No More Price Much Less Cost

Confusing... the matter of price and cost... but price is one thing and cost another. Tractor farming costs are a combination of price-of-machinery and cost-of-operation. Low price machinery and high cost operation don't bring low cost tractor farming. "Caterpillar" machinery is priced as low as any other... its operating cost is much lower. That's the combination it takes to bring low cost tractor farming. "Caterpillar" offers no discounts... no misleading trade allowances... no hidden finance fees... but a genuine investment opportunity for the farmer who counts his cost.
