P.P. & L. RATE CUT

NOW IN EFFECT!

Latest in succession of rate reductions puts cost of P.P. & L. electricity at new low!

You can now use MORE electricity at No Extra Cost!

● Pacific Power & Light Company brought cheap electricity into this territory. And the \$200,000 rate cut, which went into effect March 1, again proves that this company's progressive and long-established rate reduction policy is making P.P. & L. electricity cheaper and cheaper.

You can electrify your home more completely at little or no extra operating cost. Think for a minute. What new electric services would you like . . . an electric washer, ironer, toaster, I.E.S. lamp, clock, mixer, roaster, radio? The chances are that you can add one or more of these without increasing your electric service bill over what it was prior to March 1. For you can now get more electricity at no extra cost!

If you add an electric range, the operating cost will be even less than before—because the average customer now does his cooking at the 2 3/4c and 2c per kwh steps of the rate. Decide to enjoy clean, quick, convenient electric cooking, too.

At dealers or our nearest office, values in electrical equipment are greater than ever—prices are low. Take full advantage of Pacific Power & Light Company's new low rates by further electrifying your home now.
