### Motorist Finds Traveling Aid

One Canadian motorist has come to the conclusion that touring counselors do just about as much travelling as travellers themselves.

Last fall he stepped into the Salem office of the Oregon State Motor association to ask about the trip to San Diego. Claudia Benson, manager of the motor club branch, gave him maps and necessary directions.

Three days later Mrs. Benson was transferred to information headquarters at the San Diego exposition, and one of the first persons to seek advice was the Canadian.

"Aren't you the same person who helped me in Salem the other day?" asked the astonished traveler. "My Gosh, you almost got here before I did. Well, so long I'll see you in New York."

But instead of going to New York, the Canadian last week returned to Oregon. He stepped into the Portland office of the motor club to check on his route back home. There, for the third time in a different city, he was met by Mrs. Benson. Speechless with surprise he blurted: "Say, don't you ever stay put?"

### CHURCHES

Full Gospel Assembly, Sunday School 10:00 a. m. Morning Worship 11:00 a. m. Evening Service 7:30 p. m.

## Prepare summer meals in cool comfort!

An electric range sends its heat into your food ... does not make your kitchen a "bake oven"!

The oven of an electric range even when used for several hours raises your kitchen temperature only about 1°. This is because rock wool insulation keeps the heat inside the oven where it belongs. The surface units direct their heat into utensils, too.

Because the temperature control does your oven watching, you don't have to flood your kitchen with heat every few minutes peaking and turning your food. You just open the oven

door once when the clock says your food has been in the correct length of time and remove your dinner.

Thus when you have an electric range, your kitchen stays comfortable. Why continue to sweeter in the heat of some old-fashioned cooking method? Electric ranges are priced so that you can afford them. You'll find the terms convenient. Start enjoying real cooking comfort. Visit an electric range dealer or our nearest office today.

### Enjoy a refreshing bath ANY TIME!

A hot bath is the most cooling bath you can take. And when you have an automatic electric water heater, you can bathe any time you desire for there's plenty of hot water on tap. Your house doesn't become overheated through keeping up a range or furnace fire. You don't have to remember to light or turn off your heater. Your hot water supply is as automatic as your cold water supply. Ask us to tell you more about electric hot water service... and about our low water heating rate.
