MORO - HI - HI - LITES

By Frank Sayers

This week has marked the start of a new innovation for the high school; it is Color Week. Every student must wear the school colors (orange and black) every day for a week or pay a one cent fine a day. Color week will be culminated Friday, February 3, at the Grass Valley game. This game is a very important one as both varsity teams have lost two games and won three in the County League. Small pennants will be given to each rooster, and in order to not conflict too sharply with the Woman's club program, the first team will play first at 7:15.

Last Friday night Moro won two games from the Wasco teams on the Wasco floor.

The second team won by a score of 31 to 14. Line-up was Christian, Sayers, French, Pinkerton and Bill Axtell. Subs were Kenny, Bob Axtell, and Martin. Pinkerton continued to be high point man with 14 points.

P. P. & L. CUTS RATES AGAIN!
\$200,000 Reduction Effective March 1st!
Increased use makes possible cut in present low rates. Thousands can now enjoy additional electricity at no extra cost!
In 1938 the average P. P. & L. residential customer got **36%** more electricity for every dollar than in 1928...and now this **4th** successive rate cut here since 1928 gives you even **MORE** electricity for your money!
Beginning March 1, the electricity you use in your home in excess of 35 kw-h a month will cost you only 2-1/4¢ per kw-h. Then at 150 kw-h the rate drops to 2¢. And don't forget P. P. & L.'s special low rate for automatic water heating, only 1/10 of 1¢ per kw-h.
Pacific Power & Light Company's present low residential and commercial rates are to be even lower! In line with the company's progressive rate reduction policy, another reduction, totaling \$200,000 a year, will be put into effect March 1.
This latest rate cut, as well as the succession of rate cuts preceding it, has been made despite sharply increased taxes and the generally higher cost of doing business. The reason P. P. & L. electricity is getting cheaper and cheaper is that we have worked effectively to increase our volume of business. And you have purchased and put into daily use more and more of the appliances essential to your enjoyment of modern electric service.
In 1938 the average annual use of electricity by the company's residential customers increased 75 kilowatt-hours to a new high of 1,550 kilowatt-hours. This increase came about because users took greater advantage of low-cost P. P. & L. electricity for cooking, refrigeration, Better-Sight lighting, automatic water heating and other services. We now pass on to you the savings made possible by our larger volume of business, as we have consistently done in the past and will continue to do in the future.
