

Wasco Woman Flies Home From Fair

Mrs. Owen Barnett arrived home from Sacramento, California Sunday by plane. She had been visiting a sister, Mrs. Jess Cavitt and with her son, Jerry attended the Golden Gate fair.

Mr. and Mrs. Joe Hilderbrand and Mr. and Mrs. Fred Hennig were listed at the Lake Sunday.

Bryan Van Gilder and son, Raymond and Charles Hartman were out of town Sunday for a fishing trip to Badger creek.

Delmar Smith of Portland visited here over the week end. Mr. and Mrs. Stuart Johnson of Salem were also house guests.

Miss Gertrude Cannell was initiated in the order of Eastern Star at a regular meeting Tuesday evening.

Mr. and Mrs. Hudson White and children of Madras were guests Sunday of his parents, Mr. and Mrs. H. H. White.

Mr. and Mrs. Dan McDermid and Donald motored to Portland and return Sunday.

Ladies of the Dorcas Aid met with Mrs. George Lamborn Tuesday instead of Wednesday, their regular day, and worked on miscellaneous sewing.

Mr. and Mrs. Bruce Grady returned from Portland Sunday evening after a stay of a week.

Guests at the home of Mrs. Adeline Holl Monday were Mr. and Mrs. Berger, Nilly and Mr. Berger's sister who left from here to go to the world's fair at San Francisco.

Mr. and Mrs. Ralph Crum are here at the hotel after a week-honey moon which included a visit at the fair in California.

Mrs. Eliza Dingle left for her summer home at Camp Sherman Thursday.

Misses Beverly and Shirlee Yocum are spending the summer at the Sam Brock home.

Mr. and Mrs. Frank Van San of Sacramento, California returned home Friday. They visited Mr. and Mrs. J. F. Royce, Mrs. Van Sant being Mrs. Royce's sister.

Mr. and Mrs. Frank Lamborn Gaylord were week end visitors in Portland. LaVelle returned with them after having visited three weeks in the city. They attended the ball game.

Bernard Rice of Portland spent part of his summer vacation at the home of his parents, Mr. and Mrs. W. B. Rice.

Miss Gladys Stone returned from Portland Saturday with her father and later left again for further medical treatment.

The Jolly Dozen card club met with Mrs. Maud Akers Friday for a no host dinner served at 1 o'clock. Nine members and three guests met for the afternoon with bridge being the diversion. Mrs. Omer Sayers held high score for the club and Mrs. Searcy for guests.

Rev. and Mrs. Clifford Carey and three girls of Los Angeles, California came Tuesday for a visit with his brother, Rev. Gilbert Carey and family, leaving Thursday.

Mr. and Mrs. Joe Hilderbrand and Patricia motored to Portland Saturday returning the following day.

Mrs. Francis Watkins returned home Friday from The Dalles hospital with her infant daughter, Phyllis Karen.

Mrs. Lloyd Royce and daughter visited relatives in Hood River recently.

Mr. and Mrs. Cliff Fridley had a weeks stay in Portland visiting relatives. They returned Friday.

Mrs. Wm. Hulitz came up from Portland Saturday to see her parents, Mr. and Mrs. Ed Feldman and sister, Norma.

Mr. and Mrs. Chester Miller are guests at the home of Mr. and Mrs. Hilderbrand. Mrs. Miller and Mrs. Zell are sisters.

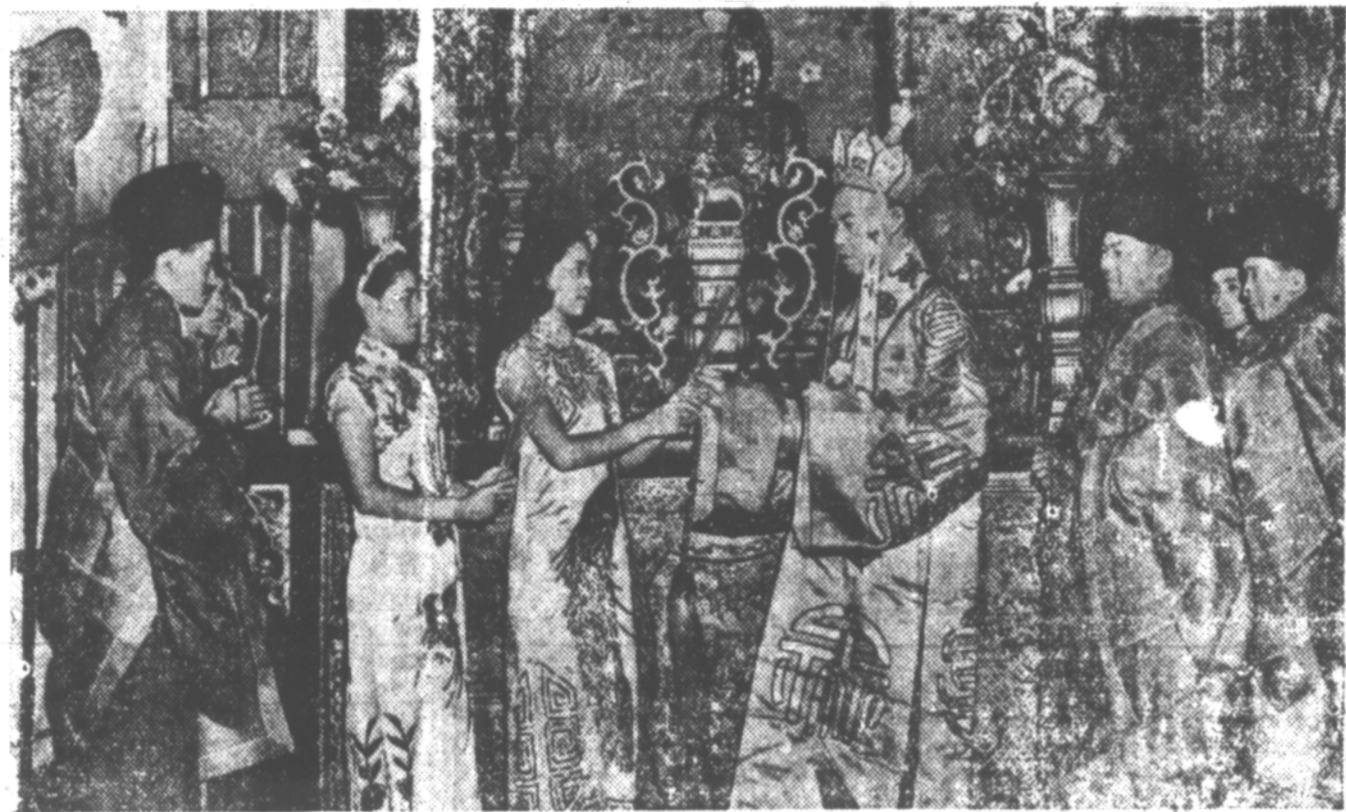

Mr. and Mrs. T. J. Whiteman of Seal Beach, California arrived here in their trailer house Sunday to spend their time visiting at the home of Mr. and Mrs. Hal White.

Mr. and Mrs. Charles Everett commenced taking their furniture to their new home, the Morse house, which they purchased. They expect to rebuild the house before moving all their furniture in to it.

Mrs. James Dunn and children Douglas and David from Fossil are visiting her parents, Mr. and Mrs. Hawley Dutton.

Charles Neville gave a short

New China City Replaces Los Angeles Landmark

Ecclesiastical rites, devil dancers and the traditionalavoring Chinese lion feature prominently in Los Angeles' new China city recently when that picturesque quarter was cleaned of ghosts and demons. The old Chinatown, which was evacuated to make way for a new Union Square, contains many of the many historic incidents of early Los Angeles days. The ceremonies were intended to bring the city of its past.

Installation Of Plumbing Now Concern Of Board of Health

During the past four years, the State Board of Health has exercised control over the installation of plumbing in Oregon and has accomplished a great deal in reducing health hazards caused by faulty plumbing. Particular effort has been devoted to the prevention of pollution of water supply in buildings through the medium of faulty plumbing fixtures and installations which would permit back-flow or back-siphonage. The extreme hazards of faulty plumbing were forcibly brought to the attention of health authorities throughout the country during the time of the Chicago World's Fair a few years ago when thousands of cases of amebic dysentery were traced to two large hotels in which the water supply had become polluted by faulty plumbing.

Another serious outbreak caused by water polluted through faulty plumbing has now come to our attention. The Michigan State Board of Health reports that 45 cases of undulant fever at the Michigan State College during January and February of this year were caused by the pollution of the water supply in the college's bacteriology building.

Investigations by the sanitary engineering division of the Michigan State Board of Health have shown how the infection could have probably did take place. Extensive tests of the water piping system in the four-story bacteriology building revealed that dyes added to a basement sink in which glassware from the undulant fever testing laboratory was washed could be siphoned back through a submerged inlet into the water piping system and recovered in the top floors of the building.

Epidemics of this kind furnish additional proof of why extreme care must be taken to prevent water supply pollution in buildings. The sanitary engineering division of the State Board of Health is constantly striving to improve and better protect the water supplied through the 400 public water supply systems of Oregon. Waterworks officials are doing likewise. Don't let faulty

plumbing undo the work of those who are delivering safe water to your city mains.

New plumbing installations should always be made in accordance with the plumbing code and the rules and regulations of the State Board of Health. Old installations frequently can be changed to afford protection with a small expenditure of money. Write to the State Board of Health for information pertaining to the prevention of water supply pollution through cross-connections and back-siphonage from plumbing fixtures.

Let us all be alert to prevent unnecessary illness and death. Erect a barrier to spread of communicable diseases by installing safe plumbing—not faulty plumbing. Each additional barrier in the path of preventable disease promotes the public health.

Farm Prices Same; Costs Slightly Down

With the general farm price level steady to firm as about the same average level as a year ago and farm costs generally slightly lower, the principal difference in the current agricultural situation compared with last year is in crop prospects, according to information contained in the latest monthly review of economic conditions as they pertain to agriculture just released by the agricultural extension service as OSC.

Government information as of June 1 covering all crops in the nation as a whole indicated a total output 7 per cent less than last year. The drought in the western part of the United States was relieved by rains late in May and in June, and extra favorable weather could still result in a general level of crop production equal to the usual output in the country as a whole, of course, although it is fairly certain that some early crops will be short.

Prospects for hay crops, farm pastures, and for barley and oats on June 1 were lower than in any season of record since 1934, and western ranges were the poorest of record except 1934 and 1937. On the other hand, the carry over of feed grain and hay is fairly large in much of the country. Yields of corn and some other late crops

have not yet been estimated.

United States and world wheat crops will be smaller, but the carry over is large enough to offset the expected reduction in production this year. The United States rye crop is also much smaller than last year and below average.

Prospects for fruit and nut crops were generally favorable on June 1. The pear crop was expected to be only slightly less than last year. Apples were reported above average condition in the central and eastern states and slightly below average in the west. The California prune crop is expected to be smaller than last year but prospects are favorable in the Pacific Northwest.

The Oregon index of the general level of farm prices and the United States index both stood at 64 per cent of the 1926-1930 average as of May 15, according to data given in the extension service report. Compared with a year previous, the Oregon index was up two points while the United States index was down one. The report which is available from county agricultural agents, contains several tables of data on farm prices, costs, and demand factors, and other current and comparative information.

USDA Wants Some Examiners

The United States Civil Service commission has announced open competitive examinations for certain positions in the Department of Agriculture, named below. Applications must be on file in the Commission's office, Washington, D. C., not later than July 20 if received from Colorado and states westward.

Senior field aid (forage crops), \$2,000 a year, assistant laboratory aid (plant technology), \$1,600 a year, junior field aid, \$1,440 a year, junior laboratory aid, \$1,440 a year, Bureau of Plant Industry. Applicants must not have passed their 40th birthday.

Associate warehouse examiner, \$3,200 a year, assistant warehouse examiner, \$2,600 a year, and junior warehouse examiner, \$2,000 a year, Bureau of Agricultural Economics. For the associate grade applicants must not have passed their 45th, for the assistant grade they must not have passed their 40th, and for the junior grade they must not have passed their 35th birthday.

Full information may be obtained from the Secretary of the United States Civil Service Board of Examiners at the post office or custom house in any city which has a post office of the first or second class, or from the United States Civil Service Commission, Washington, D. C.

Floorwalker—Why didn't that man buy anything? What did he want to see?

Demure Assistant—Me, tomorrow night.

Turning the Compliment

At a university, a certain student is quite plump and after a particularly unsuccessful recitation, the professor said: "Alas, sir, you are better fed than taught."

"That's right, Professor," sighed the youth, subsiding heavily; "you teach me,—I feed myself."

HI-WAYS TO HEALTH by ADA R. MAYNE OREGON DAIRY COUNCIL

Here it is July - open season for picnics - and to most of us plans for the "fourth" are of much importance at the moment. Most of us, too, are planning a picnic or an outing of some sort, for doesn't the Fourth of July really initiate picnic season?

In planning a picnic you must remember that the out-of-doors does a certain something to food. Plan a simple lunch - not forgetting, however, that picnic appetites come big. There is no need to tie oneself down to long time roasts and complicated baking for the day that we want to spend out of the kitchen and in the sunshine. There are dozens of picnic menus that are delicious and well planned to safeguard the family's happiness and health.

Many families make it a policy to carry one main dish that may be heated over a camp fire or kept hot in thermos jugs. Have you ever tried packing a casserole, with its contents piping hot, between two feather pillows? It really works and will retain the heat several hours. The hot dish accompanied by a vegetable or fruit salad, bread or rolls and butter, with ice cream for dessert, will answer the food problem. Remember that ice cream, even small quantities, can be packed to keep frozen for many hours. Fill the

thermos jug with milk or a milk shake - another with fragrant coffee, not forgetting the cream, and you need give no more thought to the success of your picnic.

Some situations are ideal for an open fire picnic - in fact, many families think this is the only kind of picnic worthy of the name. A great variety of foods can be prepared over an open fire, especially now with the many new and useable pieces of equipment designed for camp fire cookery. The essentials in equipment are a coffee pot and frying pan; or if you go in for stews or chowder, a long handled kettle.

The good old way of cutting green sticks for broiling steaks or for combinations of meat broiled en broche is still a favorite, too. Combinations of veal and beef, liver and bacon, lamb with slices of onion, are all appetizing cooked in this manner.

The thing is to concentrate on one hot dish as the main interest in your picnic meal and then with plenty of "fixins," cool milk to drink and topped off with a favorite in ice cream, a simple cake or cookies, and you have provided a meal that will make the Fourth of July picnic a tradition in your home.

"LOOK AT THIS RECORD"

Says Alex Floether Lind, Washington

"Farming extremely hilly and soft ground, my D4 has:

- PLOWED: 1000 acres with John Deere disk tillers
- WEDED: 1000 acres, three times—with 3 rod weeders
- HARVESTED: 1000 acres—with Holt Combine
- SEEDED: 400 acres with 3 Hoe drills

"Cost is 6c an acre average or a total of \$50 for fuel, grease, engine oil, etc. I had no breakdowns whatever and I'm certainly very well satisfied."
