas by the ladies of the church. A social afternoon combined with sewing was followed by refreshments.

Mrs. George Potter is in Portland leaving here Thursday of last week. She is expected home this week.

Mary Jeanette Sargent has as her house guest Gwen Gallagher of Salem who came to Wasco last week.

Mr. and Mrs. Homer Dixon and son Lory returned from the beach Wednesday after a few days. They have also been at Dayville with Mrs. Dixon's parents.

Allen Humberg returned home after spending some time visiting with his grand parents, Mr. and Mrs. Georg Rood of Hillsboro.

Mrs. Humberg of Beaverton, mother of Oscar Humberg, is a house guest of the home of Mr. and Mrs. Oscar Humberg.

Guests at the Anna Lee home this week were Mr. and Mrs. Elmer McMillan of Burlingame, Cal. Mr. McMillan is a nephew of Mrs. Lee. Mrs. Wm. Miner accompanied by John Dann and sister, Mabel Coll came from California to spend Tuesday here.

He—There are two periods in a mans life when he doesn't understand a woman.

She—When are they?

He—Before he is married and after he is married.

Students' Bodies Light Bulbs

University of Utah students demonstrate a unique machine they designed and built. Using their bodies as wires and their hands as light sockets, they illuminate lamp bulbs and neon tubes. Leonard G. Walker (left) and Glenn G. Davis (right) are co-builders of the machine. It is unique in being adaptable for production of high voltage or large currents.

Insect Bites Not Serious If Soon Treated

Biting insects, of which there are a number of species that attack man and some of which are concerned in disease transmission, do not usually produce serious direct injuries. Their bites usually require no local treatment. For insect bites the general rule is to use a soothing lotion and avoid scratching. Scratching insect bites seldom brings any real comfort, but severe infection may follow. Many insect bites cause irritation, swelling and inflammation, and may be quite painful and distressing.

Fleas and wingless insects whose legs are fitted for jumping and the mouth parts are adapted for piercing and sucking. There are over 500 varieties of fleas, and about a half of these are capable of attacking man. The bite of the flea produces a small hive-like lesion which is accompanied by itching, irritation and redness. In cases where there are numerous bites and the skin is tender, an inflammation of the skin may occur and lead to infection and suppuration. Avoid scratching and use a soothing lotion.

Mosquitoes are found in almost every locality where there is an opportunity for them to breed. This opportunity depends simply upon

their finding some kind of standing water. The females of many species have developed a taste for blood and blood is indispensable to nearly all for the full development of their eggs. The mosquitoes inject an irritating substance under the skin which brings more blood into the particular part of the skin affected and thus enables the mosquito to obtain its supply quickly. Shortly after being bitten, there is an itching sensation in the affected part of the skin. A raised congested area forms at the sight of the bite. Scratching of the part may lead to secondary bacterial infection and suppuration. The itching may be relieved by the application of a dilute solution of ammonia, a 5% solution of phenol or 95% alcohol.

Painful stings are caused chiefly by wasps, bees, and hornets, which inject irritating substances at the point where the skin is punctured. The treatment of insect stings depends upon the kind of insect that did the stinging. The first thing to do is to remove the stinger from the skin. This should not be done with the fingers but with a sharp, pointed, sterilized instrument. Trying to remove the stinger with the fingers will squeeze most of the poison into the wound from the poison sac. For these reasons an attempt should be made to remove the entire poison sac. The poison sac contains formic acid and other irritants. Since the bee sting is acid it should be counteracted by an alkaline solution of baking soda or

aromatic spirits of ammonia. The sting of wasps and especially of hornets is severe, but these insects do not sting unless provoked. If their nets be interfered with however, they display great fury and will pursue their attackers long distances. Yellow jackets belong to the family of wasps. The poison in wasps and hornets is alkaline and should be treated with dilute acid such as vinegar or lemon juice.

Severe cases should be referred to your family physician as the bites of insects may in some cases be followed by dangerous symptoms.

IF you don't believe in Home Sanitation

You don't believe in Electrolux

- No Fan—Powered by triple turpin Motor
- No Wheels—No exploded dust bag
- No Handle—It's Modern—Airconditioned

It's Electrolux
Check your next cleaning equipment when buying

1. Does it Clean?
2. Has it Power enough to Clean Modern Furniture and Rugs?
3. Does it draw that dirt through Fan and moving parts?
4. Does all the dirt stay in the bag?
5. Does it Aircondition or Recontaminate my home with Disease Containing street Dirt?
6. Does it Clean my entire Home - or - Sweep the Surface?
7. Is it complete? Portable? Light? Easy to operate? Modern?
8. How long will it last and still clean? Cost per year to own?
9. Will it Wax - Spray - Kill Moths and Insects?
10. Last but not Least, will it keep my home Sanitary?

National Grange Cites Danger Of Big Debt

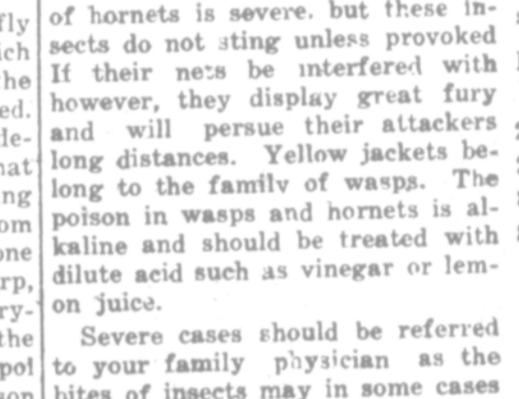

At the close of the fiscal year on June 30, the public debt of the United States had risen to an all time high of \$33,779,000,000. This compares with a figure of \$28,701,000,000 as of June 30, 1935, representing an increase of \$5,078,000,000 during the year. The gross public debt as of June 30, 1936, includes bonds to the value of \$945,000,000 issued in payment of adjusted service certificates.

In addition to the gross public debt, Uncle Sam has certain contingent liabilities in the form of guarantees as to principal and interest on outstanding obligations of the Reconstruction Finance Corporation, the Federal Farm Mortgage Corporation and the Home Owners Loan Corporation, aggregating about \$4,750,000,000.

At the close of the World War, the National debt was \$26,596,000,000. However, as a result of systematic retirement, this debt had been reduced to \$16,000,000,000 on December 31, 1930, to June 30, 1936, the national debt was more than doubled, having increased by over \$17,000,000,000. Each individual's share of this debt has been increased since 1930 from \$130 to \$260.

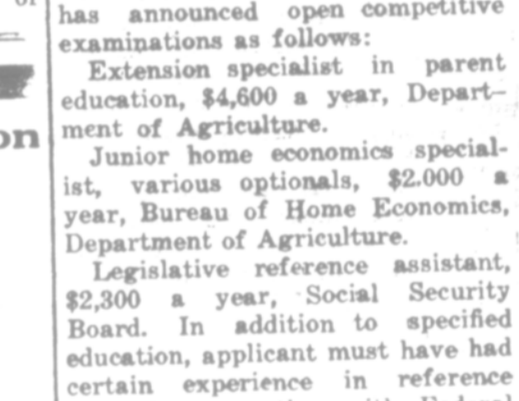

At the present rate of statutory debt retirement amounting to \$500,000,000 a year, it will take until 1970 to repay the money we have borrowed since 1930. This is on the theory that no additional debts will be incurred, which of course is a supposition, pure and simple, under present conditions.—National Grange.

FRANCE'S "MUSSOLINI"

Danger of a Fascist coup such as overtook Italy 14 years ago when Mussolini's Blackshirts marched on Rome, menaced strikers in France. Colonel De la Roque, often called the potential "Mussolini of France," who claims 700,000 followers in his Croix de Feu, and 100,000 in similar Fascist leagues (shown in this photograph) has issued warning that he and his followers are ready for a "decisive assault on the heights of power."

Running out of gas is bad enough when there's a station on the next corner, but when you are 50 miles from nowhere it's a real catastrophe, reminds the Oregon State Motor association. Therefore keep your eye on the gas gauge when traveling the wide open spaces.

A Modern OR RANGE to brighten your KITCHEN

High-Power Perfection range in beautiful new design. THIS BEAUTY is finished in cream-white porcelain. Five High-Power burners are concealed by a hinged panel. The removable two-gallon oil reservoir is concealed. Here's a range that's modern in looks, modern in speed and convenience, yet reasonably priced. Come in and find out about it.

GEORGE B. MOON WASCO, OREGON

HI-WAYS TO HEALTH by ADA R. MAYNE OREGON DAIRY COUNCIL

Field tomatoes are now in season and are offered on the market at very low cost. For months we have been including tomatoes in our salads at hot house prices, for vegetable salad to most of us, is incomplete unless fresh tomatoes are included. Now is the time to serve them in abundance for they are solid and meaty and full of flavor. They offer an appetizing and exceedingly economical vegetable for hot weather.

Tomatoes have an important place in the diet because they are rich in minerals and vitamins, particularly the vitamins A, B, & C. Those interested in weight control will be pleased to know that here is one vegetable appealing as to color, or, and texture, and pleasing to the taste, that is not fattening. You can simply fill up on tomatoes and never once worry about their adding excess weight. That is, if you use a mineral oil dressing or merely sprinkle them with salt.

Tomatoes are excellent combined with bland and colorless foods like cottage cheese, cream cheese, rice or macaroni. Sliced tomatoes and cucumbers served with a tart French or Roquefort Cheese dressing offer an attractive combination. Also a deviled egg served on a lettuce leaf with sliced tomatoes and dressing is truly delicious. Or stuff your tomatoes using chopped hard cooked eggs moistened with cream and seasoned with salt, pepper and mustard; or diced cucumbers, chopped watercress or parsley and mayonnaise; or asparagus tips with French dressing. Slices of tomatoes are delicious used in sandwiches, too, as demonstrated in the sandwich suggestion listed below.

Bacon & Tomato Sandwiches With Cheese Sauce

- 2 1-2 cups grated American cheese
- 2-3 cup of cream
- 8 slices tomatoes
- 8 slices bacon

Mix the cheese and milk together, add salt and pepper. Cook slowly over boiling water until cheese is melted, stirring constantly. Broil tomato slices and bacon. Arrange

broiled bacon on top. Serve at once. Serves 4.

Stuffed Tomatoes With Macaroni & Cheese

- 8 large firm tomatoes
- 1 1-2 cup elbow macaroni
- 1 1-2 qts boiling water
- 2 tsp salt
- 3-4 lb. grated American cheese
- 8 teaspoons butter
- 1-2 cup buttered crumbs
- 2 cups well seasoned thin white sauce

Scoop out all pulp and juice from tomatoes and sprinkle the inside with salt. Cook macaroni in boiling water with salt until tender; drain. Mix well with white sauce, in which is blended the cheese. Put tsp. melted butter in each tomato, and fill with some of the macaroni mixture. Sprinkle the bread crumbs mixed with grated cheese on top of macaroni and bake in moderate oven for 20 minutes. Serves 6.

Runs on KEROSENE (COAL OIL)

ELECTROLUX BRINGS FARM HOMES MODERN REFRIGERATION for a few pennies a day

Needs no electric current . . . no daily attention . . . no water • Has no moving parts to wear • Provides safest food protection . . . • Gives you every worthwhile convenience Saves enough to pay for itself

NO MATTER where you live, you can now enjoy all the comforts and conveniences of finest modern refrigeration. Kerosene Electrolux is identical in all important respects with famous gas-operated refrigerator now serving finest city homes and apartments. It costs little to run . . . saves enough on food bills and refrigerating cost to pay for itself . . . lightens kitchen work. Send coupon below for free literature.
