TRUCKS BLAMELESS

The truck driver is the gentleman of the road, points out the Oregon State Motor association.

This year trucks in the state have been involved in 617 vehicular accidents, but in 500 the private motorist was proved at fault.

Newcomer—How beautiful the land lies in our suburb.

Stung Ditto—Yes, but that's nothing to how that real estate agent lies.

Fisherman Mike—Yes, Tom, it was a trout of enormous size. I tell you I never saw such a fish!

Skeptical Tom—I believe you, Mike.

ues during the past four years is attributed largely to the increase in farm prices and income, although partly due to less burdensome farm credit and tax conditions," says L. R. Brethaupt, extension agricultural economist and author of the report. In commenting on the situation.

"The higher land values almost always bring higher interest and tax charges per acre, the future trend of land values will probably continue to rest primarily upon prevailing levels of prices for farm products and the net income of farmers after paying production expenses.

Farm cost indexes given in the report indicate an upward trend in prices paid by farmers for commodities, interest, and taxes com-

pared with a year ago, and in farm wage rates, although the increase in costs during the past year has been less than the rise in prices for farm products.

### Farm Land Values Increase

A twelve-point rise in United States farm land values since March, 1935, and ten points for Oregon, have been registered by the indexes, says the latest agricultural situation report of the OSC extension service. The Oregon index at 82, in March, 1937, compares with 72 in the depression year 1935 and 170 in the land boom year 1920.

"The upward trend in land val-

Men enjoy good gravy. In going back to the Good Old Days, men are apt to mention the gravy "mother used to make" along with the bread and pies. And it seems that her gravy was always "good and brown with lots of flavor."

Two tsp butter  
Two tsp flour  
One-eighth tsp pepper  
Two and a half cups milk  
Two cups dried beef  
Melt butter; add flour. Mix well. Gradually add hot milk, stirring constantly. When all milk is added cook for 5 minutes to insure that the flour is well cooked. Serve on potatoes, either plain boiled, mashed or baked.

### Take a WORM'S EYE view of it

Underneath that's where much of the strength of a tractor shows up. You won't see the sturdy angle bracing of a "Caterpillar" unless you get on your knees and look up. You'll see an ingenious, exclusive brace that absorb the shocks from rough ground, stumps, rocks. The braces hold the tracks perfectly and permanently in line without hampering their up and down movement. That's why "Caterpillars" work rough ground without twist or strain... why they never have the familiar track distortion (toe-in, toe-out) so often seen in tractors of other makes. You pay for permanent track alignment when you buy any tractor... you get it when you buy a "Caterpillar."
