Harry Barzee spent several days in Portland with his parents.

Aldreda Beletski who has been attending school in Washington returned recently.

Kiddle Appointed Crop Insuranec Head

Hundreds of wheat growers from Oregon, Washington and northern Idaho are expected to join AAA extension officials from these same states in the big tri-state meeting at Pendleton May 17, which will serve to launch the new federal wheat crop insurance program in the Pacific northwest.

George E. Farrell, regional director of the AAA for the western states, is scheduled to speak at the Pendleton meeting, as are several high officials of the new crop insurance corporation. Senator Clyde Kiddle of La Grande, newly appointed state supervisor of crop insurance for Oregon, will also be on the program.

Following a general meeting on March 17, to which the public is invited, a second day's session will be held for the AAA extension officials of the three states, at which detailed procedure of handling the crop insurance program will be fully discussed. The Pendleton meeting is one of a series being held throughout the wheat growing areas of the United States at which the operation of the new crop insurance program is being explained.

The insurance program applies only to wheat at the present time and will take effect with the 1939 crop. Premiums may be paid in either wheat or cash and will be paid at the time of fall seeding of wheat. It is planned to have the entire Oregon organization ready to function smoothly by the close of the harvest season.

"What a large family you have, Mrs. Jones," said an American woman to an English lady.

"Yes'm, and the funniest thing is that all the names begin with a haitch. There's Orace, Erbert, Enry, Ugh, Ubert, Aroid, Arriet, and Ety—all except the last one, and we had her named Halice."

Two and One-Half Millions Distributed

Four months administration of the unemployment compensation law distributed two and one-half million dollars to eligible jobless workers in Oregon, and claims by The Dalles office which serves Wasco, Sherman, Gilliam, Wheeler, and Jefferson counties brought \$22,445 to this section. This was .9 per cent of the total.

Processing of claims and benefit payments are reaching current status rapidly. Checks now are going out at the rate of 20,000 per week and 73 per cent of the more

than 65,000 claims filed have passed for payment. Many unemployed workers are receiving their 16th checks this week. Average per check is \$11.82.

Less than 7 per cent of the total claims received are either incomplete or in the computing process. The other 20 per cent have been denied due to labor disputes, seasonality, insufficient earnings in base year or because earnings in the base year were in occupations not covered by the law.

"Any old beer bottles you'd like to sell, lady?" "Do I look as though I drank beer?" "Sorry, lady, any old vinegar bottles?"

HI-WAYS TO HEALTH by ADA R. MAYNE OREGON DAIRY COUNCIL

Asparagus in May, like May flowers, suddenly bursts on the market, unlimited in quantity, gratefully low in cost and in variety from light yellow-green tips, to darker green sun-kissed. Certainly May and June are the months when the wise shopper wants to serve them most frequently. It is one of those ever acceptable fanciful vegetables of a just-right delicate flavor.

In selecting asparagus the best is firm and fresh, uninjured with closely knit tips, and the home-maker who are vitamin conscious select those with the deepest green color.

The preparation of asparagus from simple to elaborate.

Always a favorite is the steaming hot, luscious, streamline asparagus in individual service, served with hot melted butter. It may be placed a cold salad, and be served as a separate course, or be the main vegetable for the dinner. In this preparation the tips and stalks become tender at the same time when the bunch has been cooked upright for about ten minutes and then tipped to cover all for continued cookery of about 15 additional minutes.

Nutritious value is increased, the green color is preserved, and the flavor is improved by cooking asparagus in milk. Especially is this true of Creamed Asparagus, served with an enriched white sauce made by the addition of a beaten yolk and adding a few drops of lemon juice (really a Mock Hollandaise.) This is a spring favorite when the asparagus stalks are placed on hot buttered toast, covered with the sauce and topped with grated American cheese.

When asparagus is used as a salad it requires no apology with either Cream or French Dressing. It may be held in a ring of hollowed red apple, green pepper or pineapple, and it is congenial toward cottage cheese and pimiento. All-in-all asparagus is the most popular all-round vegetable. But when you are looking for a special vegetable luncheon dish, make

Asparagus Souffle, and serve it with cold sliced chicken and a light fruit salad. ASPARAGUS SOUFFLE Two tablespoons butter Three tablespoons flour One cup of milk Two cups cooked asparagus tips One half teaspoon salt Three eggs Melt butter, stir in flour; add egg and salt, stirring constantly. Cook until thickened. Add the asparagus tips, cut in one fourth inch pieces. Separate eggs and add egg yolks, one at a time, beating the mixture thoroughly after each addition. Fold in beaten egg whites. Pour into buttered casserole and poach in a moderate oven for 45 to 50 minutes, using custard test for doneness. Serves four.

Depend upon "Caterpillar"

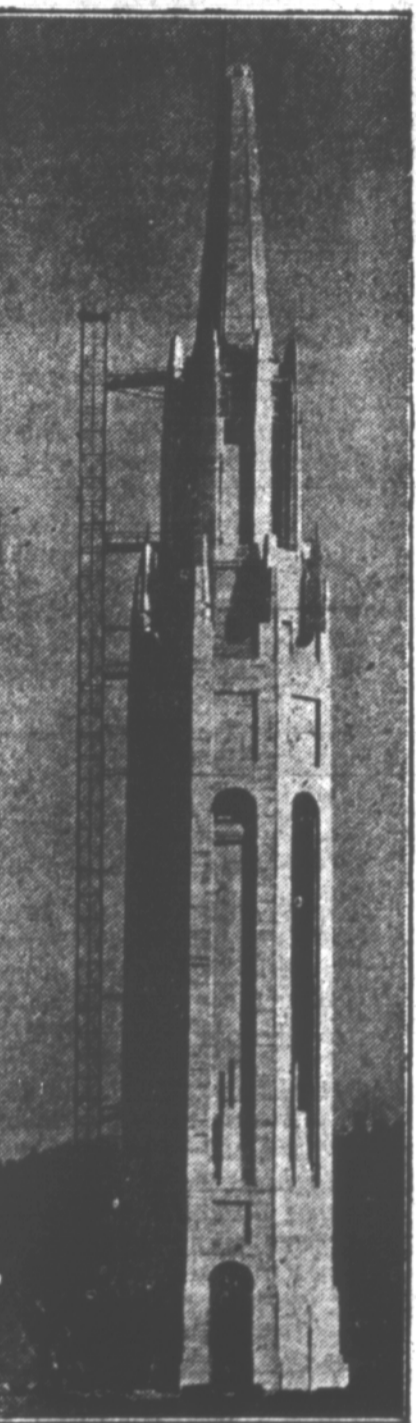

—a dependable product "Caterpillar" tractors are designed and built to give maximum performance, low operating costs and, above all else, dependable service over a long period of time. They are dependable because of the high quality materials used in their construction, the painstaking and uniform machining of parts and the searching inspection each part is given at the factory. No other machine offers the complete dependability of a "Caterpillar" and many thousands of owners will verify this truth.
